

YENER OZCELIK

SOFTWARE DEVELOPMENT ENGINEER IN TEST (SDET) | QA TESTER|

Chicago, IL, USA

773 598 9095

Authorized to work in the US for any company without sponsorship

yener.sdet@gmail.com

<https://www.linkedin.com/in/yenerozcelik/>

Permanent Resident in USA

PROFESSIONAL PROFILE

As a tester with **6+ years** of experience in the IT industry, I manage the testing effort for critical projects, ensuring all user stories are thoroughly tested and automation coverage increased. I collaborate with cross-functional teams including Product, Dev, and QA to establish clear pass/fail criteria, confirm acceptance criteria/requirements, and ensure technical designs met business needs. I also improve production releases by executing regression testing, identifying critical defects, and working closely with the development team to resolve them.

TECHNICAL SKILL

Testing Tools: **Selenium WebDriver, Junit/TestNG, Cucumber, Postman, Rest Assured, DevTools**

Programming Languages: **Java, HTML, JSON, Gherkin, SQL, Linux Commands**

Testing Framework: **Page Object Model (POM), Behavior Driven Framework (BDD), Test Driven Development (TDD), Data Driven Development (DDD), TestNG, Cucumber, Rest-API**

Build Tool: **Maven**

Methodologies: **Agile (Scrum)**

Test and Defect Management Tool: **JIRA, JAMA**

Continuous Integration Tool: **Jenkins, Azure**

Version Control: **GIT, GitHub, GitHub Desktop, Bitbucket**

Databases: **MySQL, Oracle, JDBC , DBeaver**

IDE: **IntelliJ IDEA, Eclipse**

Testing Methods: **Manual, Smoke, Regression, Unit, Integration, Functional, System, Positive, Negative, Database, end-to-end (E2E), UI, API, Parallel, Mobile, Black-Box and Cross Browser testing**

Cloud Technologies: **AWS**

KEY SKILLS

• Product Maintenance • Software Testing • Automation Testing • Documentation • Report Generation • Manual Testing • Requirement Gathering • Data-Driven Framework • Functional & Regression Testing • Automation • Test Reporting • Test Preparation & Review • Test Execution • Web Application Testing • Debugging

PROFESSIONAL SUMMARY

• Excellent practical knowledge of **Agile / Scrum** ceremonies: **Sprint planning, Sprint grooming, Sprint Review, Sprint retrospective** to plan user stories and provide estimates.

• Proficient in writing **Test Strategies, Test Cases, Test Scripts, Test Scenarios** and **Test Summary Reports** for both **Manual** and **Automated Testing**.

• Specialized in planning, coordinating, and performing **Manual, Functional, System, E2E, Smoke, Regression, User Acceptance, Front-End, Back-End, Black-Box, System, API** and other testing types against browsers such as **Chrome, Firefox, and Safari**.

• Solid knowledge in overall **Bug Life Cycle, Logging Defects, Bug Tracking, Bug Reports, Retesting Bug, Closing Bug** and generating the Graphs using **JIRA**.

• In-depth knowledge of designing/developing **Behavior Driven Development (BDD)** and **Test-Driven Development (TDD)** Automation frameworks from scratch using **Java, Selenium WebDriver, Cucumber, JUnit, TestNG, and Maven**.

• Implement custom **Data Driven Framework** using various external data source handlers like **Apache POI** for Excel, **JDBC** for **Databases, Cucumber Scenario Outlines with Examples table, Data Provider** with **TestNG**.

• Compelling experience in **Behavior Driven Development, Data Driven Development, Test Driven Development** frameworks along with **Selenium Web Driver, and Java programming language**.

- Outstanding knowledge in **Object Oriented Programming (OOP)** concepts of **Java** Programming Language and extensively used **classes, objects, data structures, inheritance, polymorphism, exception handling, packages, collections**.
 - Strong experience in **Web Services API** Testing using **REST-Assured** and **Postman** tools and validated the **JSON** format request and responses, used **GET, POST, PUT** and **DELETE** methods.
 - Extensive experience in automated **Serialization** and **Deserialization** scripts and created **POJO (Plain Old Java Object) classes**.
 - Experience in executing parallel testing utilizing **TestNG** framework and **Selenium Grid**, resulting in the generation of detailed **HTML** reports.
 - Knowledgeable with **SQL** and **JDBC** for Database **manual** and **automated testing**.
 - Experience with **Jenkins** for **CI** with the changes in code and scheduling **Regression** and **Smoke** tests.
 - Comfortable to use **Git** and **GitHub** as a code repository to manage code reviews for improvements and new features.
-

WORK HISTORY

TEDS - TENNESSEE ELIGIBILITY DETERMINATION SYSTEM

TEST AUTOMATION ENGINEER

05/2024 to Present

Technologies & Tools: **BDD, DDD, Agile, Scrum, Java, Selenium, TestNG, Cucumber, Gherkin, SQL, Jira, Jama, Git and Bitbucket, DBeaver, Eclipse**

- Working on large-scale IT implementation projects for Medicaid Eligibility Determination systems.
 - Develop, maintain, and execute manual **test cases** based on requirements and use cases, and automated test scripts through **Software Development Life Cycle (SDLC)** and **Software Testing Life Cycle (STLC)**.
 - Develop, execute, and maintain automation scripts using **Java** and **Selenium** for **Medicaid claims** processing applications. Performed **end-to-end validation** of Medicaid claims across Member, Partner, and Worker portals, including claim submission and adjudication workflows.
 - Tested **Partner (Provider) portal** to ensure accurate provider enrollment, eligibility checks, and claim submission functionality.
 - Developing and executing **test cases manually** and developing **automation Scripts** with **BDD** frameworks for web application in **Java**.
 - Developing and maintaining **BDD** by writing **Gherkin** language using **Cucumber**, developed **Scenarios, Scenario Outlines, Data tables, Features** and **Step definitions** and generating **Cucumber reports**.
 - Designing, developing, and implementing **Page Object Model (POM)** based automation framework utilizing **Java, TestNG** and **Selenium WebDriver**.
 - **Automating UI Testing** using **Selenium WebDriver, Java, JUnit** with **Cucumber framework**
 - Conducting backend testing, executing **SQL queries** within **DBeaver** and establishing database connections using **JDBC**
 - Collaborate with **cross-functional teams** (UI/UX, architects, business analysts) across multiple regions to refine requirements and enhance test coverage
 - Isolate, replicate, and report **defects** and verify defect fixes as necessary using **Jira**
 - Responsible for analyzing the **requirements** and planning, creating, and executing all **test cases & test scripts** for the project and complete progress status reporting.
 - Participating in **Agile Scrum ceremonies** for **Sprint planning, Daily Scrum** meeting, **Sprint review** and **Sprint retrospective** to collaborate and deliver high-quality products.
 - Conducting **end-to-end, UI, database, API, functional, smoke and regression testing** to ensure application quality.
-

Change Healthcare

SOFTWARE DEVELOPMENT ENGINEER IN TEST

04/2023 to 04/2024

Technologies & Tools: **TDD, DDD, Agile, Scrum, Java, Selenium WebDriver, Maven, IntelliJ, TestNG, Azure, Jira, Git and GitHub Desktop, SQL, Postman, Rest Assured, Web Application**

- Performed different **test types** such as (**Functional, Database, Regression, Smoke, Positive, Negative, Black box, Front- End, Back- End, UI and API testing**)
 - Implemented **Page Object Model** design pattern to maintain readability, reusability, and maintainability of the Testing framework.
 - Automated Test cases using **Element locators, WebDriver methods, Java** programming features and **TestNG Annotations**.
 - Configured **Maven** project build management for **Java** automation project and developed **Maven Project Object Model(POM.xml)**
 - Utilized **REST API** test automation using **Rest Assured library** and **JAVA**, and manual testing using **POSTMAN** to assert responses.
 - Performed **Data Base** testing with **JDBC** and **SQL** developer to verify whether data on **UI** and **Database** are matching.
 - Conducted **FronD-End** and **Functional Testing** of GUI using **Selenium WebDriver**
 - Improved **test speed** by reducing redundant steps. Using **API** calls to create some necessary fields or connected with database **JDBC** connection and **Selenium** retrieve or insert data.
 - Executed various test plans for identifying **defects** and reporting them with details log information and screenshot in defect tracking tool **JIRA**.
-

JPMorgan Chase Bank

QA TESTER

07/2020 to 04/2023

Technologies & Tools: **BDD, DDD, Agile, Scrum, Java, Selenium, JUnit, Cucumber, SQL, Postman, Jira, Git and GitHub, Jenkins, AWS, Rest Assured, Microsoft Office, Web Application**

- Executed **Manual, System, Regression, Functional, Database, Front End, Back End, API** and **Black-Box** testing at various phases of the development and test cycles.
 - Designed, developed, and implemented **POM** based automation testing **BDD** framework utilizing **Java, JUnit, Cucumber, Maven** and **Selenium WebDriver** for **UI** testing.
 - Performed **UI(User Interface) Automation** testing using **Selenium WebDriver**. Participated in Code Review and creating Framework.
 - Performed **API** Testing for validating endpoints and proper **JSON/XML** structure by using **Rest Assured** and Postman and applying **Get, Post, Put, Delete** methods.
 - Implemented in Database Testing, Data Manipulation using **SQL queries**, establishing Database connection with **JDBC, API** and **JAVA** and verify whether data on **UI** and **Database** were matching.
 - Constructed **Data-Driven testing** using **Apache POI** and **scenario outline**.
 - Used **Jenkins** to run **Regression Test Suite** and **Smoke Tests**, retrieve and analyze **Cucumber** reports.
 - Automated test execution and managed deployments using **Jenkins** and **Github** version control, improving **CI/CD workflow**.
-

C.H. Robinson

QUALITY ASSURENCE TEST ENGINEER

06/2018 to 07/2020

Technologies & Tools: **TDD, DDD, POM, Agile, Scrum, Java, Selenium WebDriver, Maven, Mobile, IntelliJ, TestNG, Jira, Git and GitHub, SQL, Microsoft Office, Web Application**

- Analyzed **requirements** and wrote **test cases** based on the **Acceptance Criteria** of the **User Stories**, and tracked **bugs** and generated daily **defect** reports using **JIRA**.
- Actively Participated in **Manual, Integration, Regression, System, End to End, Black-Box** and **Functional** testing as required in different stages of **SDLC**.
- Developed and maintained **Test Driven Development (TDD)** framework from **scratch** using **Selenium WebDriver** and **TestNG** with **Java** programming language.
- Assisted in **user acceptance testing (UAT)** and provided feedback to **stakeholders**
- Participated in **Agile** ceremonies, ensuring test coverage aligns with **business requirements**.
- Created detailed test plans, scenarios, and test cases for web applications

· Conducted **manual testing** for **UI** and functional validation.

EDUCATION HISTORY

Master of Business Administration - Bay Atlantic University USA	January 2017- June 2018
Bachelor of Science in Economics - Istanbul University Turkey	September 2009-June 2014
