PROFESSIONAL SUMMARY

Analytical Computer Science undergraduate with strong proficiency in Python, SQL, Excel, and Tableau. Experienced in utilizing data analytics to drive customer engagement and operational improvements. Proven track record in developing data-driven solutions and streamlining processes at dynamic organizations. Eager to apply technical expertise to provide actionable insights and optimize revenue strategies in a Data Analyst role.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, C++, R
- **Web Technologies:** HTML, CSS, React, Node.js, jQuery
- **Tools & Platforms:** SQL, Git, Docker, VS Code, AWS, Linux, Tableau, Excel, Data Analysis
- **Libraries:** Phaser, pandas, NumPy, Matplotlib, PyTorch

EXPERIENCE

Best Buy

Jun 2023 - Present

Sales Associate/Geek Squad Intern

Manalapan, NJ

- Diagnosed and resolved hardware/OS issues (RAM, BIOS, drivers, malware) using industry tools.
- Optimized service workflows by analyzing ticket data, reducing repair turnaround time by 28% across 1,800+ service tickets.
- Achieved a 98% customer satisfaction rating through effective troubleshooting and documenting insights from performance trends.

Wit Contests

May 2022 - Jul 2022

Software Engineering Intern

Matawan, NJ

- Developed a PhaserJS-based arcade game with modular architecture that encouraged systematic debugging.
- Enhanced cross-platform compatibility and runtime performance by examining performance metrics.
- Collaborated on real-time gameplay logic and object rendering, contributing to an agile development cycle.

IMZA Creations

Jan 2021 - Present

Web & Digital Marketing Supervisor

Old Bridge, NJ

- Revamped digital strategy by leveraging data analysis, increasing engagement by 66% and retention by 42%.
- Designed SQL-based backends to track customer orders and inventory, utilizing Excel for detailed reporting.
- Implemented AI-driven content personalization through analytic tools, extracting predictive insights with Tableau and Python.

EDUCATION

Rutgers University, School of Arts and Sciences - New Brunswick, NJ

May 2025

Bachelor of Arts, Computer Science

- **GPA:** 3.4
- **Coursework:** Algorithms, Computer Architecture, Data Structures, Internet Technology, Intro to Data Science, Intro to AI

PROJECTS

Weather Application

- Built a responsive weather app using OpenWeatherMap API and browser geolocation.
- Integrated dynamic UI components and asynchronous API handling.
- Supported data retrieval for 3,000+ cities and improved usability by 18%.

RU Warehouse

- Developed a Java-based warehouse management system using hash tables and priority queues.
- Automated inventory categorization and item tracking
- Boosted item retrieval by 20%.

Digit/Face Classification Project

- Implemented a neural network for digit and face classification using two hidden layers.
- Improved model accuracy by using ReLU, dropout, and gradient descent to combat overfitting.
- Conducted multiple evaluation and training runs, resulting in 97% accuracy for digit data and 84% accuracy in face data.
