
SUMMARY

- 4+ years of experience in the technology industries in analysis, providing data insights and analysis to executives required for strategic formulation and optimal decision making.
- Experience working with API's, Dasboards in a fast paced, Deadline driven Environment.
- **Microsoft Azure certified in Azure data fundamentals**
- Worked with the **Snowflake, SQL, PL/SQL, ETL** databases applying various queries and modified tables.
- **Lean Six Sigma White Belt Certified from CSSC**
- Worked with regression testing, release testing, and/or troubleshooting system issues
- Strong professional skills in statistics, analytical frameworks, data mining and programming with functional applications to analyze large and unstructured data using **Tableau, SAS, SQL, Python(pandas) and Google Analytics for high volume of data.**
- Handled multiple projects simultaneously and adhere to timelines. Created Use Cases and User stories.
- Extensively worked with **Agile(Scrum), confluence, JIRA, waterfall model** utilizing different Software Development Life Cycle methodologies. Worked with large data sets of health care as per client needs.

EDUCATION

- **University of Memphis** Memphis, TN, USA
Master's in Information System; GPA:3.63 *Jan. 2022 – May. 2023*
- **Institute Of Public Enterprise** Hyderabad, India
Master's in Business Adminstration; GPA: 3.50 *Jul. 2018 – Jun. 2020*
- **Jawaharlal Nehru Technological University** Hyderabad, India
Bachelor of Technology; GPA: 3.50 *Jun. 2014 – Jun. 2018*

EXPERIENCE

- **Allianz Commercial** New York, USA
Business Analyst *Oct 2023 – Present*
 - Led the development and formatting of insurance forms, ensuring compliance with Allianz standards and implementing efficient manuscript endorsement tracking. Finalized forms grouping for optimized policy issuance, establishing best practices for compliance and efficiency. Collaborated on tracking manuscript endorsements and ensured compliance through annual guideline reviews and updates. Conducted competitor research, supported tool creation for underwriters, and maintained up-to-date documentation. Managed documentation for underwriters, aiding in Marine Teams Shared Spaces build-out and providing editing support for the Underwriting Training Library as part of system migration. Supported manual reports, data cleansing, IT solution development, and system updates, showcasing commitment to accuracy and efficiency. Experience with executing the **Excel** macros, VBA interpreting the data, analysing the results from the data in order to generate every month's loss run reports. Leveraged expertise in data mapping techniques to design and implement robust strategies, coordinating cross-functional teams to ensure seamless integration of disparate systems, enhance data accuracy, streamline operations, and achieve regulatory compliance within the **insurance** domain. Utilized SAP BI tools to align data analytics initiatives with organizational goals, facilitating informed decision-making, operational enhancements, and strategic alignment across diverse business functions.

• Hdfc Bank Pvt Ltd

Hyderabad, India

Business Analyst

Aug 2020 – Dec 2021

- Worked as a part of Data Integration including collecting, analyzing, Reporting and summarizing qualitative/ quantitative data using business intelligence tools Microsoft Power BI, Tableau, Excel, Google Analytics, CRMNEXT, spark, python(pandas) and Qlik Sense data visualization tool. Designed, developed, and maintained efficient, scalable, and reliable data pipelines. Proficient in Python and SQL for building data processing solutions. Spearheaded the implementation of advanced Spend Analytics techniques at HDFC BANK PVT LTD, leading to a 20 Percent improvement in identifying cost-saving opportunities and optimizing procurement strategies. Actively collaborated with Procurement groups at HDFC BANK PVT LTD, facilitating training sessions on dashboards and visualizations, empowering team members to leverage data insights for strategic decision-making. Utilized Power Platform to create interactive dashboards, enabling management to monitor real-time revenue data. Successfully integrated Source to Pay systems, collaborating with cross-functional teams to ensure seamless connectivity and data flow, resulting in streamlined procurement processes and enhanced operational efficiency.

• Brainovision Solutions India Pvt Ltd

Hyderabad, India

Business Analyst

Jul 2018 - Jul 2020

- Developed best practices, standards, and methodologies to assist in the implementation and execution of Data Analysis. Worked with AEM for the implementation of User Interface in the development of the website. Applied Tableau, Python, spark and SQL in data collection, data analysis and reporting to procure data from database structures to report and provide solutions to client requests in a timely manner. Collaborated with cross-functional teams of analysts, engineers, and planners to address complex data challenges. Conducted root cause analysis and optimized existing data pipelines and tools. Effectively communicated collection progress and results to clients, demonstrating transparency and building trust in vendor relationships. Project scheduling co-ordination of tasks, Prepared client information, and build reports. Worked closely with business analysts to evaluate visualization results for clear understanding of the requirement specifications and ad-hoc reports. Designed and developed Power BI graphical and visualization solutions with business requirement documents and created interactive dashboards.

PROJECTS

- **Predicting POLICE DEATHS in U.S.A:** Built a model using different classifiers like support vector machines, Random forest classifiers, Decision trees and logistic Regression for the prediction of police deaths in U.S.A. Predicted test accuracy, train accuracy and confusion matrix for each classifier. Also included the visual material with the aid of Tableau Visualization using different filter and parameters to consider in. **Technologies used: python, Tableau, Power BI, SAS**
- **COVID-19 Live Tracking Report:** Created a live dashboard to track COVID data from all over the world using Microsoft Power BI. Imported Worldometer website data into Power BI to have live updates in the visualized form. **Technologies used: Power BI, Excel**

SKILLS

- **Programming:** Python(pandas), R, MATLAB.
- **Libraries:** NumPy, Pandas, Scikit-Learn, Beautiful Soup, Selenium, Matplotlib.
- **Databases:** Oracle, MySQL, PL/SQL, Teradata, Snowflake, MongoDB
- **Analytical Tools:** Tableau(Charts, Data Connections, Table Calculations, Level of Detail, Analytics), Power BI(Power Query, DAX), SAS, Google analytics.
- **Operating Systems/Cloud Technologies:** Windows, MacOS, Linux, Unix
- **Other Tools:** MS Excel(Pivot, Macros, VLOOKUP, VBA), Jira, SQL, Agile, Big Data, Azure, Six sigma white belt. GMP, GDP, Agile, Scrum, Jenkins, AEM, Docker, Terraform, Kubernetes, SharePoint, Netsuite, AWS, Microsoft Power Platform, Alteryx, visio, Databricks, CRMNEXT, SAP BI, MS-Office 365
