

ABHRAJIT DAS

Jersey City, NJ | 929-724-0426 | abhrajitdas39@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Analyst & Power BI Developer with 4+ years of experience delivering enterprise BI, Analytics, and Data Engineering solutions across Healthcare and E-commerce domains. Hands-on experience with SQL, Power BI, Microsoft Fabric, and Azure, focused on data integration, transformation, and visualization. Delivered 30% faster insights through optimized ETL pipelines, scalable cloud architectures, and advanced analytics that directly supported business and operational decision-making.

TECHNICAL SKILLS & CERTIFICATIONS

Certifications: AZ-900 (Microsoft Azure, 2025) | PL-300 (Microsoft Power BI, 2025) | IBM Data Science (2024)

Programming & Data Engineering: Python (Pandas, NumPy, PySpark) | SQL (MySQL, T-SQL, PostgreSQL) | Azure Databricks

Data Visualization & BI Tools: Power BI (DAX, Power Query, Bookmarks, RLS, Gateway, Performance Analyzer) | Tableau | Excel

Cloud & Data Platforms: Azure Data Factory | Synapse Analytics | Data Lake Storage Gen2 | Microsoft Fabric (Dataflow Gen2, Lakehouse, Medallion Architecture) | Snowflake | Hadoop

Machine Learning & Analytics: Logistic Regression | Random Forest | XGBoost | KNN | LSTM | NLP

Data Modeling & ETL: Semantic Modeling (Star/Snowflake Schema) | ER Diagram | Pipelines | Power Automate

Project Management & Collaboration: Jira | Agile | Azure DevOps | Git

EXPERIENCE

Elevance Health, USA | Data Analyst and Power BI Developer

January 2025 – Present

- Strategic Dashboarding:** Accelerated strategic decision-making by 30% by developing the Healthcare Performance Dashboard, delivering 25+ executive-level views using advanced DAX, bookmarks, Power BI Copilot generated insights and custom RLS for tailored security.
- Fabric Architecture:** Architected end-to-end Microsoft Fabric solutions, utilizing Dataflows Gen2 and pipelines to ingest data into OneLake, improving report retrieval performance by 25% through a unified Medallion architecture.
- ETL Pipeline Optimization:** Streamlined data ingestion from SQL Server using Azure Data Factory with parameterized pipelines, landing cleansed data into Azure Data Lake Storage Gen2 to reduce manual effort by 40%.
- Advanced Analytics:** Elevated model accuracy by 35% by leveraging Azure Databricks (PySpark) for complex transformations, entity matching, and handling late-arriving dimensions before loading into Power BI semantic models.
- Performance Tuning:** Reduced report rendering latency by 40% by diagnosing bottlenecks using Performance Analyzer, enforcing Query Folding at the SQL source, and optimizing Fabric Lakehouse models.
- Data Security:** Secured sensitive healthcare data pipelines using Azure Key Vault, RLS, eliminating 100% of hard-coded credentials and supporting compliance across aligned healthcare data governance and privacy audits.

DataDecor Consulting, USA | Business Intelligence Developer Intern

April 2024 – September 2024

- Dashboard Delivery:** Spearheaded delivery of 20+ interactive E-commerce Sellout Dashboards with drill throughs and KPI cards, reducing report turnaround time by 30%.
- Semantic Modeling:** Reduced report development time by 20% by designing reusable Star Schema semantic models sourced from Azure Synapse SQL and transformed with Power Query M.
- Data Quality Enhancement:** Boosted data quality by 25% through normalization and cleansing of bronze-layer data into silver using PySpark in Azure Databricks.
- Data Security Governance:** Implemented Row-Level Security (RLS) and access control best practices in Power BI, ensuring 100% compliance with client privacy requirements.
- KPI Definition:** Collaborated with stakeholders to code complex DAX measures for YTD/MTD variance analysis, improving the accuracy of financial reporting trends by 15%.

Mphasis, India | Data Analyst

October 2019 – November 2022

- User Retention Analytics:** Increased user retention by 20% by delivering audience-specific dashboards with behaviour segmentation, session analysis, and custom visual storytelling in Power BI.
- Pipeline Automation:** Improved operational efficiency by 25% by automating ETL pipelines using Python (Pandas) and MySQL to replace manual Excel reporting.
- Predictive Modelling:** Enhanced prediction accuracy by 15% by integrating Random Forest and LSTM model outputs into Power BI visualizations for business consumption.
- Cloud Migration:** Led the migration of on-premises legacy data to Azure Data Lake Storage, cutting infrastructure maintenance costs by 20% and enabling scalable cloud analytics.
- Workflow Automation:** Deployed Power Automate flows to trigger real-time data refresh alerts and report distribution, reducing manual monitoring time by 25+ hours per month.

RESEARCH WORK & PUBLICATION

[“Predicting COVID-19 Cases using ARIMA, Prophet, LSTM & Data Analysis Using Power BI \(Springer Publications\)”](#) July 2024

[Lecture Notes in Networks and Systems, Vol. 1, Springer Singapore, 2025, pp. 147-161. DOI: 10.1007/978-981-97-8336-6](#)

EDUCATION

Pace University, New York, NY — Masters on Science in Data Science

Jan 2023 – Dec 2024

National Institute of Technology Agartala, India — Bachelors in Technology

July 2017 – May 2021
