adambutcher1994@gmail.com | 214-883-1203 | Plano, TX | www.linkedin.com/in/adambutcher1

SUMMARY

- Data analytics professional with 4+ years of experience using a data-driven approach to develop solutions. Strong presentation skills supporting stakeholder decision-making. Proficient in data processing, visualization, and modeling. One of my biggest impacts is that I enabled targeted obesity intervention by identifying 12 obesity predictors and narrowed down to 2 by analyzing a dataset of 4000+ patient records using Python and Principal Component Analysis.
- Skilled in leveraging SQL, Python, Statistical Analysis, and Machine Learning to drive actionable insights.

WORK EXPERIENCE

Senior Associate - Data and Analytics | Infosys

Richardson, TX | Oct. 2021 – Nov. 2024

- Designed and implemented an ETL pipeline for a major telecommunications company to ingest and migrate **20+ CSV and DAT files** into a **GCP Bucket**, streamlining data processing; Loaded and transformed data in **BigQuery**, creating **~100 optimized tables** for analytics and reporting.
- Developed an **SQL schema mapping** in Excel for a major pharmaceutical company to rename **400+ variables**, enhancing clarity for Cloud Engineering stakeholders, including a product owner, while working cross-functionally with data and engineering teams; Refactored variables in **Python and SQL scripts** for a **10TB database**, improving code readability, maintainability, and consistency across teams; Systematically applied naming conventions to ensure uniformity across the data pipeline while maintaining **zero downtime** and minimizing business disruptions.

Data Science Intern | Novo Nordisk

Seattle, WA | Jun. 2020 – Aug. 2020

- Identified 12 obesity predictors and narrowed down to 2 by analyzing a dataset of **4000+ patient records** using **Python** and **Principal Component Analysis**; Managed the project from **end-to-end** with minimal guidance.
- Presented major obesity driver insights to an **audience of 150+**, including 4 heads of units and 6 data scientists, enabling data decisions for enabling data-driven decisions for targeted obesity interventions.
- Defined project scope and ensured alignment with business objectives by collaborating with a research data scientist.

PROJECTS

Dog Breed Recommendation Model

Mar. 2025

- Collaborated with a **team of 4** to develop a **Python application** that predicts the best-matching dog breed group for users based on **11 preference-based predictors**.
- Analyzed a **dataset of 200+** dog breeds and narrowed down the selection to **9 distinct dog breed groups** to enhance model accuracy.
- Applied **XGBoost and Random Forest Classifier algorithms** to predict dog breed groups, with **XGBoost achieving 97.02% accuracy**, outperforming the Random Forest Classifier.
- Built a Tableau workbook with dashboards to visualize summary statistics and model results, and presented findings to an **audience of 40+**.

SKILLS

- Programming Languages: Python, R, SQL, Java, SAS
- Frameworks: Numpy, Pandas, Matplotlib, Scikit-Learn, Seaborn
- Machine Learning Algorithms: Supervised Learning (Linear Models, Tree-based Models), Unsupervised Learning (Clustering, PCA)
- Databases: MongoDB, Microsoft SQL Server, MySQL, Oracle, PostgreSQL
- Analytics Tools: Microsoft Power BI, Tableau, Hadoop, Weka

EDUCATION

MBA / Master's in Business Analytics, University of Texas at Dallas

Dec. 2020

Bachelor's in Computer Science, University of Texas at Dallas

Aug. 2016
