WORK EXPERIENCE

Data Manager

Jul.2025-present

Iona Senior Services

Hybrid

- Develop and document new data pipelines to ensure consistent, auditable reporting processes
- Implement electronic data capture processes aligned with organizational compliance and record-keeping standards, reducing missing data by 60%
- Establish data validation and compliance procedures to ensure accuracy and regulatory alignment for DC government reporting
- Partner with program leadership to ensure data privacy and retention practices aligned with organizational policy and funding compliance
- Develop and deliver excel training and macros to improve staff efficiency and adherence to standardized reporting protocols
- Manage and develop a team of three data coordinators to ensure on-time, compliant submission of monthly stakeholder reports
- Maintain and upgrade the organization's proprietary database, ensuring HIPPA compliance and verifying that all security controls were properly configured and operational

Project staffing coordinator

Nov.2023-Jun.2025

General Dynamics Information Technology

Remote

- Developed complex SQL Server queries to support data collection, reporting, and critical data validation efforts, utilizing techniques like joins and aggregate functions, resulting in a 75% decrease in time data cleaning and reporting. These queries were instrumental in identifying and addressing data abnormalities swiftly. Established queries are used several times a week to pull raw data, cleaned in Excel, and visualized in Tableau for reports that are sent to key stakeholders and to identify trends within our data.
- Designed and implemented a SharePoint-based workflow for work assignment, replacing manual email distribution and disparate tracking systems. This data-driven solution reduced the time for work item assignments and data entry by over 50%, from 3-5 minutes to approximately 1.5-2.5 minutes, significantly enhancing operational efficiency. Collaborated on training initiatives to ensure successful adoption and a reduction in assignment errors.
- Supervised and developed a team of three data specialists (responsible for data capture, routing/resource box operations, and program support tasks), enhancing project delivery efficiency by over 20% through targeted coaching, training, performance management, and regular feedback sessions, resulting in a 25% reduction in rework.
- Developed in-depth quality assurance testing of database website functionalities, focusing on user stories and regression testing to pinpoint critical bugs. This proactive approach, with bugs tracked in Jira, led to a significant improvement in system stability and the accuracy of data presented on the platform prior to deployment.
- Identified potential operational risks (e.g., staffing shortages, process bottlenecks) and implemented mitigation strategies including staff cross-training, enhanced quality checks, proactive stakeholder communication, and embedding contingency procedures into SOPs, ensuring project continuity and on-time delivery.

Data Specialist

Jul.2018-Nov.2023

General Dynamics Information Technology

Rockville, MD

- Performed core data specialist functions including data capture/entry, managing Outlook-based routing and resource box operations, supporting SharePoint-based assignment of cases to functional analysts for review, and

providing ad hoc program support (e.g., meeting minutes, data cleaning/QA).

- Served as the primary Subject Matter Expert (SME) for new staff on key operational areas including: data team processes (data collection, weekly reporting), case assignment workflows, and Outlook resource box communications management, provided guidance that accelerated onboarding by at least two months.
- Improved project deliverables (SOPs and program artifacts) through continuous feedback and iterative refinement, resulting in more efficient workflows and a stronger knowledge base.
- Mitigated operational risks by implementing staff cross-training initiatives, conducting additional quality checks on data and resource box operations, and proactively communicating potential issues to managers and stakeholders.
- Provided consistent, proactive support to the team for the position's tenure, mitigating resource limitations and ensuring successful project execution.

EDUCATION

- **B.S Psychology**

Virginia Tech

Blacksburg, Virginia

- **Awarded Full Track and Field Scholarship**

CLEARANCE & SKILLS

- Public Trust Clearance
- Tools: Microsoft SQL Server, Microsoft Excel, Tableau, Be Informed Platform, Jira, Python
- Skills: People Management, Quality assurance, Data visualization, Data entry, ETL, Data analysis, Delegation, Recruiting, Employee development, Attention to detail, Analytical thinking
