PROFESSIONAL SUMMARY

Senior Statistical Programmer with experience supporting Phase I–III clinical trials in pharmaceutical and CRO environments. Strong expertise in SAS programming, CDISC SDTM & ADaM, TLF development, and regulatory-ready deliverables, with hands-on experience as Primary Programmer, QC Programmer, and Study Lead. Proven collaborator with statisticians and cross-functional teams, focused on data integrity, quality, and on-time delivery.

TECHNICAL & ANALYTIC SKILLS

- **Statistical Programming:**
 - SAS (Base, SQL, Macro, ODS, PROC REPORT, Statistical Procedures)
 - R (data manipulation, exploratory analysis, visualization)
- **Clinical Data Standards & Deliverables:**
 - CDISC SDTM & ADaM,
 - TLFs (Tables, Listings, Figures),
 - Documentations: Define.xml, annotated CRF (aCRF), Reviewers' guides (SDRG & ADRG), Programming specifications
- **Regulatory & Compliance Knowledge:** ICH E3/E6/E9, GCP, 21 CFR Part 11, GDPR, FDA

PROFESSIONAL EXPERIENCE

Senior Statistical Programmer

Akkodis | Feb 2025 – Jun 2025

- Automated the creation of Listing for Demographics, Adverse Events and Disposition, and developed interactive listings using R shiny, significantly improving delivery efficiency.
- Developed analysis-ready SDTM and ADaM datasets using R

Senior Programmer Analyst

Zifo Technologies | Jun 2021 – Feb 2025

- Acted as Primary and Lead Programmer for multiple Phase I–III clinical studies, delivering SDTM, ADaM, and TLFs in compliance with CDISC standards and regulatory expectations.
- Led study-level programming activities, including timeline planning, task allocation, and coordination with statisticians and sponsors.
- Performed independent QC of SDTM, ADaM, and TLFs, ensuring data accuracy, traceability, and methodological consistency.
- Developed and maintained study- and client-level SAS macros to standardize outputs and improve programming efficiency.
- Created and reviewed aCRFs, define.xml, SDRG, and ADRG to support regulatory submissions.
- Built pooled SDTM and ADaM datasets and corresponding TLFs to support Integrated Summary of Safety (ISS) analyses.

- Generated patient profiles, protocol deviation analyses, centralized statistical monitoring (CSM), and ad-hoc exploratory outputs.
- Validated datasets using Pinnacle 21 and proactively resolved CDISC compliance issues.
- Mentored junior programmers and delivered technical training sessions on SAS TLF programming and best practices.

EDUCATION

- **Master of Science, Mathematics**
University of Madras, India
- **Bachelor of Science, Mathematics**
Mahatma Gandhi University, India
