EDUCATION

Maryville University

2025

Bachelor of Science in Data Science, 4.0 GPA

Relevant Courses: Foundations of Data Science, Introduction to R, Introduction to SQL, SAS Programming, Machine Learning, Big Data Analytics, Mathematical Statistics, Predictive Modeling

STATISTICAL PROGRAMMING SKILLS

SAS

- Importing, managing, and analyzing data within SAS using either SAS standard data methods or PROC SQL.
- Predictive modeling techniques, including GLMs, ANOVA and regression models.
- Graphs and plots for data visualization and presentation.
- Process automation via macros.

R

- Data importation and manipulation.
- Familiarity with predictive modeling algorithms: ANOVA, ANCOVA, GLMs, regression, decision Trees/Random Forests, k-means clustering
- Experience producing readable reports and graphical representations of results in Rmarkdown.

Python

- Familiarity with important packages for Data Science: pandas, matplotlib, numpy, pyspark SQL.
- Experience working with cloud-based data management systems like Databricks.

SQL

- Knowledgeable about data management with SQL statements in SAS, Python, and standalone SQL via MySQL.

EXAMPLE PROJECTS

House Price Analysis—SAS

- Data management, collection of metrics, visualization, regression analysis and process automation via macros.

Baseball Salary Analysis—R

- Anova Analysis of MLB Salaries with visualization and residual analysis.

Insurance Claims Analysis--R

- Predictive modeling techniques in R with insurance claim data. Includes linear regression, decision tree, and random forest examples.

Forest Cover Prediction--Python

- Predictive modeling in Python using Databricks. Data Processing, visualization, and various predictive modeling techniques included.

WORK EXPERIENCE

Statistical Programming Intern—Innospera

2025-Present

- Imported clinical data from multiple sources
- Built a database of the most important variables
- Calculated custom variables to better inform the hypothesis
- Analyzed the data using linear regression, logistic regression, and decision tree classification models.
- Explored statistical relationships and significance between predictor variables and the response.
- Generated visual representations of important findings
- Assisted in preparing a presentation to be presented at the American Thoracic Society conference.

SKILLS

Computer software/ frameworks: Microsoft Office, Git
Communication Skills : English (Native), German (Advanced).
