Professional Summary

Final-year B.Tech Computer Science and Engineering student with a strong interest in backend software development. Hands-on experience in building academic projects using Java and Spring Boot, including RESTful APIs, database integration, and authentication workflows. Familiar with core computer science fundamentals such as data structures, object-oriented programming, and SQL. Actively seeking entry-level software engineer or internship opportunities to contribute to real-world projects and grow as a software professional.

Education

ITM University, Gwalior
Bachelor of Technology (B.Tech) – Computer Science Engineering

July 2022 — June 2026

Technical Skills

- **Programming:** Java, SQL
- **Frameworks:** Spring Boot, REST APIs
- **Web Technologies:** HTML, CSS
- **Concepts:** OOPs, Data Structures
- **Tools:** GitHub, Salesforce CRM

Projects

Car Rental Web Application

HTML, CSS, Spring Boot

- Developed a full-stack car rental web application using Spring Boot with HTML and CSS.
- Implemented user authentication, dynamic car listings, booking management, and role based access..
- Designed RESTful APIs and integrated SQL-based database operations for users, vehicles, and bookings.
- Built an admin dashboard to manage inventory, users, and bookings.

Automotive CRM System (Salesforce)

- Developed a Salesforce-based CRM solution for managing customers, vehicles, and sales activities.
- Implemented customer tracking, test ride booking, and automated email notifications.
- Worked with Salesforce CRM Analytics and automation tools to streamline business workflows.

Certifications

- **Programming Using JAVA – Infosys Springboard**
 - Learned core Java concepts including OOP principles, exception handling, file handling, and collections.
 - Built console-based applications to strengthen problem-solving and logical thinking skills.
- **Data Structures & Algorithms – Infosys Springboard**
 - Gained understanding of arrays, linked lists, stacks, queues, trees, and sorting algorithms.
 - Improved algorithmic thinking and ability to write optimized and efficient code.
- **Salesforce Developer – Agentblazer Champion Program (SmartBridge)**
 - Learned Salesforce fundamentals including CRM concepts, objects, workflows, and automation.
 - Worked on building custom Salesforce applications and managing customer data effectively.

Additional Information

- Strong problem-solving ability
- Quick learner with adaptability to new technologies
- Effective communication and teamwork skills
