PROFILE

Dedicated professional with a unique blend of clinical and data science expertise. I hold a Bachelor's in Doctor of Pharmacy and am currently pursuing a master's in health data science. With clinical experience as a pharmacist and advanced skills in data analysis I aim to drive informed decision-making and improve patient outcomes. Passionate about combining healthcare and data science to innovate and make a meaningful impact in the field.

EDUCATION

SAINT LOUIS UNIVERSITY
Master of Health Data Science

St. Louis, MO
Dec 2025

- GPA: 3.96 / 4.00

NARASARAOPET INSTITUTE OF PHARMACEUTICAL SCIENCES
Doctor of Pharmacy

A.P., India
Aug 2023

- Cumulative Grade: 82.26%

PROFESSIONAL EXPERIENCE

VIJAYA SAI NURSING HOME
Clinical Pharmacist

A.P., India
Aug 2022 – Aug 2023

- I gained practical experience in medication management and patient counselling. I collaborated with healthcare teams to ensure safe and effective treatments for patients. My role involved optimizing pharmacotherapy and providing personalized care. This experience strengthened my foundation in clinical pharmacy practice and patient-centered healthcare.

PROJECTS

Air Pollution and Health Impacts Analysis

Sep 2024 – Dec 2024

- Analysed the relationship between air pollution levels and their impacts on public health across various countries. It uses data related to AQI (Air Quality Index) values and pollutants such as CO, Ozone, NO2, and PM2.5 to examine their effects on respiratory diseases, cardiovascular diseases, and mortality rates.
- Utilized Python, R, and Microsoft Excel to process data from datasets, performing statistical analysis and creating visualizations for actionable insights.

Lifestyle and Environmental Factors in Lung Cancer

Mar 2024 – May 2024

- Conducted an in-depth study on the relationship between lifestyle factors (e.g., smoking, diet) and environmental elements (e.g., air pollution) affecting lung cancer severity.
- Applied R for data analysis and presented findings to academic and healthcare audiences, providing actionable insights for lung cancer prevention and management.

Exploring Long-Term Outcomes in Sepsis Survivors

Mar 2024 – May 2024

- Evaluated post-discharge care strategies for sepsis survivors, focusing on the physical, psychological, and socioeconomic aspects.
- Applied R and Microsoft Excel to identify trends in recovery and post-sepsis complications.

PUBLISHED RESEARCH

Drug Utilization Evaluation of Statins in Cardiovascular Disorders | [LINK](#)

May 2023

- Conducted a prospective observational study at a tertiary cardiac hospital, analysing statin utilization patterns in cardiovascular disease management.

- Evaluated the rational use of statins and identified potential adverse effects, contributing to improved prescribing practices.

SKILLS

- **Programming Languages:** Python, R, SQL
- **Visualization Tools:** Power BI, Tableau
- **Frameworks:** Pandas, NumPy, Matplotlib
- **Platforms:** Visual Studio Code, Google Colab

CERTIFICATIONS

Python for Data Science and Machine Learning (Udemy) | [CERTIFICATE](#) Jan 2025

- Learned about the data manipulation, visualization, and model building using libraries like Pandas and NumPy.
- Developed practical skills in applying machine learning algorithms and data analysis techniques to solve real-world problems.

Andhra Pradesh Pharmacy Council (APPC) | [CERTIFICATE](#) Jan 2024

- Registered Pharmacist (Issued: Jan 2024, expires: Dec 2028) under The Pharmacy Act, 1948 (Section 32(2)) — Entitled to all privileges granted under the Pharmacy Act.

Pharmacy Technician Certification Board

- Certified Pharmacy Technician | [CERTIFICATE](#) Oct 2025

OTHER

NSS Member Jun 2017 – Aug 2023

- Led and organized diverse health camps and blood drives in remote villages, demonstrating strong organizational and leadership skills in community health initiatives.
