

Binjal Patel | Data Analyst

NC | +1 252 467 5243 | patelbinjal007@gmail.com | LinkedIn

SUMMARY:

A results-driven Data Analyst with around 4 years of experience in the healthcare and financial services sectors. Adept at data integration, predictive modeling, and creating interactive visualizations. Skilled in using SQL, Python, Snowflake, Google BigQuery, and Power BI to deliver actionable insights that improve decision-making and operational efficiency. Proven track record of collaborating with cross-functional teams including engineers, clinical researchers, and regulatory specialists to develop data-driven solutions. Known for driving innovation, optimizing workflows, and delivering impactful business outcomes.

SKILLS

Languages:	SQL, Python, R, HTML, VBA
Frameworks & Libraries:	Pandas, NumPy, Scikit-learn, BeautifulSoup, Matplotlib, Seaborn, Jupyter Notebook
Databases:	MySQL, PostgreSQL, Oracle, Google BigQuery, MongoDB
Big Data Technologies:	Google Cloud Platform (GCP), Apache Hadoop, Apache Spark
Financial Analytics:	Risk Analysis, Portfolio Optimization, Credit Scoring Models, Regulatory Reporting (Basel, CCAR)
Healthcare Analytics:	Claims Analysis, EHR/EMR Data Processing, HIPAA Compliance
Data Visualization:	Tableau, Power BI, Matplotlib, Seaborn
ETL & Data Warehousing:	SQL Server Integration Services (SSIS), Snowflake, Alteryx, Google BigQuery
Tools:	PowerPoint, Excel, JIRA, Confluence, Splunk, Citrix, Git, SAS, RStudio

EXPERIENCE

Capital One, USA

Jan 2024 – Present

Data Analyst

- Designed and implemented ETL pipelines using SQL Server Integration Services (SSIS) and Snowflake, consolidating data from transactional databases and credit score repositories, ensuring high-quality data for analysis.
- Built predictive credit scoring models using Python (Scikit-learn), applying logistic regression and decision tree algorithms to assess customer creditworthiness, improving risk classification accuracy by 15%.
- Performed in-depth portfolio risk assessments with Google BigQuery and Tableau, identifying high-risk customer segments and recommending effective mitigation strategies.
- Automated Basel III and CCAR regulatory reports through SQL and Power BI, ensuring precise and timely submissions.
- Created visually compelling dashboards in Tableau and Power BI to display credit utilization trends, delinquency rates, and portfolio diversification, empowering leadership to make informed decisions quickly.
- Leveraged Apache Spark and GCP to accelerate big data processing, achieving a 40% reduction in query execution times for unstructured transaction datasets.
- Optimized data pipelines and query performance by integrating machine learning models into the ETL process, leading to a 25% reduction in data processing time and more accurate risk assessments for large-scale financial datasets.
- Collaborated with cross-functional teams in an Agile Scrum environment, refining credit models and dashboards, ensuring alignment with business objectives.

Philips Healthcare, India

Jun 2020 – Sep 2023

Data Analyst

- Analyzed EHR/EMR records and medical device performance data using SQL and Google BigQuery, identifying trends that enhanced patient health outcomes and device reliability.
- Streamlined data integration by developing ETL pipelines with Apache Airflow and Snowflake, aggregating clinical data from imaging devices and other sources, reducing data processing times by 30%.
- Built predictive models in Python (Scikit-learn) to forecast patient health risks and identify potential device failures, reducing unplanned equipment downtime by 25%.
- Developed dynamic dashboards in Power BI and Tableau to visualize key metrics such as device utilization, patient satisfaction, and clinical efficiency, enabling data-driven decision-making.
- Implemented risk stratification techniques to classify high-risk patient cohorts, enabling targeted interventions and improving clinical outcomes across various healthcare facilities.
- Collaborated with multidisciplinary teams to define data analysis objectives, ensuring alignment with compliance standards and enhancing product development strategies.
- Presented actionable insights to senior leadership, highlighting opportunities to enhance device performance and optimize clinical workflows.
- Conducted root-cause analysis of device malfunctions by integrating real-time sensor data with historical performance records, enabling proactive maintenance strategies and reducing failure rates by 20%.

EDUCATION & CERTIFICATES:

Bachelor Of Engineering in Information Technology

May 2020

Vadodara Institute of Engineering, India

- Google Data Analytics Professional Certificate
