Introduction

I am a Metrics-driven and insight-led Data Analyst with over 5 years of hands-on experience transforming raw data into actionable insights across healthcare, finance, and e-commerce domains. I specialize in SQL, Python, Power BI, Tableau, and Qlik Sense for advanced analytics, dashboarding, and automation. I have a strong background in designing and optimizing ETL pipelines, predictive models, and data warehouses using tools like Snowflake, Redshift, and Hadoop. With a focus on real-time analytics, statistical modeling, and machine learning techniques, I am ready to contribute to high-impact, cross-functional data projects and am immediately available for long-term opportunities.

Education

RIVIER UNIVERSITY, NEW HAMSHIRE

2023 - 2024

Master of Science in Computer Information Systems

Experience

MCKESSON | Data Analyst

SEP 2023 - Present

A Fortune 10 leader in healthcare services, enhancing patient outcomes through advanced analytics and connected care solutions.

- Automated healthcare data preparation workflows using Trifacta and Python (Pandas), improving data accuracy by 25% and reducing manual processing across compliance-critical pipelines.
- Built enterprise-scale ETL processes using SQL Server and SSIS to consolidate patient and claims data, cutting processing time by 40% and accelerating access to insights for analytics stakeholders.
- Designed and deployed FHIR and RESTful APIs to unify patient records across multiple systems, enhancing interoperability and enabling real-time data exchange across clinical operations.
- Created machine learning models using Scikit-learn and SQL to predict hospital readmissions, reducing unplanned admissions by 20% and improving care planning for over 2,000 patients.
- Architected secure data warehousing solutions using Snowflake and Hadoop, enabling scalable querying of 10+ data sources and reducing average query time by 50%.
- Performed deep-dive analysis on healthcare claims data using ICD and CPT codes, identifying 200+ billing discrepancies and driving a 15% improvement in reimbursement accuracy.
- Developed executive dashboards with Power BI and Qlik Sense to enhance visibility into clinical and operational metrics, improving decision-making and reporting transparency.
- Technologies: SQL, Python (Pandas, NumPy, Scikit-learn), SSIS, Trifacta, Power BI, Qlik Sense, Snowflake, Hadoop, Apache Kafka, FHIR APIs, RESTful APIs, AWS Redshift, Excel (VBA), HL7, ICD & CPT Codes, JIRA, Confluence

ACCENTURE | Data Analyst

Oct 2020 - Nov 2022

A global professional services firm driving digital transformation, data innovation, and cloud analytics for enterprise clients.

- Performed in-depth data exploration and cleansing using SQL and Python (Pandas, NumPy), increasing data accuracy by 30% across financial reporting pipelines and regulatory analytics workflows.
- Built scalable ETL workflows with SSIS and Apache NiFi to integrate data from 6+ banking platforms, streamlining reporting cycles and improving data availability for business users.
- Developed predictive models using Scikit-learn to identify customer churn risk, enabling retention strategies that improved engagement across key customer segments.
- Created Tableau dashboards to visualize KPIs, trends, and financial metrics, reducing manual reporting dependencies and speeding up stakeholder insights delivery by 3x.
- Conducted A/B testing on marketing campaigns to evaluate model effectiveness and increase lead conversion by 12%.
- Partnered with compliance and IT teams to align data practices with Anti-Money Laundering (AML) and Know Your Customer (KYC) regulations, avoiding potential fines and ensuring audit readiness.
- Technologies: SQL, Python, Tableau, SSIS, Apache NiFi, Azure Data Factory, Excel, A/B Testing, AML, KYC

WIPRO | Data Analyst Intern

May 2018 - Aug 2020

A global IT consulting company delivering data-driven solutions, digital platforms, and cloud transformation initiatives.

- Designed and deployed ETL pipelines using AWS S3, Redshift, and SSIS to centralize large volumes of sales and customer data, improving report readiness and analytics access.
- Conducted customer segmentation using RFM analysis and K-Means clustering, uncovering insights that supported a 12% improvement in inventory management.
- Technologies: SQL, Python, AWS S3, SSIS, Power BI, Apache Spark, RFM, K-Means Clustering, Google Analytics

Skills

- **Data Visualization:** Power BI, Tableau
- **Database Management and Governance:** SQL, HIPAA Compliance
- **Programming and Automation:** Python, R, Advanced Excel
- **ETL and Data Integration:** SSIS, Apache, Azure Data Factory

- **Workflow Management:** MS Visio, JIRA
- **Cloud Technologies:** AWS, Azure
- **Version Control:** Git, GitHub
- **Healthcare Data Systems:** FHIR APIs, HL7, ICD & CPT Codes
