

AKSHAY SODHA

Business Data Analyst

CA, USA | Phone: +1 4087550924 | Email: akshaysdha@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Business Data Analyst with 4+ years of experience supporting **financial services and enterprise retail organizations**, specializing in **business requirements gathering, data analysis, process improvement, and stakeholder collaboration** across complex business and operational domains.
- Hands-on expertise in **SQL, Advanced Microsoft Excel (Pivot Tables, Power Query, VBA)** and **Python (Pandas, NumPy)** for data extraction, data validation, root cause analysis, trend analysis, and performance measurement to support data-driven business decisions.
- Skilled in developing **interactive dashboards, reports, and KPIs** using **Power BI, Tableau, and Excel**, translating complex datasets into actionable insights for executives, business leaders, and cross-functional teams.
- Good knowledge of **Agile and SDLC methodologies**, including **JIRA, Confluence, BRD, FRD, user stories, acceptance criteria, impact analysis, and UAT**, ensuring clear alignment between business stakeholders and technology teams.
- Hands-on experience working with **enterprise systems and analytics platforms** such as **SAP S/4HANA, Salesforce CRM, Alteryx, Google Analytics 4 (GA4), HP ALM**, and data warehouses, with a strong focus on process optimization, data quality, compliance, and operational efficiency.

TECHNICAL SKILLS

Data Analysis & Analytics: Data Analysis, Exploratory Data Analysis (EDA), Trend Analysis, Root Cause Analysis, Descriptive & Diagnostic Analytics

Business Analysis & Requirements: Business Requirements Gathering, BRD, FRD, User Stories, Use Cases, Process Mapping, Gap Analysis, Stakeholder Management

SQL & Databases: SQL (Advanced Queries), Joins, Subqueries, CTEs, Window Functions, Data Validation, Relational Databases

Data Reporting: Power BI, Tableau, Excel Dashboards, KPI Tracking, Executive Reporting, Data Storytelling

Advanced Excel: Pivot Tables, Power Pivot, Power Query, VLOOKUP, Macros, Financial & Operational Models

Statistical & Analytical Techniques: Statistical Analysis, Hypothesis Testing, A/B Testing, Regression Analysis, Forecasting

Tools & Programming: Python (Pandas, NumPy), R (Basic Analytics), Automation Scripts, Data Cleaning

ETL & Data Management: Data Extraction, Transformation & Loading (ETL), Data Quality Checks, Data Reconciliation

Business Operations & Process Improvement: Process Optimization, Operational Metrics, SOPs, Cost Analysis, Productivity Analysis

Agile & Project Methodologies: Agile, Scrum, Kanban, SDLC, Sprint Planning, Backlog Grooming, JIRA, Confluence

WORK EXPERIENCE

Morgan Stanley, CA

Jan 2025 – Jan 2026

Business Data Analyst

- Conducted **detailed trade lifecycle analysis** (trade capture, confirmation, settlement, and reconciliation) by collaborating with Front Office, Middle Office, and Operations teams, and documented end-to-end workflows using **Microsoft Visio**, enabling clear identification of process gaps and control failures across post-trade operations.
- **Elicited and documented business requirements** through stakeholder interviews and workshops, translating operational needs into comprehensive **Business Requirement Documents (BRDs)** and **Functional Requirement Documents (FRDs)** using **Confluence**, ensuring alignment between business users and technology teams.
- Performed **data analysis** on trade and settlement records using **SQL**, validating trade attributes, counterparty data, and settlement status to identify root causes of trade breaks, contributing to a measurable **18% reduction in recurring settlement exceptions**.
- Developed detailed functional specifications and user stories in **JIRA**, defining acceptance criteria, business rules, and dependencies for system enhancements, which improved sprint planning accuracy and reduced requirement-related rework during development.
- Executed impact analysis for system enhancements and regulatory changes, assessing downstream effects on confirmation, clearing, and settlement systems using **Excel (advanced formulas, pivot tables)** to support data-driven prioritization of remediation efforts.
- Led **User Acceptance Testing (UAT)** by designing test scenarios, preparing test cases, and validating end-to-end trade processing flows using **HP ALM**, ensuring that system changes met business requirements before production deployment.
- Defined **operational KPIs and performance metrics** related to trade matching rates, settlement efficiency, and exception aging, presenting insights to senior stakeholders using **PowerPoint**, which supported process optimization initiatives and improved overall post-trade processing efficiency by **12%**.

Technical Business Analyst Intern

- Analyzed and queried multi-schema real estate datasets using SQL to validate property, lease, transaction, and facilities data, ensuring accurate downstream consumption by analytics dashboards and reducing data inconsistencies across demo and provisioning environments.
- Built, refreshed, and troubleshooted Power BI dashboards by resolving SQL–Power BI connectivity issues, fixing stale data refreshes in Power Query, and validating visualization logic, directly improving data reliability and usability of the Newlitic analytics platform for client demos.
- Conducted structured Quality Assurance analysis using Smartsheet to document, track, and resolve visualization defects and demo data gaps, enhancing presentation accuracy and supporting readiness of client-facing demo environments.
- Collaborated in Agile sprint workflows using Azure DevOps for task tracking and documentation, while completing ISO 27001 ISMS training to ensure analytics workflows and platform configurations complied with enterprise data security and PII handling standards.

Reliance Industries Limited, Delhi, India

Aug 2021 – Jul 2023

Business Operations Analyst

- Leveraged **SQL** to extract and analyze large-scale transactional sales, inventory, and store-level operational data from enterprise data warehouses, enabling leadership to identify underperforming stores and improve same-store sales performance by **8–10%**.
- Designed executive-level **Power BI dashboards** to monitor daily KPIs such as revenue, inventory turnover, fulfillment SLA adherence, and store productivity, improving data visibility and reducing manual reporting efforts by **40%**.
- Utilized **Advanced Microsoft Excel (Power Query, Pivot Tables, VBA)** to perform demand-supply reconciliation, cost variance analysis, and operational forecasting, supporting merchandise planning and reducing stock-out incidents by **12%**.
- Applied **Python (Pandas, NumPy)** to automate retail performance analysis and customer segmentation models, enabling faster identification of high-value customer cohorts and improving targeted promotion effectiveness by **15%**.
- Built interactive **Tableau** visualizations to analyze omni-channel performance across physical stores, JioMart, and quick-commerce platforms, supporting data-driven decisions for store expansion and channel optimization.
- Conducted end-to-end operational analysis using **SAP S/4HANA** to evaluate procurement cycles, inventory aging, and supplier performance, contributing to a **6% reduction in carrying costs** through process optimization.
- Integrated store-level and customer data from **Salesforce CRM** to analyze customer behavior, loyalty trends, and service efficiency, enabling improved customer retention strategies and personalized retail engagement initiatives.
- Tracked digital commerce performance using **Google Analytics 4 (GA4)**, analyzing conversion funnels, user journeys, and cart abandonment metrics to support enhancements in JioMart's digital customer experience.
- Managed business requirements and operational enhancement initiatives using **JIRA**, translating stakeholder needs into detailed user stories, acceptance criteria, and backlog prioritization for retail operations and analytics teams.
- Implemented automated data blending and operational workflows using **Alteryx**, reducing data preparation time for weekly operational reviews by **50%** and improving the accuracy of store performance and supply chain reports.

Reliance Industries Limited, Delhi, India

Aug 2020 – Jul 2021

Junior Business Analyst

- Analyzed multi-format retail sales and inventory data using **SQL**, identifying regional performance gaps and demand inconsistencies that informed corrective actions and contributed to a **6–8% improvement in category-level sales performance**.
- Developed standardized MIS reports and operational scorecards using **Advanced Microsoft Excel (Pivot Tables, Power Query)**, improving data accuracy and reducing manual reporting effort for store and category managers by **30%**.
- Partnered with retail operations and merchandising teams to gather and document business requirements using **BRD/FRD methodologies**, enabling faster alignment between business users and analytics teams during dashboard and report development.
- Performed pricing and promotion effectiveness analysis using **statistical analysis techniques**, supporting data-backed decisions on discount strategies and helping improve promotional ROI across key product categories.
- Supported UAT execution and business validation using **UAT test scenarios and traceability matrices**, ensuring analytical reports and dashboards met defined business requirements prior to production release.

EDUCATION

SAN JOSE STATE UNIVERSITY

- Master of Science in Applied Data Intelligence

University of Delhi, New Delhi, India

- Bachelor of Science in Computer Science
