EDUCATION

- Master of Science
Technology - Quality Management and Analytics, Illinois State University
- Master of Business Administration,
Finance and Marketing, Hemchandracharya North Gujarat University
- Master of Commerce,
Costing, Auditing, and Accounting, Gujarat University
- Bachelor of Commerce,
Auditing and Accounting, Gujarat University

CERTIFICATION

- Business Information Systems – Data Science (SQL, Python, R), Illinois State University
- Google Data Analytics Certification (BigQuery, Google Sheets, Tableau)

PROJECTS

- Analyzed workers' insurance claims with ETL, uncovering trends using Tableau, and recommended solutions.
- Revenue Cycle Analysis for hospitals with project risk and decision analysis using AnyLogic (Agent-based simulation software) to measure KPIs and remove inefficiencies.
- Built an ERD for a relational database and SQL queries to analyze an online food delivery system and data analysis.
- Reduced baggage loss at American Airlines using root cause analysis and Six Sigma.
- Predicted ALPA stock prices with Python and visualized results.
- Conducted statistical analysis of global investment by the World Bank using R programming.
- Evaluated VR-based teen driver training using surveys, telematic data, Excel, and Power BI
- Developed a reinforcement learning model for AWS DeepRacer using Python
- Completed Google Analytics capstone project on cyclist marketing analytics using BigQuery and Tableau to support marketing strategy.

KEY ACHIEVEMENTS

- Reduced inventory-related costs by 20% in a pharmaceutical supply chain simulation using AnyLogic software. Minimized baggage loss issues for American Airlines by applying Six Sigma methodology and root cause analysis.
- Analyzed over 10,000 rows of compensation claim data using ETL and Tableau, identifying a 35% increase in repetitive injury trends.
- Designed a relational database and wrote 30+ SQL queries to streamline online food delivery system analytics.
- Improved training outcomes in VR-based teen driver education through experimental validation.
- Built a reinforcement learning model in AWS DeepRacer to demonstrate autonomous navigation principles. Completed a Google Analytics capstone case study using BigQuery and Tableau, helping inform strategy for a bike-share company.

EXPERIENCE

Tax Professional & Team Leader, H&R Block, January 2025-Current, USA

- Prepared individual tax returns with accuracy and zero compliance issues.
- Promoted financial services, increasing client uptake through data-informed consultations. Identified
- Maintained 100% adherence to the H&R Block Code of Business Ethics during peak season.
- Lead team, manage schedules, client communication, and office management.

Research Assistant, Illinois State University, January 2024- December 2024, Illinois, USA

- Collected and analyzed data from VR sessions and surveys for simulation studies using Qualtrics and PowerBI.
- Collaborated with three academic departments, improving data analysis.
- Contributed to two university symposiums and one scientific conference presentation.

Technical Analyst, Illinois State University, May 2023-August 2024, Illinois, USA

- Resolved 500+ technical support tickets with a 98% first-call resolution rate using Cherwell.
- Reduced ticket handling time through documentation updates and root cause analysis of issues across various operating systems and applications.
- Supported 1,000+ students, faculty, and staff across multiple systems and platforms.

Sr. Process Trainer, IMS Group, December 2021- December 2022, Gujarat, India

- Developed training documents and curriculum for healthcare staffing agencies from the UK and the US.
- Trained and mentored over 300 employees, increasing Organizational productivity.
- Delivered sessions covering Excel, GDPR, accounting, payroll, US tax software, communication, credit control (Accounts payable) and accounts receivable processes, and other soft skills within a healthcare staffing agency.
- Maintained a 96% satisfaction rate on post-training evaluations.
- Prepared periodic training reports to make data-driven training decisions and presented them to the management.

Process Associate, Ascendum KPS PVT LTD, March 2021- November 2021, Gujarat, India

- Analyzed and prepared year-end UK accounts, ensuring accurate general ledger adjustments, financial reconciliations, and corporate tax returns using QuickBooks, Excel, and other tools.
- Collected, validated, and reported financial data, resolving client queries and ensuring compliance with HMRC regulations.

Admin & HR Executive, Diamond Infinity Pvt. Ltd, May 2020-November 2020, Gujarat, India

- Processed UK accounting and tax filings using QuickBooks, achieving HMRC compliance.
- Managed client communications and financial data collection, resolving queries and enhancing satisfaction.
- Led recruitment efforts by conducting initial interviews and supporting hiring processes.

Software Tester and Training Coordinator, Tax Tech India Pvt Ltd., February 2012- June 2019, Gujarat, India

- Manual software testing and prepared test cases for US tax software.
- Prepared Training curriculum, designed training process using MS Visio, and prepared process documents to be implemented on the SharePoint application.
- Trained over 300 employees, delivered sessions covering Excel, accounting, US taxation and US tax laws, communication, credit control, and other soft skills.
- Collaborated with teams across the organization for training matters.
- Prepared periodic training reports to make data-driven training decisions.

Accounts and Audit Assistance, AGM & Co, July 2010 – February 2012, Gujarat, India

- Managed financial data and accounting operations, recording transactions in Tally, and auditing Indian accounts
