PROFESSIONAL SUMMARY

Senior Data Analyst with 4+ years of experience across banking, e-commerce, and healthcare domains, delivering scalable cloud-based data analytics, data management and enterprise reporting solutions. Strong expertise in SQL-driven data modeling across Snowflake, Amazon Redshift, and Azure Synapse Analytics environments, with hands-on experience in ETL/ELT validation and performance optimization. Proficient in building advanced Power BI semantic models to support operational, financial, and customer analytics. Proven ability to deliver secure, scalable, and high-performance analytics solutions within Agile environments, leveraging HIPAA-aligned data governance practices and CI/CD-enabled production workflows.

TECHNICAL SKILLS

Programming & Query Languages: SQL (Advanced Queries, Window Functions, CTEs, Query Optimization), Python (Pandas, NumPy), DAX (Complex Measures, Context Transition)
Data Warehousing & Databases: Snowflake (Secure Views, RBAC, Clustering), Amazon Redshift, Azure Synapse Analytics
Cloud Platforms: Amazon Web Services (S3), Microsoft Azure (Azure Synapse Analytics, Azure Data Factory)
Data Integration & Processing: ETL/ELT Workflows, Azure Data Factory Pipelines, API-Based Data Ingestion, Data Staging, Schema Validation, Data Quality & Reconciliation Checks
Business Intelligence & Reporting: Power BI (Semantic Modeling, Advanced DAX, Row-Level Security, Incremental Refresh), Tableau, Looker, Executive Dashboards, Data Visualization
Data Modeling & Governance: Fact & Dimension Modeling (Star Schema), Role-Based Access Control (RBAC), PHI Masking, HIPAA-Aligned Data Governance
DevOps, CI/CD & Version Control: Git, GitHub Actions, Jenkins, CI/CD Workflows
Advanced Analytics & Data Science Concepts: Cohort Analysis, Funnel Analysis, A/B Experimentation, Hypothesis Testing, Performance Lift Analysis
Tools & Collaboration: Jupyter Notebooks, Microsoft Excel (PivotTables, Lookup Functions, Advanced Formulas), Confluence, Jira, Rally

EXPERIENCE

Cardinal Health

Feb 2025 - present

Senior Data Analyst

Columbus, Ohio, USA

- Designed and maintained **scalable analytical data models in Snowflake** to support healthcare supply chain, inventory performance, and distribution reporting requirements.
- Managed **secure views and role-based access control (RBAC)** within Snowflake to safeguard sensitive datasets and enforce controlled PHI access.
- Optimized complex **SQL transformations** by reviewing query execution plans and applying clustering strategies to improve performance across high-volume operational datasets.
- Validated **ETL/ELT workflows and AWS S3-staged data loads** into Snowflake, ensuring integrity of API-ingested healthcare datasets prior to production reporting.
- Created **executive-level Power BI dashboards** integrated with Snowflake datasets, reducing report turnaround time by approximately 22% and improving visibility into inventory turnover and fulfillment performance metrics.
- Applied **HIPAA-compliant data governance controls** including PHI masking, access restrictions, and audit-traceable reporting practices across analytical workflows.
- Ensured reliable deployment of analytical models through **CI/CD pipelines**, validating scheduled jobs and confirming production data accuracy using GitHub Actions and Jenkins.
- Enhanced enterprise reporting by consolidating operational datasets into **governed Snowflake models**, improving consistency of supply chain performance analysis.

Myntra Technologies

Sept 2021 – Nov 2023

Data Analyst

Bengaluru, India

- Created curated analytical datasets using **advanced SQL in Azure Synapse Analytics** to support customer retention, conversion, and revenue performance analysis.
- Designed and enhanced **business intelligence dashboards using Power BI and Tableau**, leveraging DAX and calculated fields to track key performance indicators including conversion rate, average order value, repeat purchase rate, and campaign ROI.
- Performed cohort, segmentation, and funnel analysis across large and complex data sets using **SQL window functions and Python** (Pandas, NumPy).
- Conducted statistical analysis of **A/B experiments** for promotional initiatives, assessing performance lift and validating outcomes prior to rollout decisions.

- Optimized SQL queries and transformation logic within **Azure Synapse**, reducing dashboard refresh time by approximately 30% and improving stakeholder accessibility.
- Developed Python automation scripts within **Jupyter Notebooks** to perform data wrangling, cleansing, and exploratory performance analysis.
- Applied advanced **Excel techniques** (PivotTables, lookup functions, nested formulas) to support financial modeling and campaign performance reporting.
- Integrated data validation rules, schema checks, and reconciliation logic within **Azure Data Factory ELT workflows** to ensure reliability of production analytical datasets.
- Collaborated with product and marketing teams to validate metric definitions and support exploratory reporting initiatives using **Looker dashboards** for campaign and customer analytics.

Truist Financial

July 2020 – Aug 2021

Data Analyst

Mumbai, India

- Developed and optimized **SQL queries in Amazon Redshift** to generate weekly operational and regulatory reports for retail banking portfolios.
- Built analytical datasets from **loan and transaction tables** to monitor repayment trends, delinquency ratios, and branch-level performance metrics.
- Designed **Power BI dashboards** to monitor key financial KPIs including loan delinquency ratios, repayment trends, and portfolio aging metrics.
- Performed **data validation and reconciliation checks** (record counts, variance analysis, duplicate detection) across ETL outputs stored in Amazon S3, maintaining high reporting accuracy.
- Automated recurring data preparation tasks using **Python (Pandas)**, reducing manual effort and improving reporting turnaround time.
- Managed analytical deliverables within **Agile workflows (Jira, Rally)**, ensuring timely sprint-based reporting outputs.
- Documented SQL logic, KPI calculation definitions, and data transformation processes in **Confluence** to support reporting consistency and audit traceability.
- Monitored scheduled reporting jobs during deployment cycles using **Jenkins** and validated outputs prior to business release.
- Maintained version-controlled SQL scripts and reporting artifacts using **Git** across development and production environments.

EDUCATION

Cleveland State University

Master's degree in Management Information Systems

Cleveland, OH, USA
