---

## Professional Summary

Junior Data Analyst with a Master's degree in Computational Health Informatics and strong hands-on experience in SQL, Excel, Python, and dashboard development. Experienced in data cleaning, transformation, and visualization to support business decision-making. Proven ability to translate analytical insights into actionable recommendations and collaborate effectively with cross-functional teams across time zones. Currently residing in the United States and legally authorized to work.

---

## Education

### University of Houston

Master of Science, Computational Health Informatics (Dec 2025)

Relevant Coursework:

- Health Data Analytics
- Biomedical Data Mining
- Statistics
- Health Analytics Visualization
- Clinical Decision Support Systems

### Ladoke Akintola University of Technology

Bachelor of Science, Chemical Engineering

---

## Technical Skills

### Data Analysis & Tools

- SQL (data extraction, joins, aggregation, filtering, reporting queries)

- Microsoft Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query, data cleaning)
- Python (Pandas, NumPy, basic data analysis & transformation)
- Tableau & Power BI (dashboard development & KPI visualization)

#### **Other Tools**

- Microsoft Office Suite
  - Google Cloud Platform (basic exposure)
  - REST APIs
  - Git
- 

## **Professional Experience**

### **Mutree Solutions – Automation & Data Analyst Intern (Healthcare IT)**

Remote | Aug 2025 – Dec 2025

- Performed data extraction and transformation tasks using SQL-based logic.
  - Assisted in cleaning and structuring operational datasets to improve reporting accuracy.
  - Built internal dashboards to visualize key metrics and workflow performance.
  - Collaborated with cross-functional teams to translate business needs into technical solutions.
  - Documented workflows and reporting processes to ensure repeatability and clarity.
- 

### **Janeland Networks Global Group Inc. – Business Services & Data Volunteer**

Remote | Jan 2026 – Present

- Clean and analyze operational datasets to support strategic business decisions.
  - Built structured reporting dashboards using Excel and visualization tools.
  - Designed automated workflows to streamline internal reporting processes.
  - Translated business data insights into actionable recommendations for leadership.
  - Worked with teams across different time zones to support operational initiatives.
- 

### **Graduate Assistant – Quality Assurance & Compliance**

Aug 2024 – Jul 2025

- Analyzed performance and compliance data to identify workflow inefficiencies.

- Developed structured reports and dashboards to monitor key metrics.
  - Supported data-driven recommendations to improve operational processes.
- 

## **Academic Projects**

### **Chronic Disease Risk Prediction (Machine Learning Project)**

- Cleaned and preprocessed structured datasets using Python.
- Applied machine learning models to predict risk patterns.
- Evaluated performance metrics and translated findings into business insights.

### **Population Health Dashboard**

- Built interactive dashboards in Tableau/Power BI.
  - Visualized trends, KPIs, and performance metrics.
  - Presented insights to stakeholders with actionable recommendations.
- 

## **Core Competencies**

- Data Cleaning & Transformation
- SQL Querying & Reporting
- Dashboard Development
- Excel-Based Analysis
- Cross-Functional Collaboration
- Insight Translation & Business Recommendations
- Remote Team Communication
- Analytical Problem Solving
