PROFESSIONAL SUMMARY

Business Systems & Data Analyst with 3+ years of experience reviewing, analyzing, and improving business systems and workflows. Proven ability to document business requirements, conduct system and functionality testing, identify system discrepancies, and collaborate with cross-functional teams and vendors to support successful product releases. Strong background in SQL, systems analysis, QA validation, process improvement, and stakeholder communication. Adept at translating business needs into technical specifications aligned with overall organizational strategy.

WORK EXPERIENCE

KLN Advisory Services LLC - Data & Analytics Engineer

Aug 2025 - Present

- Reviewed and analyzed business systems to identify inefficiencies and proposed workflow enhancements aligned with organizational strategy
- Gathered and documented business requirements through stakeholder meetings and cross-functional collaboration
- Designed structured data solutions and reporting systems to support business managers in evaluating operational performance
- Performed functionality testing and validation of data pipelines prior to release, ensuring 97% data accuracy
- Detected, analyzed, and resolved system discrepancies using SQL queries and root cause analysis techniques
- Documented technical specifications and maintained testing documentation to support quality assurance processes
- Coordinated with internal teams to ensure system updates were aligned with business requirements and release timelines

UNT Libraries Administrative Office - Data & Operations Intern (Lead Admin Student Assistant)

Sep 2024 - Dec 2025

- Participated in meetings with business stakeholders to evaluate system revisions and reporting needs
- Documented business requirements and translated them into dashboard and reporting solutions using Power BI and Tableau
- Identified inefficiencies in data collection workflows and implemented automation solutions, reducing manual effort by 15+ hours per week
- Conducted exploratory testing and validation of reporting outputs to ensure alignment with documented specifications
- Created user documentation and training materials to support system enhancements and new reporting tools
- Tracked project progress using structured documentation including meeting notes, reporting logs, and issue tracking mechanisms
- Provided end-user support and trained team members on system functionality and reporting tools

Airbus Group India Private Limited - Associate Systems Engineer

Aug 2022 - Dec 2023

- Analyzed HRIS and enterprise systems serving 5,000+ users, identifying performance bottlenecks and improving query performance by 40%
- Assisted in maintaining interfaces between internal systems and external tools through database monitoring and validation
- Conducted system testing and version update validation before production release to ensure compliance with functional specifications
- Detected and resolved 100+ system errors using structured root cause analysis and issue tracking via ServiceNow
- Collaborated with cross-functional teams to ensure business requirements were accurately reflected in system updates
- Maintained documentation of system changes, testing results, and corrective actions to support quality standards
- Supported end users by troubleshooting software issues and ensuring timely resolution

SKILLS

Programming Languages: Python (Pandas, NumPy, Matplotlib, Seaborn, scikit-learn), SQL, JavaScript, PHP, HTML, CSS, JS

Database Technologies: SQL Databases (PostgreSQL, MySQL, MS SQL Server), NoSQL Databases, Data Warehousing

Cloud & Data Platforms: AWS (S3, Cloud Infrastructure), Snowflake, Google Cloud Platform, BigQuery, Azure Data Factory

Data Analysis & Visualization: Power BI (DAX, Power Query), Tableau, Looker Studio, Data Visualization, Statistical Analysis, Regression, Clustering, A/B Analysis, KPI Reporting, Business Metrics, Operational Reporting

Data Engineering: ETL Pipeline Development, Data Pipeline Optimization, Data Preprocessing, Data Quality Validation

Additional Skills: Advanced Excel (Pivot Tables, VLOOKUP, Complex Formulas, VBA Macros), Git/GitHub, Agile Methodologies, ServiceNow, Jira, Process Automation

Systems & Analysis: Business Requirements Documentation, Workflow Mapping, Gap Analysis, QA Testing, User Acceptance Testing Support

Certifications: Complete Data Analyst Bootcamp (Udemy), Microsoft Power BI Desktop for Business Intelligence (Udemy)

EDUCATION

University of North Texas, TX

Master of Science - Data Science (Mary D. Walsh Endowed Scholar)

Dec 2025

GPA: 4.0
