PROFESSIONAL SUMMARY

Computer Science Master's student (expected June 2026) with hands-on experience building **Java backend applications, REST APIs, and Spring Boot microservices**. Solid foundation in **OOP principles, SQL relational databases, unit testing, and Agile development practices**. Passionate about learning and contributing to production-grade systems with maintainable and reliable code.

EDUCATION

Santa Clara University

Master of Science in Computer Science

Santa Clara, CA

Expected June 2026

EXPERIENCE

Software Developer

Oct 2025 – Present

Frugal Innovation Hub, Santa Clara University

- Developed **Java Spring Boot backend services** supporting structured data workflows and API endpoints.
- Wrote unit tests and applied code reviews to ensure maintainable and error-free implementations.
- Collaborated with team members in Agile sprints to deliver incremental, reliable software.

Software Engineer Intern

Jun 2025 – Sep 2025

Fiery, Fremont, CA

- Contributed to enterprise Java applications, implementing backend features and bug fixes.
- Worked with SQL databases to support backend data storage and retrieval.
- Participated in debugging, testing, and deployment under senior developer guidance.

Software Development Engineer

Jul 2023 – Jul 2024

TechJyot

- Built **Java Spring Boot microservices** for warehouse management, including REST API endpoints.
- Designed and optimized SQL queries to improve data accuracy and performance.
- Collaborated with front-end components using React to deliver integrated solutions.
- Ensured code reliability through systematic testing and debugging.

TECHNICAL PROJECTS

Sales Management Platform ([Link](#)) | *Java, Spring Boot, React, PostgreSQL*

Jan 2024 – Present

- Developed backend microservices handling orders, suppliers, and tax calculations, exposing REST APIs for frontend integration.
- Applied unit testing and debugging to ensure reliability and maintainable code.

Amazon Clone

React, Node.js, Firebase Oct 2023 – Nov 2023

- Built full-stack features including authentication, checkout flows, and persistent storage.
- Focused on modular design, readability, and maintainability of code.

TECHNICAL SKILLS

Languages: Java (11+), Python, JavaScript, SQL, C/C++, Kotlin, Go

Frameworks: Spring Boot, Spring Framework, React, Node.js, JPA/Hibernate

Databases: MySQL, PostgreSQL, Oracle, Firestore, NoSQL

Practices: Object-Oriented Design, Unit Testing (JUnit), Debugging, Agile/Scrum

LEADERSHIP EXPERIENCE

International Student Leadership Conference

Aug 2019

Panelist

- Presented to **500+ attendees**, showcasing analytical thinking, communication, and collaboration skills.
