

FORAM TRIVEDI

Boston, MA | (857) 465-0315 | foramrajutrivedi@gmail.com | [linkedin.com/in/foramtrivedi25](https://www.linkedin.com/in/foramtrivedi25) | github.com/trivedif

SUMMARY

Software Engineer with experience in full-stack development using Java, React, Next.js, TypeScript, and Node.js. Skilled in designing scalable systems, debugging complex issues, and optimizing performance. Experienced in automated testing, CI/CD, and cloud-native deployments for reliable software delivery.

TECHNICAL SKILLS

Languages & Databases: Java, Python, JavaScript, TypeScript, Go, C++ , SQL, PostgreSQL, MongoDB, MySQL
Frameworks & Libraries: React, Next.js, Node.js, Express.js, Redux, HTML/CSS, REST APIs, JUnit, PyTest
Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Kafka, GCP, Azure
Tools & Platforms: Git, GitHub, Postman, JIRA, Confluence, Unix/Linux, Splunk, Figma, Framer, Maven, Gradle
Core Concepts: Object-Oriented Design, Distributed Systems, System Design, CI/CD, TDD, Agile, Design Patterns

EXPERIENCE

Software Engineer | Crest Data Systems | Ahmedabad, India **May 2021 - Nov 2022**

- Designed and deployed scalable **Go-based ingestion pipeline** for **Cloud Foundry Firehose API**, increasing log throughput by **30%** and enabling structured onboarding for cloud-native systems
- Implemented **OpenTelemetry**-based observability module with **14+ real-time key metrics** enhancing fault isolation, SLA compliance, and debugging in production environments
- Automated **Helm-based** infrastructure on **AWS** using **Kubernetes, Docker, and Terraform**, reducing release time by **40%** and ensuring consistent, production-grade deployments
- Refactored **CI/CD pipelines** using **GitHub Actions and Terraform**, reducing build failures by **25%** and integrating automated test suites to improve release reliability
- Led **5+ Agile release cycles** for **OpenTelemetry and Kafka** connectors, collaborating cross-functionally on production features, performance optimizations, and code reviews
- Enhanced Kafka Connect's **SplunkSinkConnector** using **Java** to support **Protobuf serialization** improving system resilience, schema compatibility, and fault handling

Software Engineer Intern | Crest Data Systems | Ahmedabad, India **Dec 2020 - May 2021**

- Enhanced **Splunk Apps and Add-ons** by building modular inputs, search commands, and field extractors for improved data onboarding, indexing efficiency, and operational searchability
- Refactored **Python-based** Splunk data pipelines using multiprocessing and **PyTest**, reducing query latency by **25%** and increasing test automation coverage by **30%**

PROJECTS

AI-Powered Text-to-Image Generation | Latent Diffusion, PyTorch, CLIP, VAE, U-Net **Nov 2024 - Dec 2024**

- Built a text-to-image generation pipeline using **Latent Diffusion, VAE, UNet, and schedulers** to synthesize images from natural language prompts on **Flickr30k (31K+ images, 158K+ captions)**
- Fine-tuned **OpenAI CLIP embeddings** and applied **NLP-based semantic evaluation** to improve image-caption alignment by **18%**; performed EDA to optimize multimodal input conditioning

Hurricane Intensity Analysis | Python, Pandas, TensorFlow, Matplotlib, Seaborn **Oct 2024 - Dec 2024**

- Analyzed **60+ years of NOAA hurricane data** to model atmospheric pressure vs. wind speed trends using **linear regression, EDA, and statistical inference**
- Visualized storm data using **Seaborn and Matplotlib** to predict seasonal trends and category-level intensities

Food For All | React, TypeScript, JavaScript, Redux, SCSS, MongoDB, Node.js, Express.js **Mar 2024 - Apr 2024**

- Developed full-stack donation platform using **React, TypeScript, and Redux** with modular architecture and reusable components; ensured responsive UI and high-performance API integrations
- Integrated **10+ RESTful APIs** using **Node.js, Express, and MongoDB**; implemented async data fetching, debounced geolocation, and dynamic **Google Maps API** rendering for real-time food bank locator

Day Care System | Java, Swing, Design Patterns, MVC Architecture **Nov 2023 - Dec 2023**

- Built a scalable Java Swing GUI application using **MVC architecture, OOP principles, and design patterns** to streamline data management and enhance user experience
- Applied **interface-driven design** and best coding practices to improve code modularity, scalability, and extensibility

EDUCATION

Master of Science in Software Engineering Systems **Sept 2023 - May 2025**

Northeastern University, Boston, USA

Bachelor of Technology in Information Technology **July 2017 - May 2021**

Dharmsinh Desai University, Nadiad, India
