Overland Park, KS | 66213

Objective

Dedicated and results-driven cybersecurity professional with over two years of experience in mainframe security, incident response, and risk management. Currently pursuing a Master of Science in Cybersecurity and Information Assurance, with strong technical expertise in cloud computing, VAPT, firewall management, and regulatory compliance. Proven ability to design and implement security strategies for enterprise systems, manage incident responses, and secure data transfers in complex environments. Recognized for exemplary performance, teamwork, and commitment to improving organizational security postures. Actively seeking opportunities to contribute to security initiatives and drive compliance with industry standards.

Education

University of Central Missouri, Lee's Summit, MO	Aug 2023 - May 2025
Master of Science in Cybersecurity and Information Assurance	3.5/4.00 GPA
Related courses: Computer Networking, Penetration Testing, Threat Intelligence, Incident Response.	

Geethanjali College of Engineering and Technology, Hyderabad, India	Sep 2018 – May 2021
Bachelors of Technology in Electronics and Communication Engineering	3.1/4.00 GPA
Related courses: VLSI Design, Embedded Systems, Computer Architecture, IoT Security.	

Technical Skills

- **Firewall/ADC:** Palo Alto (IDS, IPS), Fortinet, Sophos, F5 BIG-IP VPN, CISCO VPN. Managing Firewalls and Application Delivery Controllers for network security and performance optimization.
- **Languages/Libraries:** Python, Scapy, C#, OOPS, Java, Linux Shell scripting basics.
- **Protocols:** TCP/IP, HTTP/HTTPS, FTP, SFTP, Telnet 3270, ISPF, XCOM, RACF, SSL, DNS, DHCP, IPsec and SSL
- **VAPT Tools:** Metasploit, Nessus and Qualys, Burp Suite, Metasploit
- **Other Skills/Tools:** SIEM, Jira, Wireshark, Nmap, Solar winds, ServiceNow, Putty, Network monitoring tools, Security Information and Event Management (SIEM), Agile Mythology
- **Computer Skills:** Word-Processing, Spreadsheet, Presentation.
- **Operating System:** Windows, Linux and MacOS
- **Security Requirements:** PCI, HIPAA, NIST standards
- **IBM-MAINFRAMES: Tools** – CA7, COBOL, JCL, SDSF, TSO, ISPF, DATABASE DB2.

Projects

Smart Garbage Monitoring and Air Pollution Controlling System: Published paper about this project in “IAEME Publications”.

Designed and implemented a Smart Garbage Monitoring and Air Pollution Controlling System to monitor garbage levels and detect harmful gases, aimed at keeping urban environments clean, odor-free, and free of hazardous air pollutants. The system utilized IoT sensors for real-time data collection, an Arduino for managing the system, and GSM modules for transmitting data to a central server. Data analysis was employed to predict overflow and potential air quality issues. An article detailing the project was published in IAEME Publications.

MobileNets: Efficient Convolutional Neural Networks for Mobile Vision Applications

Developed and optimized a lightweight convolutional neural network model for mobile vision applications, focusing on efficiency and performance. Implemented MobileNets architecture to enable real-time image classification with minimal computational resources, suitable for mobile devices.

Skills & Technologies: Convolutional Neural Networks (CNN), Python, TensorFlow, Keras, MobileNets architecture, Image Processing, Deep Learning, Model Optimization, Edge Computing.

Incident Response for IoT Devices: Challenges and Strategies

Researched and addressed the unique challenges of incident response in IoT environments. Proposed strategies for mitigating IoT-specific vulnerabilities, focusing on improving response times and minimizing the attack surface of connected devices.

Skills & Technologies: IoT Security, Incident Response, Threat Intelligence, Python, Network Protocols (MQTT, CoAP), Forensics, Vulnerability Assessment, Penetration Testing, Risk Mitigation Strategies.

Risk Management in Cyber Security

Developed a comprehensive risk management framework to identify, assess, and mitigate cyber threats in enterprise environments. Conducted risk assessments, gap analyses, and implemented security controls to align with industry standards such as ISO 27001.

Skills & Technologies: Cyber Risk Management, Risk Assessment Frameworks (ISO 27001, NIST), Gap Analysis, Threat Modeling, Compliance Audits, Governance, Risk, and Compliance (GRC) tools, Vulnerability Management.

End to End Web Application Building Using AWS Cloud

Designed and built a full-stack web application leveraging AWS services such as EC2, S3, RDS, and Lambda. Managed deployment and scaling using AWS CloudFormation and implemented security best practices like IAM roles and security groups.

Skills & Technologies: AWS Services (EC2, S3, RDS, Lambda, CloudFormation), Full-stack Development, Python, JavaScript, Flask/Django, AWS IAM, AWS Security Groups, Continuous Integration/Continuous Deployment (CI/CD).

Cybersecurity Policies and Risk Management

Drafted and implemented cybersecurity policies to enforce regulatory compliance and enhance the organization's security posture. Created a risk management strategy to proactively identify and mitigate potential cyber threats, aligning with frameworks like NIST 800-53 and CIS.

Skills & Technologies: Cybersecurity Policy Drafting, Risk Management, Governance Frameworks (NIST, CIS), Compliance Management (SOX, PCI-DSS), Security Audits, Security Information and Event Management (SIEM), Threat Intelligence Tools.

EXPERIENCE

DXC Technology Pvt.Ltd, Hyderabad, India

[July 2021 – July 2023]

Associate Software Professional Engineer (Mainframe Security Analyst)

Client: Xerox IT Corporation Pvt. Ltd

Responsibilities:

- Participated in the full Waterfall software development lifecycle including design, coding, testing, and documentation, ensuring security integration throughout the process.
- Monitored and managed security for mainframe environments, ensuring compliance with organizational policies and industry regulations.
- Administered access control systems using IBM RACF, CA ACF2, and Top Secret to manage user roles, permissions, and access rights.
- Conducted peer reviews of code changes, addressed defects, and provided support until the module was released into production.
- Conducted security audits and vulnerability assessments to identify and mitigate risks across mainframe systems.
- Implemented and enforced encryption standards for securing data at rest and in transit using IBM z/OS Encryption Facility and Hardware Security Modules (HSM).
- Investigated and resolved security incidents, collaborating with cross-functional teams to implement corrective measures.
- Supported multi-factor authentication (MFA) integration and identity management using tools like IBM MFA for z/OS and LDAP.
- Created Unit Test Cases documentation and communicated with customers to fulfill both development and security requirements.
- Managed FTP, SFTP, and XCOM file transfers securely.
- Prepared and delivered security reports for compliance with SOX, PCI-DSS, and other regulatory standards.

- Designed and implemented enhanced mainframe security protocols, improving system protection and reducing unauthorized access events.
- Worked closely with cross-functional teams to create automated security monitoring solutions, minimizing the need for manual intervention.
- Guided and trained junior team members on best practices in security and mainframe system management, enhancing overall team performance.
- Engaged in security breach drills (red/blue team exercises), identifying vulnerabilities and developing strategies to counter potential threats.
- Improved system performance by leveraging advanced RACF capabilities and integrating real-time security monitoring systems, enhancing system response times and logging accuracy.
- Spearheaded a project to automate routine security processes, reducing human errors and increasing operational efficiency through custom scripts and automation technology.

CERTIFICATION

• CISCO Introduction to Cybersecurity	2024
• Microsoft Azure Fundamentals – AZ 900	2020
• Oracle Cloud Infrastructure Certified Foundations Associate	2024
• "Cybersecurity Bootcamp on Wazuh, Wireshark, OpenVAS	2024
• Pursuing CompTIA Security + and Network +	

ACHIEVEMENTS AND AWARDS

• Achieved Collaborators Award from DXC Technology for being a great team player	2023
• Achieved Q3-Champ Award from DXC Technology for exemplary performance.	2023
• CRS (Cybersecurity and Risk Services) Highflyer at DXC Technology	2022
• Board member – The Electronics club, GCET college, India	2019-2020
• Tuition Waiver Grant by State of Telangana, India	2018-2021
