

Haider Mustafa Rauf

Allston, MA | 617-208-9232 | haidermr@bu.edu | www.linkedin.com/in/haider-mustafa-rauf-8a0884276/

Master of Public Health graduate with a clinical background and a strong commitment to advancing health equity. Experienced in patient care, clinical research coordination, and data analysis using SAS and R. Skilled in protocol adherence, data management, and cross-functional collaboration to support evidence-based public health initiatives.

EDUCATION

Boston University School of Public Health, Boston, MA May 2025
Master of Public Health in Epidemiology & Biostatistics
GPA: 3.90

CMH Lahore Medical College & Institute of Dentistry, Lahore, Pakistan. December 2021
Bachelor of Dental Surgery (BDS)
GPA: 3.93

SKILLS & CERTIFICATIONS

Software: SAS, R Studio, EPIC, Microsoft Office Suite, Zotero, EndNote, QGIS, ArcGIS
Data Analysis: Proficient in Regression Analysis, Survival Analysis, Longitudinal Analysis, ANOVA, Data Visualization
Data Collection: REDCAP, Google Forms, Qualtrics, Excel
Clinical Research: Clinical Study Protocols, IRB Protocols, Survey Design, Patient Recruitment, Systematic Literature Reviews, Grant Writing, Patient Database Management
Languages: English, Urdu
Certification: CITI Program **HIPAA** and Research Data Security, CITI Medical Campus Biomedical Researchers, CITI Good Clinical Practice (GCP) Biomedical Course, CITI Community-Engaged Research

EXPERIENCE

Boston University School of Public Health, Boston, MA
Center for Trauma and Mental Health Fellowship Jan 2025 - May 2025

- Conducted literature reviews on the epidemiology and mental health impacts of racism in SWANA communities.
- Collaborated with senior researchers to assist in manuscript development and quantitative data analysis.
- Prepared research reports and presentations for conferences and faculty meetings.

Project Coordinator in Fairer Partnerships in Global Health July 2024 - May 2025

- Managed scheduling, communications, and documentation for initiatives promoting equity in global health research.
- Drafted literature-informed research reports to support the decolonization of global health education & research.
- Led the development of a student-centered decolonization toolkit in partnership with faculty and student collaborators.
- Maintained compliance and regulatory documentation to support ethical, community-driven project goals.

Justice, Equity, Diversity, and Inclusion (JEDI) Fellowship Oct 2023 - May 2024

- Worked with the Department of Education to integrate equity principles into education and research methods.
- Evaluated and proposed equity-focused improvements for 2+ educational modules; presented findings to faculty.
- Audited and revised 5+ course materials to include underrepresented perspectives & ensure inclusive content modules.

Boston Children's Hospital, Boston, MA July 2024 - Dec 2024
Analyst Intern in the Psychiatry Quality Program

- Developed a statistical report to address disparities in psychiatric care among male children in emergency settings.
- Collaborated on study design, protocol development, IRB Submission, and data-driven improvement in patient care.
- Worked with cross-functional teams to execute study protocol, maintain documentation and improve reporting.
- Managed patient recruitment for research study via EPIC, ensuring data accuracy and HIPAA compliance.
- Handled clinical data entry into REDCap using EPIC records, ensuring HIPAA compliance and data integrity.
- Conducted statistical analysis using SAS & R, informing data-driven strategies for quality improvement in care.
- Co-authored a manuscript and developed a poster, facilitating the dissemination of research findings.

CMH Lahore Medical College & Institute of Dentistry, Lahore, Pakistan. July 2022 - June 2023
General Dentist

- Delivered comprehensive dental care, customizing treatment based on patient needs and public health context.
- Contributed to research by collecting and managing clinical data for epidemiological studies on oral health.
- Supervised clinical documentation and operations for over 1,000+ outpatient cases in a high-volume setting.
- Collected and processed biological (Saliva, Blood etc.) specimens for research, ensuring proper handling and labelling.

RELEVANT ACADEMIC PROJECTS

Data Analysis Projects:

Culminating Experience in R:

“Association between Bullying Victimization and Suicidal Thoughts and Behaviors among High School Students”

- Utilized R Studio to explore the correlation between experiences of bullying and suicidal thoughts and behaviours among high school students using the Youth Risk Behavior Surveillance System (YRBSS).
- Applied descriptive statistics and logistic regression models, adjusting for confounding, to draw meaningful conclusions about the exposure-outcome relationships.

Culminating Experience in SAS:

Association between Sexual Orientation and Mental Health: An Analysis of BRFSS Dataset

- Utilized SAS to analyze data from the Behavioral Risk Factor Surveillance System (BRFSS) to examine the association between sexual orientation and mental health outcomes.
- Managed the dataset by reading raw files, sub-setting data, creating new variables, and recoding values.
- Applied a range of statistical methods, including descriptive statistics, t-tests, chi-square tests, linear and logistic regression, and ANOVA, to explore differences in mental health indicators across sexual orientation groups.

Analysis of Myocardial Infarction Survivors and Randomized Clinical Trial on Blood Pressure Treatments

- Utilized SAS to manage and analyze data from a cohort study of 200 myocardial infarction survivors and a randomized clinical trial evaluating three treatments on systolic blood pressure.
- Performed advanced data management tasks including data transformation, variable creation, array and do-loop programming, macro construction, and merging datasets.
- Applied descriptive Statistics, longitudinal analysis, ANOVA, ANCOVA, and survival analysis to assess treatment effects and outcomes over time.

Efficacy of Budesonide and Nedocromil in Pediatric Asthma: A Randomized Clinical Trial Analysis

- Utilized SAS to manage and analyze data from a Phase III randomized clinical trial evaluating asthma treatments in children.
- Conducted data cleaning, treatment group randomization, and variable derivation.
- Applied ANOVA, multiple linear regression, logistic regression, and survival analysis to assess treatment effects on lung function, improvement likelihood, and time to pulmonary obstruction.

Impact of Digoxin on Myocardial Infarction Risk in Heart Failure Patients with Diabetes: A Secondary Analysis of the DIG Trial dataset

- Analyzed DIG Phase III RCT data using SAS to evaluate whether diabetes modifies the effect of digoxin on myocardial infarction (MI) risk in heart failure patients.
- Cleaned and merged datasets, categorized exposures (diabetes status, treatment group), and derived time-to-event outcomes.
- Performed Kaplan-Meier survival analysis and Cox proportional hazards modelling with interaction terms to assess differential MI risk.

Clinical Trial Protocol: Evaluating Sofosbuvir for Secondary Dengue Infection

- Co-authored a clinical trial protocol investigating the efficacy of sofosbuvir in treating secondary dengue infection.
- Conducted an extensive literature review and contributed to drafting key protocol elements, including study objectives, recruitment strategy, inclusion/exclusion criteria, primary and secondary endpoints, and statistical analysis plan.
- Ensured protocol compliance with ethical standards, IRB requirements, and GCP/ICH guidelines.

PUBLICATIONS & POSTERS

HM Rauf, C Wamuo, DA Carlsen-Landy, VS Nguyen, A Trehan, K Kaufman, EJ Campbell, EL Cardeli, PI Ibeziako. (2025). What about the boys? Understanding male youth who present with mental health emergencies. Department of Psychiatry & Behavioral Sciences, Boston Children’s Hospital, Harvard Medical School. Poster presented at the Harvard Psychiatry Research Day and Mysell Lecture, Boston, MA

Psychometric Properties of the Trauma Symptoms of Discrimination Scale Among Southwest Asian and North African University Students. **(Paper In Preparation)**
