EDUCATION

Rutgers University, School of Arts and Sciences

New Brunswick, NJ

B.S. Computer Science | GPA: 4.0 | Honors: Summa cum laude

May 2024

EXPERIENCE

Transformity (YC S23)

New York City, NY

Software Engineer Intern

May 2024 – December 2024

- Boosted SaaS engagement by 50% by building a cross-platform liquor store POS mobile app with React Native, Expo, and TypeScript, expanding platform accessibility affecting 60+ stores and thousands of customers
- Optimized app performance with pagination, debouncing, and async storage caching, reducing load times by 20%
- Used CI/CD pipelines to create, test, deploy, and maintain RESTful APIs developed with Java, SQL, and Spring Boot, introducing 3 new features and resolving critical bugs
- Collaborated with 3 teams to align mobile and backend development, enhancing backend integration and supporting business-driven feature releases
- Automated end-to-end testing with Playwright for 5 features, strengthening release reliability and catching critical bugs earlier in the development cycle

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL, TypeScript, C++

Certifications: AWS Certified Cloud Practitioner, AT&T 2025 Technology Academy

Frameworks/Tools: React Native, React, Spring Boot, Next.js, MongoDB, MySQL, HTML, CSS, Git/GitHub, Agile/Scrum, Linear, Swagger/OpenAPI, Firebase, Playwright, Tamagui, Native Wind, Expo, React Native Reusables

PROJECTS

Smart File Organizer | C++, Qt

January 2026 – Current

- Engineered a cross-platform file organization tool using C++17 and std::filesystem, capable of processing 1,000+ files per directory with O(1) category lookup via hash-based grouping
- Implemented a complete undo system using stack-based operation tracking, enabling rollback of 100% of file moves with automatic empty directory cleanup
- Built extensible categorization engine supporting 40+ file extensions across 6 categories (Documents, Images, Audio, Video, Code, Archives) with collision detection and hidden/system file filtering

AI Market Intelligence Engine | Java, Spring Boot, PostgreSQL, Docker, Ollama

November 2025 – Current

- Built a layered Spring Boot application (controller/service/repository) that scrapes Reddit posts and identifies actionable business pain points
- Integrated Ollama LLM via WebClient, designing an optimized classification pipeline that uses fast heuristic pre-filtering to minimize expensive LLM calls
- Implemented persistence with Spring Data JPA and PostgreSQL, utilizing unique constraints, entity relationships, and indexed schema generation for efficient duplicate detection

COMMUNITY & LEADERSHIP

BAPS Swaminarayan Temple

Robbinsville, NJ

Youth Activities Organizer

September 2016 – Present

- Guided a team of high school students to conduct weekly religious seminars for 20-30 youths, focusing on instilling traditional Hindu and BAPS values as a moral foundation
- Facilitated events for over 400 youths, such as Kids' Diwali Celebration and Youth Sporting Events
- Coordinated with 4-5 departments to plan and execute community activities encouraging youth involvement

Akshardham Operations

Robbinsville, NJ

Project Manager

May 2022 – August 2023

- Led a team of 10 volunteers in conducting safety inspections of a construction site, identifying and mitigating 1000+ potential hazards to ensure a safe working environment
- Trained groups of volunteers of different backgrounds biweekly on proper equipment usage and worksite hazards, reducing minor injuries by 50%
- Developed and managed inspection schedules, task assignments, and follow-up timelines, ensuring on-time completion of 100% of corrective actions
- Created and maintained hazard logs, compliance reports, and training records, improving audit readiness and reducing inspection preparation time by 30%
