(326) 203-8800

Dayton, OH, 45420

Data-driven professional with 4 years of experience building scalable data pipelines, dashboards, and analytics solutions, transforming complex datasets into actionable insights. Skilled in partnering with cross-functional teams to drive data-informed decision-making.

Work Experience

PetSmart | Data Engineer (Remote)

May 2023 - Dec 2025

- Developed real-time dashboards (QuickSight) for tracking customer engagement metrics (app usage, clicks, conversions), resulting in an **11% improvement in in-stock rates** and supporting marketing strategies.
- Integrated customer engagement data (clicks, purchase behavior) from loyalty programs and transactional databases, contributing to a **20% increase in customer lifetime value (CLV)** prediction.
- Built an A/B testing pipeline to track the effectiveness of personalized marketing strategies, including in-app promotions, improving **customer retention by 15%**.
- Automated reporting and data quality workflows (Databricks, SQL) to provide more timely and accurate insights, **reducing reporting time by 75%** and improving the speed of marketing decisions.
- Implemented data cleaning and transformation pipelines (SQL, Python) to handle missing data using imputation techniques, ensuring accurate analytics for marketing campaigns.
- Developed slowly changing dimension (SCD) processes to track customer behavior over time, while maintaining idempotency in the ETL pipeline to ensure consistent and reliable data across all workflows.

Mindtree | Data Engineer

Jul 2020 - Aug 2022

- Automated healthcare claims document verification using Google Cloud Vision API and ML models (OCR, classification, clustering), achieving **97% data extraction accuracy**, improving claims efficiency by 40%, and reducing manual effort by 80%.
- Designed self-service Power BI and Excel dashboards to support hypothesis testing of healthcare claim processing workflows, accelerating reporting cycles by 15% and increasing analytics adoption.
- Contributed to **\$1.2M in operational savings** by deploying machine learning solutions that reduced claims identification times and optimized healthcare data workflows.
- Partnered with cross-functional teams to define data requirements and improve model quality, cutting downstream analytics errors by 20% and improving trust in insights.

Projects

Real-Time Data Pipeline - Databricks Delta Live Tables

- Built real-time ETL pipelines using Databricks DLT, PySpark, and SQL within a Medallion Architecture.
- Implemented streaming + incremental ingestion with SCD Type 2 and validation rules for reliable analytics data.
- Delivered real-time insights to marketing insights via QuickSight dashboards (engagement, conversions, campaign metrics).

Sales & Customer Insights Dashboards - Tableau

- Designed interactive Tableau dashboards for sales performance and customer segmentation.
- Built KPI views (YoY sales, product profitability, customer engagement with real-time data integration to reduce reporting lag).
- Enabled self-service analytics for stakeholders through dynamic filtering, trend analysis and customer tracking.

Core Skills

Programming Languages: Python (NumPy, Pandas, PySpark), SQL (MySQL, PostgreSQL)

Cloud & Data Platforms: AWS (S3, RDS, Redshift, EC2), GCP, Azure, Databricks, DBT, Apache Spark, Snowflake

Visualization Tools: Tableau, Power BI, QuickSight, Excel (Advanced), Matplotlib

Statistics & ML: Regression, Classification, Clustering, A/B Testing, Statistical Analysis

Other Skills: Data Modeling, Data Warehousing, CI/CD, Git, Jira

Education

Master of Science in Computers - University of Dayton, GPA: 3.95

Aug 2022 - May 2024

Bachelors Computer Engineering - University of Mumbai

Jun 2017 - Aug 2021
