

Juhi Bhatt

Business Analyst

Green Card | (551) 260-6541 | juhi.b@jobstechmail.com | NJ, USA | [LinkedIn](#)

SUMMARY

Results-driven Business Analyst with 3+ years of experience in translating complex business needs into scalable technical solutions. Skilled at leveraging Agile frameworks, SQL, and BI tools (Tableau, Power BI) to automate workflows, streamline stakeholder collaboration, and deliver data-driven insights. Proficient in reducing operational inefficiencies, enhancing system adoption, and aligning cross-functional teams through actionable requirements documentation. Experienced in process modeling, risk mitigation, and UAT leadership to drive measurable business value.

SKILLS

Methodologies & Frameworks: Agile (Scrum, Kanban), SDLC, UML Modeling

Database Management and Data Analysis: MySQL, SQL Server Reporting Services (SSRS)

Data Visualization & Analysis: Python, SQL, Tableau, Power BI, Excel (Pivot Tables, PowerQuery)

Project Management: Jira, Confluence, MS Project, MS Visio, Lucidchart

Cloud Platforms: AWS, Azure DevOps

Business Analysis: Requirements Gathering (Workshops, Surveys, Document Analysis, JAD Sessions, Interviews, Prototyping), FRD/BRD Documentation, UAT Testing, User Stories & Use Case Development, Process Modeling (BPMN, UML diagrams, Flowcharts), Traceability Matrix, Change Management, Quality Assurance, Test Planning & Execution (Test Cases, Test Plans)

Analytical Techniques: Cost-benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis, Root Cause Analysis, Regression Analysis, Predictive Analysis, Budget Analysis, Financial Modeling

EXPERIENCE

Business Analyst, Freddie Mac, USA

June 2023 – Present

- Discovered \$1.2M revenue opportunities by analyzing 500K+ customer records using **SQL** and **Excel**, then created 15 **Power BI** dashboards that gave executives clear data insights.
- Transformed mortgage application process by implementing **Agile Scrum** methodology across 5 departments, cutting customer wait times by 30% and boosting satisfaction scores from 3.2 to 4.1.
- Eliminated 3-day reporting delays by building **Power BI** dashboards with real-time data connections, enabling executives to access critical business reports instantly for faster decision-making.
- Led system upgrade project by writing detailed **BRDs/SRDs** in **Confluence**, interviewing **stakeholders**, and achieving 95% approval while preventing \$300K in unnecessary project costs.
- Improved team collaboration by creating visual workflows in **Visio** and running **JAD** workshops, solving communication problems that previously caused 40% of project delays.
- Managed feature development using **JIRA** balancing competing requests from 12+ stakeholders while improving on-time delivery.
- Streamlined loan approval process through detailed analysis and requirements workshops with 12+ staff members, creating solutions that increased processing speed by 22% company-wide.

Business Analyst, Citus Infotech, INDIA

July 2021 – April 2023

- Improved fraud detection accuracy by analyzing transaction patterns using **Python** and **pandas**, documenting business requirements that helped development teams reduce false alerts by 25%.
- Enhanced project coordination through Kanban boards in **Azure DevOps** and comprehensive documentation, standardizing delivery processes that improved team efficiency across 8+ projects.
- Optimized trading workflows by mapping 15+ business processes in **Lucidchart**, identifying automation opportunities that reduced manual processing time by 35% and eliminated costly errors.
- Enabled faster decision-making by creating **Tableau** dashboards with real-time market data feeds, providing executives clear visibility into portfolio performance during volatile periods.
- Led system **requirements gathering** through 25+ **stakeholder** workshops using facilitation techniques, documenting functional specifications that guided development of improved fraud detection capabilities reducing false positives.
- Prevented development delays by creating detailed **user stories** and wireframes in Balsamiq, conducting **gap analysis** that eliminated 30+ potential rework scenarios during portfolio app development.
- Achieved successful system rollout by coordinating **UAT** activities and creating user guides, training 50+ financial analysts which resulted in 90% adoption rate for forecasting tools.

EDUCATION

Bachelor of Engineering in Computer Engineering, Gandhinagar Institute of Technology, India

June 2021

CERTIFICATIONS

- **SQL for Data Analysis** – Udemy/Coursera
- **Power BI Data Analyst Associate** – Microsoft
- **Web Applications for Everybody Specialization**
- **Getting Started with AWS Machine Learning (Coursera)**
