

Professional Summary

Software engineer with two years of experience, currently pursuing a master's in computer science to improve web development skills. Passionate about learning and creating innovative applications.

Technical Skills:

- **Programming & Databases:** C#, JavaScript, TypeScript, Microsoft SQL Server, SQL Query Design
- **Frontend:** HTML5, CSS3, Angular, React.js
- **Backend:** ASP.NET, .NET Core, .NET Framework, .NET Web Forms, RESTful APIs, Swagger
- **Developer Tools:** Git, Visual Studio, VS Code, Postman
- **Project Management and methodologies:** Jira, Agile (Scrum)
- **Testing:** Manual Testing, Black Box Testing, SQL Testing

Work Experience

Software Engineer | NTT DATA, Hyderabad, India.

12/2021 – 12/2023

- Developed server-side logic using C#, creating RESTful APIs for smooth communication between the frontend and database.
- Focused on front-end development with Angular, including building reusable components, managing data binding, handling routing, and ensuring a smooth, responsive UI.
- Worked with the team to improve data handling by developing features for editing and generating data extracts.
- Used Jira for ticketing and task tracking, ensuring streamlined project management and efficient issue resolution.
- Conducted application testing after development, identifying and fixing bugs to improve performance, usability, and stability.
- Conducted Manual and Black Box Testing, validating API functionality and system reliability.
- Tested APIs using Postman and Swagger for API validation and documentation.

Key Projects:

Krunchbox Application (Retail Business Intelligence):

- Enhanced a business intelligence platform providing retailers with detailed sales and stock insights.
- Worked on frontend-backend API integration (GET/POST calls) for smooth data transfer and used Swagger for API documentation and testing.
- Improved dashboards and UI features using Angular, ensuring better visualization of retail data.

Super ATC Module (Krunchbox):

- Implemented features for retailer onboarding and data mapping from backend to frontend using Angular.
- Integrated RESTful APIs to manage retailer data workflows efficiently.

Data Extraction Project (Krunchbox):

- Developed a web application using .NET Web Forms, integrating Business Access Layer (BAL) and Data Access Layer (DAL) for data management.
- Designed and executed SQL queries to extract, manipulate, and present structured data for analytics.

Weather Forecast Dashboard (Krunchbox):

- Developed a React.js frontend to display real-time weather insights.
- Implemented .NET backend APIs to fetch and process weather data.
- Designed interactive dashboards integrating weather with Retailer data.

Education

M.S. Computer Science – Lewis University – GPA 3.9 – May 2026

Bachelors Electronics and Communication Engineering- 3.6 – May 2021 Sreyas Institute of Technology -India

Certifications:

- Certified by QSPIDERS on Manual Testing and SQL Database.
