

MANOJNA BHOGADHI

New York, NY | bhogadhim@gmail.com | +1 (856) 240-0458 |

SUMMARY

Master's graduate in Supply Chain Management with experience in logistics, procurement, inventory management, and data analytics. Skilled in Microsoft Excel, Tableau, SQL (basic), and project management tools. Adept at optimizing supply chain processes and managing vendor relationships. Seeking to leverage expertise in a dynamic operations role.

SKILLS

Microsoft Excel | Tableau (Basic) | Google Sheets | Power BI (Basic) | JIRA (Basic) | Confluence (Basic) | Smartsheet | ERP Systems | SQL (Basic) | Data Visualization | ETL Concepts

EDUCATION

Fairleigh Dickinson University	Teaneck, NJ
Master's in supply chain management	Aug 2022 – May 2024
ICFAI Business School	Hyderabad, India
Bachelor's in Business Administration	Aug 2018 – May 2021

PROFESSIONAL EXPERIENCE

Sams Technologies LLC	Tempe, AZ
<u>Data Analyst</u>	May 2025 – Present
- Analyzed operational and business data using Excel and SQL to generate insights that enhanced internal reporting and improved workflow efficiency. - Utilized SQL and data mining techniques to evaluate and visualize large datasets, supporting data-driven supply chain decision-making. - Developed and maintained dashboards in Power BI to visualize KPIs and communicate performance trends, enabling leadership to make informed decisions. - Created and maintained queries, reports, and presentations to communicate data findings effectively across business units. - Built data models and forecasting tools to support sales, procurement, and resource planning functions across the organization. - Provided analytical support for Sales C Operations Planning (SCOP) and Sales C Operations Execution (SCOE), helping optimize planning cycles. - Ensured data quality and integrity throughout the ETL process and upheld data warehousing best practices to maintain analytics reliability. - Partnered with cross-functional teams to define KPIs, understand data requirements, and deliver tailored reporting solutions. - Conducted ad-hoc analyses using pivot tables, scenario modeling, and visualizations to support strategic business decisions.	
SM Fleet LLC	Staten Island, NY
<u>Data Analyst</u>	May 2024 – April 2025
- Analyzed fleet logistics data using SQL, including vehicle utilization, fuel efficiency, and route optimization, leading to a 15% reduction in transportation costs. - Monitored shipment schedules, fleet capacity, and driver performance, ensuring 98% on-time delivery rates across all logistics operations. - Developed real-time tracking dashboards to enhance visibility of fleet movement and reduce idle time by 20%, improving overall fleet efficiency. - Conducted route optimization analysis using SQL and project management tools, identifying inefficiencies and improving delivery times by 12%. - Integrated data from GPS tracking and telematics systems, improving fleet safety compliance by 18% through enhanced monitoring and reporting.	

- Assisted in implementing maintenance schedules, reducing vehicle downtime and repair costs by 25% through data-driven scheduling improvements.
- Managed and improved logistics databases using SQL, ensuring data accuracy and optimizing fleet asset allocation.
- Collaborated with drivers, dispatchers, and operations teams to streamline logistics workflows, increasing overall efficiency by 15% through structured project management practices.
- Developed automated logistics reporting systems using SQL, cutting manual data processing by 30% and enhancing decision-making.
- Ensured compliance with transportation regulations, reducing violations and enhancing fleet safety standards through data analysis and real-time reporting.

IFFCO Tokio General Insurance
Operations Analyst

Hyderabad, India.
 May 2021 – Aug 2022

- Organized and facilitated cross-functional discussions, setting clear objectives and priorities to drive effective decision-making and workflow optimization.
- Streamlined business planning and execution processes, increasing consistency and improving operational workflows by 20%.
- Developed and tracked performance indicators, utilizing data visualization tools like SQL, Tableau, and Power BI to provide insights that supported data-driven strategies.
- Created interactive dashboards to monitor business performance, enabling leadership to make informed decisions and optimize key processes.
- Designed and executed internal communication strategies, including reports, newsletters, and team meetings to keep departments informed and engaged.
- Supported team-building and cultural development programs, fostering collaboration and enhancing workplace morale.
