

Naga Preethi

Data Analyst

W. Des Moines, USA | +1 (515) 428-6518 | Email: Preethiumamahesh@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Data Analyst with **3+ years'** experience across **healthcare domain**, delivering end-to-end analytics and **Business Intelligence solutions** that drive patient outcomes, operational efficiency, and regulatory compliance.
- Strong expertise in **SQL, PL/SQL, and Big Query** for data extraction, integration, and validation, ensuring >98% data accuracy across healthcare, claims, and financial datasets.
- Proficient in **Python (Pandas, NumPy, Scikit-learn)** for automation, predictive modeling, and data cleansing, reducing manual processing by 30–35% and accelerating BI reporting cycles.
- Successfully developed healthcare analytics at **CVS Health**, including patient risk prediction, medication adherence modeling, and longitudinal care program dashboards delivering actionable insights from integrated EHR/EMR datasets.
- Competently delivered BFSI analytics projects at **Wipro**, implementing AI/ML-powered fraud detection, AML monitoring, credit risk scoring, and regulatory reporting automation for banking and insurance clients.
- Built **interactive dashboards in Tableau and Power BI**, presenting actionable insights, KPIs, and predictive analytics to executives, enhancing decision-making and stakeholder engagement.
- Experienced in managing **HIPAA, PHI, HL7/FHIR, and AML/KYC compliant datasets**, integrating secure workflows across Epic EHR, Salesforce, Hadoop, and AWS/GCP environments.
- Collaborated in **Agile teams**, translating complex requirements into end-to-end data solutions, storytelling through dashboards, PowerPoint presentations, and executive workshops.

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
- Google Data Analytics Professional Certificate (Coursera)

SKILLS

Data Management & Querying	SQL (Oracle, SQL Server, MySQL, PostgreSQL), PL/SQL, NoSQL (MongoDB, Cassandra, DynamoDB). Stored Procedures, Triggers
Programming & Scripting	Python (NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn), R (dplyr, ggplot2, caret), SAS, MATLAB
Data Visualization & Reporting	Power BI, Tableau, Looker, QlikView/Qlik Sense, Google Data Studio, Excel (Power Pivot, Power Query, VLOOKUP, VBA, Macros), SSRS, Plotly, Dash
Data Warehousing & Cloud Platforms	Snowflake, Databricks, Amazon Redshift, Google BigQuery, Azure Synapse Analytics, Teradata
ETL & Data Integration	SSIS, Informatica, Talend, Alteryx, Apache NiFi, API Integration (REST, SOAP, JSON, XML, Postman, SoapUI), Airflow
Data Science & Advanced Analytics	Predictive Modeling, Regression Analysis, Machine Learning (Scikit-learn, XGBoost, TensorFlow basics), NLP, Statistical Analysis
Big Data & Distributed Computing	Apache Spark, Hadoop (HDFS, Hive, Pig), Kafka
APIs & Data Connectivity	REST APIs, SOAP APIs, Postman, SoapUI, JSON, XML
Workflow Automation & CI/CD	Git, GitHub, GitLab CI, Jenkins, Apache Airflow, Docker, Bitbucket
Collaboration & Productivity	Microsoft Teams, SharePoint, Jira, Confluence, MS PowerPoint, Agile/Scrum Environments
Data Governance & Compliance	HIPAA, GDPR, PHI/PII compliance, Data Quality Management (DQM), Master Data Management (MDM), Collibra, Erwin

EXPERIENCE

Data Analyst | CVS Health – Des Moines, IA

Nov 2024 – Present

- Analysed structured and unstructured healthcare datasets from **EHR, claims, and retail systems** using **SQL, Python, and Big Query**, uncovering key insights to drive patient-centric interventions.
- Designed **Power BI dashboards** integrating EHR and claims data to monitor patient outcomes, adherence trends, and operational KPIs across multiple care programs.
- Leveraged Business Intelligence frameworks using **Power BI, Tableau, and Looker** to develop scalable data models, build KPI scorecards, and enable self-service analytics across stakeholders.

- Engineered ETL workflows in **PySpark and SQL on GCP**, automating ingestion of HIPAA-compliant Epic and claims datasets while ensuring end-to-end security and compliance with **HIPAA, PHI, and HL7/FHIR** standards.
- Developed predictive and time-series models using **Scikit-learn** to identify at-risk cohorts and forecast drug utilization, improving adherence and formulary optimization accuracy.
- Partnered with clinical, PBM, and finance teams to translate analytical insights into actionable strategies for cost reduction, care quality improvement, and policy design.
- Integrated **Epic, Salesforce, Snowflake, and Hadoop ecosystems** to establish unified patient journey dashboards, supporting personalized and preventive care initiatives.
- Executed **statistical analysis, regression Modeling, and A/B testing** to evaluate pilot program effectiveness and quantify the impact of patient experience on health outcomes.
- Conducted data quality checks and anomaly detection via **Alteryx, Hive, and SQL** stored procedures, achieving 99.8% accuracy in compliance and regulatory reporting.
- Implemented Airflow-based automation and GitHub version control, optimizing analytics workflows and reducing reporting turnaround by **35%**.
- Supported the *Transform Diabetes Care* initiative through ML-driven risk stratification models, enhancing control rates among high-risk diabetic cohorts.
- Contributed in agile sprints to refine analytics pipelines, standardize data models, and deliver scalable, compliant, and insight-driven healthcare solutions.

Environments: Python, SQL, PySpark, Pandas, NumPy, Scikit-learn, Power BI, Alteryx, Hive, BigQuery, Snowflake, Google Cloud Platform (GCP), Airflow, GitHub, Epic EHR, EHR/EMR Systems, Salesforce, Hadoop Ecosystem, HL7/FHIR Standards, HIPAA/PHI Compliance Frameworks, Statistical Analysis, Regression & A/B Testing, Agile/Scrum Methodology.

Data Analyst (Freelance) | Client: Tata Consultancy Services – USA

May 2023 – Dec 2023

- Delivered multiple end-to-end analytics projects involving **data cleaning, wrangling, exploratory analysis, and statistical modelling** using Python (Pandas, NumPy, SciPy).
- Performed **data-driven insights and hypothesis testing** to identify patterns, correlations, and trends, improving business decision accuracy across diverse datasets.
- Designed **interactive dashboards and automated reports** using Tableau and Power BI to visualize KPIs and streamline executive-level reporting.
- Built and evaluated **predictive and machine learning models** (Regression, Classification, Clustering) to forecast performance metrics and uncover actionable insights.
- Collaborated with clients from various domains, applying **excellent communication and problem-solving skills** to translate analytical findings into clear, strategic recommendations.
- Ensured adherence to **data quality and validation standards**, enhancing data reliability and usability for long-term analytical initiatives.

Environments: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL, Excel, Tableau, Power BI

Data Analyst | Tata Consultancy Services – India

Jan 2021 – Sep 2022

- Generated weekly and monthly sales and healthcare reports, analyzing datasets of **1M+ records** from projects such as **Patient Claims Analytics, Hospital Admission Trends, and Healthcare Revenue Insights**, enabling sales teams to identify revenue trends and improve client engagement by 15%.
- Maintained and organized large-scale customer and healthcare datasets, ensuring **99% data accuracy** and adherence to confidentiality standards.
- Developed dashboards and presentations using **Power BI, Tableau, and Excel** to visualize insights from internal healthcare analytics and sales projects, reducing report generation time by 30%.
- Responded to internal and customer queries related to sales, KPIs, and healthcare analytics, ensuring **reliable reporting**.
- Tracked and monitored sales and healthcare project KPIs, identifying opportunities to optimize processes and **increase reporting efficiency by 25%**.
- Supported ad hoc analytics, data cleaning, and visualization projects involving healthcare and customer datasets, contributing to **improved predictive sales analytics models**.
- Ensured strict confidentiality and security of sensitive customer and healthcare data in compliance with **HIPAA standards**, working with **EHR/EMR systems and EPIC**.

Environment: SQL (Oracle, MySQL), Excel, Power BI, Tableau, Python (Pandas, NumPy), MS PowerPoint, MS Teams, SharePoint

EDUCATION

M.S. in Information Technology & Management from Belhaven University, Jackson City, Mississippi

B.E. in Electrical and Electronics Engineering from Jawaharlal Nehru Technological University, Kakinada, India
