SUMMARY

Healthcare Data Analyst with 5+ years of experience analyzing large clinical and public-health datasets using SQL, Python, R, and SAS. Skilled in data modeling, source-to-target mapping, workflow automation, and quality assurance. Familiar with HL7/FHIR resource structures, OMOP/CDM concepts, and standardized vocabularies (ICD, CPT, LOINC). Strong ability to translate complex data into actionable insights for product, data science, and clinical teams.

CORE SKILLS

- SQL Development & Optimization
- Healthcare Data Modeling (OMOP/CDM – familiar)
- HL7/FHIR Concepts, EHR Data Structures
- Data Cleaning, Integration & STTM
- SAS, R, Python, Stata, SPSS
- Tableau, Power BI
- Cloud Exposure: GCP, AWS, Azure
- Forecasting, Regression, Statistical Analysis
- Data Quality, Validation, Audit Readiness

EXPERIENCE

Statistical Data Analyst

HealthTech Solutions Inc. – Remote | Apr 2025 – Present

- Execute and optimize SQL queries across large healthcare datasets.
- Build automated SAS/R/Python pipelines for data ingestion, transformation, and validation.
- Perform regression, reliability, and validity analyses for program evaluation.
- Conduct source-to-target mapping to align multi-source data with standardized internal models (OMOP-style).
- Work with EHR-derived data and clinical coding systems (ICD, CPT, LOINC).
- Produce dashboards, score reports, and technical documentation.
- Ensure data quality, consistency, and compliance across analytic workflows.

Clinical & Strategic Technical Advisor

ICAP at Columbia University – PMI/MDTA | Sept 2022 – Mar 2025

- Analyzed national malaria datasets using SQL, SAS, and R to identify trends and performance gaps.
- Standardized multi-site datasets using reproducible workflows aligned with common data model principles.

- Developed dashboards, reports, and forecasting models for government and donor stakeholders.
- Built QA frameworks ensuring data integrity and reproducibility.
- Supported mapping and harmonization of heterogeneous clinical datasets.

Research, Surveillance & Response Coordinator

Ohio State University – Global One Health Initiative | Jun 2020 – Sept 2022

- Led analytics for multi-disease surveillance (COVID-19, malaria, polio, measles).
- Integrated and normalized large datasets from clinical and laboratory systems.
- Built automated reporting templates and standardized workflows.
- Produced scorecards and audit-ready technical documentation.
- Strengthened data governance and quality control processes.

EDUCATION

MPH, Epidemiology & Biostatistics – Addis Ababa University

- GPA: 3.95

MD, Medicine – Addis Ababa University, Magna Cum Laude

- GPA: 3.76

CERTIFICATIONS

- SAS Programmer Professional Certificate – Coursera, 2025
- R Programming – Johns Hopkins University, 2025
- SQL Basics for Data Science – UC Davis, 2025
- Microsoft Power BI Data Analyst – Coursera, 2025
- Data Visualization with Tableau – UC Davis, 2025
- Microsoft Office Specialist (Excel/Word/Access), 2025
- Certified Data Entry Specialist (CDES), 2025
