## EXPERIENCE

---

### Data Analyst

Stanley Black & Decker

Remote, Troy, MI

Jul 2023 - Present

- Leads cross-functional collaboration across 5+ internal teams, owning requirements definition and solution delivery for complex initiatives.
- Translates business questions into structured analyses by defining assumptions, inputs, and success criteria.
- Designs and maintains end-to-end analytical workflows, including data extraction, transformation, exploratory analysis, and reporting, supporting decision-making for 100+ users.
- Builds and maintains ETL pipelines to transform data from multiple sources into analysis-ready datasets.
- Conducts exploratory data analysis (EDA) to identify trends and anomalies across operational datasets.
- Develops and maintain Power BI and Smartsheet dashboards with defined KPIs and metrics to support ongoing monitoring, trend analysis, and executive reporting.
- Conducts root cause analysis to explain changes in key metrics and identify underlying drivers of performance.
- Performs ad hoc analyses to investigate data issues and support time-sensitive leadership questions.
- Partners with stakeholders to translate analytical findings into recommendations, including work that contributed to a \$2.4M cost recovery effort.
- Owns end-to-end rollout of Smartsheet automations for global stakeholders, building scalable solutions that improve operational efficiency and reduce manual workload.
- Designs and deploys Power BI and Smartsheet dashboards using advanced features to deliver clear, decision-ready reporting for non-technical stakeholders.
- Leveraged data analysis and workflow evaluation techniques as part of a Lean Six Sigma initiative, identifying inefficiencies that resulted in \$94K in annual savings.

### Revenue Planning & Optimization Intern

The Walt Disney Company

Celebration, FL

Jan 2023 - Jun 2023

- Presented analytical insights and strategic recommendations to executives, guiding pricing decisions that contributed to \$1M in projected revenue gains.
- Analyzed internal and market data to evaluate pricing competitiveness, comparing Disney offerings against competitors to support pricing and planning decisions.
- Translated complex data into accessible stories and visuals, enabling rapid decision-making among cross-functional leadership teams.
- Performed exploratory data analysis and data validation using SQL and Excel to summarize trends and communicate insights to product and business stakeholders.
