

Neelabh Bhardwaj

✉ Bhardwaj.ne@northeastern.edu ☎ +1 (857)-506- 3664 📍 Boston, MA 🔗 [linkedin.com/in/neelabhbhardwaj](https://www.linkedin.com/in/neelabhbhardwaj)

Education

Boston, Northeastern University Masters In Information Systems. Coursework: Agentic AI, Data Warehousing, Statistics, Business Intelligence.	09/2024 – 09/2026 3.724
Liverpool, University of Liverpool Masters in Business Analytics and Big Data Coursework: Big Data analytics, Project Management,Economics	09/2022 – 12/2023
Allahabad, National Institute of Technology Bachelors in Electrical Engineering	07/2016 – 07/2020

Technical Skills

Reporting Tools: **Power BI (DAX)**, **Tableau**, Advanced Excel (Pivot Tables, Macros, VLOOKUP/XLOOKUP), Data Visualization, KPI Development
Cloud & Data Architecture: **Azure** (Data Factory, Data Lake, Blob Storage), **AWS** (S3), **Databricks**, **Snowflake**, Microsoft Fabric
Programming & Automation: **Python**, PL/SQL, **PySpark**, Lang chain
Data Integration & Workflows: Alteryx, Apache Airflow, **ETL Pipeline** Design, **Kafka**, Batch Processing
Emerging Technologies: **Generative AI** (LLMs, RAG Architecture), Prompt Engineering, Agentic AI
Project Management & Collaboration: **Agile Methodologies** (Scrum, Kanban), Stakeholder Management, **Cross-functional Team** Leadership

Professional Experience

Data Engineer , INDI Technology India • Partnered with C-suite leadership to translate strategic business requirements into actionable KPIs • Designed scalable Azure cloud data architecture enabling business intelligence and reducing data processing time by 40% • Delivered Power BI dashboards improving customer health visibility by 35% and reducing churn risk by 10%	01/2024 – 08/2024
Associate Project Manager , Electromechanical L.L.C, Agents For Siemens UAE • Lead \$1M+ project delivery using Agile frameworks , achieving 95% on-time rate through proactive problem-solving and adaptive stakeholder management • Consulted with clients to assess requirements and recommend switchgear modifications , translating complex technical specifications into actionable solutions • Partnered with Siemens leadership across world to align procurement strategies, demonstrating cross-functional collaboration • Performed SQL-based analytics extracting data from ERP and procurement systems to track 15+ concurrent projects	09/2020 – 07/2022

Northeastern Projects

RAG-Based CVE Detection with Multi-Agent Architecture Langchain, LLMs • Built an end-to-end RAG pipeline using Snowflake Cortex to retrieve accurate CVE context and reduce LLM hallucinations • Developed a multi-agent architecture (Planner, CVE Search, Risk Assessment, Mitigation) with shared memory for coordinated reasoning • Engineered a React and Flask-based chat interface enabling users to upload architecture diagrams for automated tech stack detection , CVE identification, risk categorization, mitigation recommendations, and PDF report generation	06/2025 – 08/2025
IMDB Entertainment Analytics Solution (Azure & Snowflake) • Engineered scalable Azure Data Factory pipelines with CI/CD automation to process and transform 250M+ IMDB records • Designed star-schema dimensional models stored in Snowflake , improving query performance by 40% through denormalization • Verified data quality through Alteryx & SQL workflows resolving 50+ daily integrity issues and created Tableau dashboards for stakeholder insights	03/2025 – 04/2025
API Gateway System (Oracle Data Modeler and SQL Developer) • Designed an automated billing system using SQL , managing 50+ transactions across subscription/pay-per-request models, achieving 99% accuracy • Defined normalized (3NF) Relational database schema From Logical to Physical layer with rerunnable DDL scripts and role-based access control, ensuring data integrity across 8+ tables following Oracle security standards	10/2024 – 12/2024
