

Pranitha Bojja

Software Engineer | (551) 310-1927 | pranithabojja83@gmail.com | GitHub: <https://github.com/pranithareddy555>

PROFILE SUMMARY

- Software Engineer with experience in building scalable backend systems, RESTful APIs, and cloud-native microservices using Java, Python, Spring Boot, and Flask across healthcare and enterprise platforms.
- Skilled in developing and integrating Kafka-based asynchronous messaging systems, managing relational and NoSQL databases, and deploying cloud applications using AWS, Azure, and CI/CD pipelines with GitHub Actions and Jenkins.
- Proficient in applying object-oriented design principles, agile practices, and automated testing to deliver high-performance solutions with strong data engineering, DevOps, and cross-functional collaboration experience.

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, SQL, C++, C#, JavaScript, Spring Boot, Flask, REST API, Microservices

Cloud & DevOps: AWS (EC2, S3), Azure, Docker, Jenkins, GitHub Actions, CI/CD pipelines

Messaging & Databases: Kafka, RabbitMQ, MySQL, MongoDB, PostgreSQL, Oracle, Snowflake

Tools: Git, GitHub, Jira, IntelliJ, Visual Studio Code, Jupyter, Linux

Testing & Quality: JUnit, PyTest, Postman, Swagger, SonarQube

Data Engineering & Analytics: Pandas, NumPy, Scikit-learn, Alteryx, Informatica, Databricks

PROFESSIONAL EXPERIENCE

Software Engineer | HCA Healthcare, USA

Aug 2024 - Present

- Engineered and maintained RESTful APIs to power internal applications, processing over 1M+ patient records monthly with <200ms average response latency.
- Designed modular microservices using Spring Boot and Python Flask, integrated with Kafka to handle high-throughput patient data ingestion and distribution.
- Architected loosely coupled service components using asynchronous messaging with Kafka and REST, improving system decoupling and enabling horizontal scaling across multiple application modules.
- Led integration of AWS S3 and EC2 for HIPAA-compliant infrastructure; implemented CI/CD pipelines via GitHub Actions, reducing deployment effort by 40%.
- Built backend automation scripts for real-time reporting pipelines in Databricks, applying ML models for risk prediction.
- Collaborated cross-functionally with QA, DevOps, and product teams to ensure scalability and resiliency through rigorous performance testing and logging.

Software Developer | Accenture, India

Jul 2020 - Jul 2022

- Developed a supply chain management platform using Spring Boot, optimizing logistics operations for 5,000+ daily users.
- Implemented a real-time inventory tracking module, reducing stock discrepancies and improving order fulfillment by 30%.
- Optimized PostgreSQL databases with indexing strategies, accelerating supply chain data retrieval.
- Built RESTful APIs integrating with 10+ vendor systems, automating procurement workflows and reducing manual effort by 40%.
- Managed Azure-based application deployment with Docker and Kubernetes, ensuring 99.9% uptime for critical logistics applications.
- Designed CI/CD pipelines with Git and Jenkins, reducing deployment errors by 35% and improving release efficiency.
- Developed caching mechanisms to enhance system performance, reducing 30% of API response times.
- Monitored supply chain analytics dashboards using Azure tools, identifying bottlenecks and optimizing logistics routes.
- Led Agile sprints for supply chain IT projects, ensuring timely delivery of enhancements and new features.

PROJECTS

Smart Grid Attack Detection

- Built a secure backend system using Java Spring Boot and Apache Kafka to detect cyberattacks on smart grid data.
- Deployed scalable microservices on AWS EC2 using Docker, with real-time classification and REST API integration.
- Implemented role-based authentication and tested system resilience under load for fault tolerance and low latency.

Ad Click Prediction Engine

- Developed a Python Flask API for real-time ad click prediction using logistic regression and decision trees.
- Integrated MongoDB for fast NoSQL querying and deployed to AWS with CI/CD via GitHub Actions and Docker.
- Optimized performance with batch processing, logging, and PyTest-based automated testing framework.

EDUCATION

Master of Science in Computer Science - University of Texas at Dallas, Texas, USA | **CGPA: 3.75 / 4.0**

Bachelor of Technology in Computer Science – GITAM University, Visakhapatnam, India | **CGPA: 9.14 / 10**
