OBJECTIVE & SUMMARY

Full Stack Engineer proficient in **Core Java**, **Python**, and **ReactJS**. I specialize in developing RESTful WebAPIs using JAVA Spring Boot . Also experienced in designing and implementing comprehensive testing strategies, including automation frameworks (TestNG, POM) and integrating CI/CD pipelines (Jenkins). Proven ability to deliver high-quality applications through integration and API testing (Postman, SOAP UI), and SQL database validation.

TECHNICAL SKILLS

- HTML/CSS
- JavaScript
- REACT
- Python
- Core Java
- Source Control (GitHub, GitLab)
- Database (MYSQL, MSSQL, PostgreSQL)
- **API & Web Services** (REST, SOAP, Postman, SOAP UI)
- IDE & Tools (IntelliJ IDEA, VS Code)
- Unit Testing (TestNG, Mockito)
- Integration Testing
- Automation Testing (Selenium, Cucumber, Jenkins, Maven)
- Scrum /Agile

EDUCATION

MIDLANDS TECHNICAL COLLEGE

Jr Full Stack Engineer Certificate Program

Columbia, SC

April 2025 –January 2026

28-week Training Program: Development Basics & Front End, Intermediate Programming, Databases, Web Servers, Front End Frameworks (REACT), Scrum/Agile, and Final Project

Soft Skill Training: Verbal Communication, Understanding Personality Types, Enhancing Your Professionalism, Time Management & Organization, Job Search and Interviewing

April 2025 – October 2025

DDU UNIVERSITY

M.A (**Master of Arts**) in Psychology

Gorakhpur, India

August 2001 – July 2003

DDU UNIVERSITY

M.A (**Master of Arts**) in Psychology

Gorakhpur, India

August 1997 – October 2000

Personal Strength

Collaboration, detail oriented, never give up, hardworking, trustworthy

TRAINING & CERTIFICATIONS

- Automation Testing Training using JAVA & Selenium from **H2k Infosys** (www.h2kinfosys.com)
- Manual Testing Training (MindMajix.com), Credential ID MMMAN10801
- Diploma in Computer Applications & Multilingual DTP, DOEACC Centre, India
- Salesforce certified AI Associate by Salesforce (Issued Mar 2025 Credential ID 5913193)
- Six Sigma Yellow Belt Professional (SCRUMstudy.com, Credential ID 904842, Expires Mar 2028)
- Scrum Fundamentals Certified (SFC) (SCRUMstudy.com, Credential ID 1070515)
- Scrum for Operations and DevOps Fundamentals Certified (SODFC™) (SCRUMstudy.com, Credential ID 1013874)
- CPR & AED Certification (Midlands Technical College, Credential ID 245416224197, Expires Feb 2026)
- Postman Essential Training and Six Sigma Green Belt certified on LinkedIn

PROFESSIONAL EXPERIENCE

CREATE OPPORTUNITY (MIDLANDS TECHNICAL COLLEGE)

Columbia, SC

Full-Stack Developer Apprentice

April 2025 – January 2026

Completed a 7-month intensive full-stack program focused on **Java, ReactJS (JavaScript), and PostgreSQL**.

- Built web applications using Spring Boot, Hibernate, and React frameworks.
- Developed a RESTful Web Ordering API and optimized SQL queries for college database management.
- Ensured code quality by writing comprehensive Unit and Integration tests in Java.
- Created interactive front-end features, including web-based games and dynamic form validation.
- Collaborated in team environments while maintaining high standards for independent research and study.

AMERICAN STAFFING PROFESSIONALS

Lexington, SC

Substitute Teacher

November 2023 – March 2025

Worked as Substitute teacher for Elementary and Middle Schools.

- Delivered engaging instruction and maintained classroom continuity following established lesson plans.
- Managed student behavior and fostered a structured, supportive learning environment.
- Adapted teaching methods to accommodate diverse student needs and learning styles.
- Collaborated with school staff to ensure a seamless educational experience for students.

IIT WORK FORCE

Alpharetta, GA

QA Automation Trainee

March 2024 – October 2024

Conducted functional, regression, and localization testing for healthcare applications.

- Develop and execute automation scripts using Java and Selenium WebDriver.
- Reduced test execution time by 20% with **Selenium** automation using **JAVA**, Cucumber and Jenkins.
- Perform API Testing using SoapUI (Web Service, API, SOAP, REST).
- Execute SQL queries for database validation.
- Track and report defects using JIRA, providing detailed root cause analysis.

DIGIXITO MEDIA PRIVATE LIMITED

Noida, India (Remote)

Freelance Software Tester | Quality Analyst

October 2020 – February 2023

- Developed and executed test cases and test scripts for web and mobile applications.
- Performed Responsive UI, cross-browser and cross-platform testing.
- Created detailed test reports and defect logs.
- Conducted API and database testing for data validation.

IENERGIZER

Noida, India

Senior Executive - Customer Service

March 2007 – October 2007

- Provided customer support via phone and email.
- Documented customer requests and maintained a customer request database.
- Assisted technical team members in issue resolution.

PROJECT EXPERIENCE

Healthcare Patient Management System – (December 2025 – January 2026)

Developed a full-stack application for a regional healthcare company, managing **patient** and **encounter** data with a focus on modern development practices and regulatory compliance readiness.

- Engineered a comprehensive system handling core patient information (age, height, weight, SSN, etc.) and detailed medical encounters (visit code, provider, billing code, ICD-10, vitals, costs).
- Implemented robust frontend and backend validation for all data fields, ensuring data integrity and adherence to specific formats (e.g., email, SSN, postal codes, dates, visit codes).
- Designed and implemented a full suite of RESTful APIs for CRUD operations on patient and encounter data, including specific status codes for various scenarios (e.g., 200, 201, 400, 404, 409, 503).
- Developed a user interface that manages patient and encounter lists, details, creation, editing, and deletion, with dynamic updates without page refreshes.
- Ensured project quality through comprehensive documentation, adherence to coding standards (ESLint/Airbnb), and extensive unit/integration testing with coverage goals of over 80%.

Sports Apparel E-Commerce Platform – (November 2025 – December 2025)

Developed a full-stack e-commerce application for sports apparel, managing product catalogs and user shopping sessions with a focus on data persistence and scalable backend architecture.

- Developed a responsive user interface using React.js and Bootstrap, featuring dynamic product sliders, category-based navigation, and dedicated views for Wishlist and Cart management.
- Designed and implemented a modular backend using Java Spring Boot, utilizing a layered architecture (Controller, Service, Repository) to ensure clean code maintenance and scalability.
- Implemented a persistent shopping cart system using PostgreSQL, synchronizing cart data across devices and sessions by linking items directly to authenticated user accounts.
- Developed a comprehensive suite of RESTful APIs for product management and billing, secured via Spring Security and rigorously validated through Postman for error handling and status code accuracy.
- Optimized the frontend for dynamic updates, allowing users to browse "New Arrivals" and "Popular Items" with seamless state transitions and real-time updates.

Garden Center API Project (e-Commerce) - September 2025 – October 2025

Garden Center LLC wants to expand into e-commerce by creating a web application for contractors to place supply orders remotely.

- Designed and implemented a REST API using Java, Spring-Boot, PostgreSQL, and Mockito to support both mobile and web applications for contractor supply orders.
- Built layered architecture (data, logic, and API layers) ensuring scalability and maintainability.
- Developed and executed unit and integration tests to validate functionality and reliability.
- Implemented custom exception handling to provide clear, consistent REST API responses.

PostgreSQL Database Project (Retail) - July 2025 – August 2025

The project required writing SQL queries on the given database to answer marketing and operational questions.

- Listing stores, sales, and members, generating inventory and sales reports.
- Updating/deleting payment methods, inserting new products, and documenting foreign keys.
- Created ER diagram and prepared documentation.

VRoar.Ai (AI-based Project) - July 2022 – February 2023

- Executed functional, UI, and cross-browser testing.
- Managed test case creation and defect reporting.
- Participated in Agile Scrum meetings.

Skechers.Com (E-Commerce Project) – Jan 2021 – March 2022

- Conducted manual and functional testing.
- Ensured cross-browser compatibility.
- Collaborated with the test team to streamline testing processes.
