Professional Summary

- **4 years** of professional IT work experience in **Analysis, Design, Development, Deployment**, testing and support activities, and **Maintenance** of critical software and **Enterprise based, web-based** applications.
- **Over 4 years** of experience in Designing and developing large-scale enterprise applications using **Java 8, J2EE, Spring, Spring Boot, Python, and Django**.
- Thorough understanding of Python basic concepts like **Lists, Strings, Indexing, Slicing, Tuples, and Dictionaries**.
- Familiar with **NumPy, Pandas, and Matplotlib**.
- Proficiency in Deploying J2EE Applications archives (JAR, WAR) on Apache Tomcat Web Server.
- Experience in using AWS services like S3, AWS Redshift, Ec2, and AWS Quick Sight.
- Experience in designing real-time systems and identifying bottlenecks and knowledge of **SQL and NO SQL databases**.
- Experience in configuring and Managing **Amazon AWS Cloud Services, EC2,S3, Elastic Load Balancing, Auto Scaling groups, SNS, SQS, Elastic Bean Stalk, Fargate, and Serverless Deployment**.
- Experienced with Version Control using **GIT, GitHub, and error logging using Log4J**.
- Utilized **Django** mixins and generics to enhance code modularity and reusability, optimizing development efficiency.
- Experience in issue/tracking tools like **Jira** and experience in continuous integration tools like **Jenkins**.
- Experience in Handling **Restful API** Requests and Error Handling and Securing the API using **Spring Security, and Django**.
- Experience in working with **Object Oriented Programming (OOP) Concepts** like Polymorphism, Inheritance, Abstraction, Encapsulation, Microservices, and REST.
- Very good experience in complete project life cycle (design, development, testing and implementation) of Client Server and Web applications.
- Experienced in working with **Amazon Web Services (AWS)** using **S3, EC2, Redshift**
- Strong experience in Object-Oriented **Design, Analysis, Development, Testing and Maintenance**.
- Worked in large and small teams for systems requirements, design & and development.

Tools & Technologies:

Technologies	Spring, Spring Boot, Spring MVC, JSP, Servlets, Hibernate, Lombok, Kafka, Spring Security(Oauth2, JWT), Django, mixins, NumPy, Pandas, Generics, and View Sets
Programming Languages	Python, Java, J2EE, C, C++, Java Script.
Web Technologies	HTML, CSS, React, Node js.
Databases/RDBMS	MySQL, SQL/PL-SQL, Mongo dB, Document db.
Utilities/Tools	Eclipse, Tomcat, NetBeans, PyCharm, Anaconda, Docker, Swagger
Cloud Platforms	Amazon EC2, S3, Heroku, Fragate, SNS, SQS, ELB, ElasticBeanStalk
Version Control	Git, Bitbucket

Testing	Junit, Log4j
Build and Deployment	Jenkins

Professional Experience

Sagar Soft
Back-end Developer

Mar 2023 – Nov 2023

Responsibilities:

- Participated in Designing a **System design** and identifying bottlenecks, estimation, and implementation.
- Integrated and worked with various databases, such as PostgreSQL or MySQL, using **Django** ORM for efficient data modeling and manipulation.
- Developed **Django** web applications using advanced features such as **mixins**, **generics**, and **view sets** to streamline code organization and enhance reusability.
- Proficient in **NumPy**, leveraging its capabilities for efficient numerical computations, array manipulation, and mathematical operations.
- Used various core Java and Python concepts such as **Exception Handling and collection API** and data structures and Algorithms.
- Using **Eclipse and PyCharm** Integrated Development Environment for coding, debugging, and testing application modules.
- Participating in the Implementation of using Agile methodology where there are daily scrum meetings to understand the issues and resolve issues.
- Handled **REST API requests** effectively, and object-relational mappings to the database using JPA, Django Rest, and Hibernate.
- Worked on **GIT** as version control. Utilized NPM scripts for build and test environments in a node.js application.
- Developed and maintained **Swagger documentation for RESTful APIs**, facilitating collaboration between development teams and enabling seamless third-party integrations.
- Used **Java 8/ intermediate operators Lambda expressions** along with Streams for creating internal iteration and performing chain operations such as Filter, Map, and Collect on a collection.
- Implemented **ci/cd pipelines in Jenkins** to build and deploy the application.
- Collaborated with MS SQL Server, Spring Data JPA, and Hibernate to execute efficient RDBMS database operations, resulting in a 20% improvement in database query performance.
- Developing **Microservices** using **Spring MVC**, **Spring Boot**, and **Spring Security**.
- Used **Docker containers** to eliminate a source of friction between development and Operations.
- Implemented the application using **Spring Boot** Framework and handled the security using **Spring Security**.
- Implemented **Kafka** producer and consumer applications on **Kafka cluster** setup with the help of **Zookeeper**.

Environment: Java 8, Python, Django, Spring, Spring boot, Rest API, Spring Security, Spring MVC, Eclipse IDE, Spring Batch, GIT, Tomcat, JUnit, Log4j, Kafka, Swagger, Jenkins, ci/cd, Docker, AWS Fargate

Formation

Feb 2022 – Mar 2023

Full Stack Software Engineer Fellow

- Selected for a highly competitive Fellowship for personal and professional development purposes.
- Completed intensive training for 7+ months to master **React, data structures, algorithms**, and theoretical CS topics through independent projects, pair programming, and small mentor-led groups with senior engineers from Facebook, Microsoft, Next-door, etc
- Worked on deconstructing, high-level design, and scaling of various real-time systems.
- Strong understanding of **performance tuning** and optimization techniques, including load balancing, caching, and CDNS.
- Strong understanding of system architecture, including **microservices, API design**, and data **storage** solutions.
- Improved UX for users by resolving a bug in **Redux**, enabling questions to rapidly flash on the screen instead of only displaying selected questions.
- Experience working with **Git**-based code editors such as VS Code, and knowledge of Git-related extensions and plugins.

Onex Softech

Jan 2019 – Nov 2020

Software Developer

- Gathering business requirements, business analysis, and design various data products
- Used Core Java concepts like **Collections Framework, Exception Handling**, and I/O Systems throughout the application for good structure.
- Improved **user acquisition** drastically by fixing a few map functionalities that are not working in the devices with the Android version below 11 which is related to the critical weather alert.
- Implemented this using "**retrofit web service**" by sending requests to API with base URL along with required parameters like current location, latitude, longitude, and API key.
- Improved code reusability of this project, debugged critical issues, reviewed code and provided constructive feedback, and also provided mentorship to juniors.
- Strong understanding of the **Model-View-Controller (MVC)** architecture and experience implementing it in JSP, Django, and Servlets.
- Through the project, I developed a solid understanding of several **J2EE design patterns**, such as MVC, Data Access Object, and Singleton. Worked with REST APIs to retrieve and display data from databases.
- Used Postman and **JUnit** to test the RESTful API for **HTTP requests** such as GET, POST, and PUT.
- Proficient in creating comprehensive API documentation using **Swagger**, ensuring clear communication and ease of integration for developers and stakeholders.
- Worked on the development of multi-threaded applications to handle high concurrent user requests, achieving significant improvements in response times.
- Created **AWS instances** and manipulated files using **S3 buckets**.
- Used result Set Interface to display the retrieved data to the user on the web page.
- Created new views and added new columns to the existing view in the database using **SQL**.

EDUCATIONAL QUALIFICATION:

Master Of Science - Computer Science - Dec 2022, University of New Haven, West Haven, CT.
Bachelor Of Technology - Computer Science, Atria Institute of Technology, Bangalore, India

Certifications:

Algo expert from AlgoExpert.io
System design – Course complete Certification
