

YESHWANTH SARA

Java Full Stack Developer

+1 209 776 5029 · yeshwanthsara28@gmail.com · Tampa, FL · yeshwanthsara22.in

SUMMARY

Full Stack Developer with 2+ years of experience delivering scalable web applications using Java, Spring Boot, and React. Migrated 15+ SOAP services to RESTful JSON APIs, reducing response times by 45% and enhancing integration with modern UIs. Delivered a microservices architecture processing 1,000+ concurrent transactions daily with 99.95% uptime. Resolved 30+ SL-1 production issues through root cause analysis and sustainable design, reducing defect recurrence by 35%. Managed CI/CD pipelines via Azure DevOps and Jenkins, accelerating deployments by 40% in agile environments.

EDUCATION

Master of Science in Computer Science
University of South Florida

CGPA:3.73/4
Aug 2023 – May 2025 | Tampa, United States

WORK EXPERIENCE

DBS Bank

July 2022 – July 2023 | Hyderabad, India

Java Full Stack Developer

- Upgraded 3 microservices from Spring 2.3 to 3.1, leveraging the Spring Framework to ensure seamless functionality and improved code maintainability.
- Developed and integrated backend REST APIs for internal UI screens and robust data configuration, utilizing Java JEE to enhance system responsiveness.
- Collaborated with cross-functional QA and DevOps teams and participated in code reviews to troubleshoot and resolve test failures and environment-related build issues, reducing deployment delays by 30% across 3 major microservices.
- Established a Jenkins CI/CD pipeline that reduced manual deployment efforts from 4 hours to 15 minutes and boosted rollout speed by 50%, aligning with modern CI/CD practices.
- Orchestrated microservices deployment via Kubernetes and Docker container runtimes, minimizing release errors by 40% and accelerating rollout cycles by 35% for cloud native app development.
- Integrated Kafka to enable near real-time processing of loan application events, improving data synchronization speed by 30%.

ACS SOLUTION

Dec 2021 – May 2022 | Hyderabad, India

Trainee Software Engineer Internship

- Engineered and integrated the Skin Tone Analyzer web application using React (TypeScript), Spring Boot, and PostgreSQL to leverage JSON-based REST APIs, which improved request/response efficiency by 35%.
- Developed a recommendation engine that delivered skin product suggestions based on detection results, increasing user interaction by 25% and boosting email-driven conversions by 15% via targeted promotional campaigns.
- Optimized frontend performance using TypeScript, reducing UI load time by 40% and enhancing component scalability and maintainability for continuous development efficiency.
- Wrote shell scripts in a UNIX environment to automate backend tasks like log rotation and data fetch routines, reducing manual intervention by 30% and improving operational efficiency.

VERZEO EDU TECH

Dec 2020 – May 2021 | Hyderabad, India

Web Developer Internship

- Constructed and embedded a full-stack web application using React, Spring Boot, and MariaDB, streamlining user interaction and backend workflows.
 - Built RESTful APIs and Unit tests using JUnit and Mockito, ensuring 90 %+ test coverage and improving code reliability.
 - Collaborated with cross-functional teams to optimize integration, resulting in a 25% faster project delivery.
-

SKILLS

Programming Languages :	Java (JEE), Python (3+), TypeScript, JavaScript, SQL, C/C++, HTML5, CSS3, Scala, Kotlin, Flutter (Basic), Data Structures and Algorithms, C#, PHP.
Frontend Frameworks :	React.js, Angular.js, Vue.js, jQuery, Bootstrap, React Hooks
Backend Frameworks :	Spring Boot, Node.js, Django, Flask, Spring Batch.
Databases :	MySQL, MariaDB, PostgreSQL, Oracle DB, DynamoDB, SQL Server, MongoDB, PL-SQL, Database Management System

System Design & APIs	:	RESTful Services, SOAP (Protocol), API Design & Development, Microservices, JPA (Java Persistence API), Test Driven Development, Unit Testing, Design Patterns, Postman, Swagger, VCT Design
Development Tools	:	Git, Bitbucket, Jenkins, Maven 3, Gradle, Docker, GCP, Kubernetes (Basics), AWS(EC2, S3), OpenShift, JBoss, IntelliJ, Linux, JIRA, CI/CD Pipelines, Kafka, Snowflake, Postman, Swagger, System Integration, Payment Processing, Performance Testing, Local Development Servers, Azure, Helm Charts, SQL Workbench, Eclipse, DBeaver, Cloud Native App Development
Methodologies.	:	Agile Development, Scrum, Test Driven Development (TDD), Continuous Integration & Delivery (CI/CD), SDLC Ownership, Project Management, Code Reviews, Debugging, Unit Testing, Integration Testing, Regression Testing, Software Development Methodologies

ACHIEVEMENTS

- Recognised and awarded 'The Super Rookie' for exceptional contributions to multiple projects, delivering clean and efficient code within 6 months of joining DBS.
 - Secured 2nd place out of 60 teams in the DBS Hackathon for developing a web application, demonstrating exceptional skills in building and presenting innovative solutions.
-
