(385) 236-9365 | [ultramarine362@gmail.com](mailto:ultramarine362@gmail.com) | Salt Lake City, UT | [www.linkedin.com/in/raul-tovar-354013174](https://www.linkedin.com/in/raul-tovar-354013174)

---

## PROFESSIONAL PROFILE

Computer scientist with a passion for technology. Experienced in several programming languages including Java, JavaScript, and Python. Strong understanding of database management systems and relational database concepts. Experience and understanding of API development methods including REST APIs. Foundational knowledge of web technologies and frameworks including HTML, CSS, and React. Excellent communication and problem-solving skills, able to work independently or in a team setting with a strong desire to learn, dedicated toward producing innovative and high-quality solutions.

## COMPETENCIES

- Create object-oriented programs and utilize programming frameworks.
- Write complex SQL statements for data analysis and manipulation.
- Create software applications that incorporate non-linear data structures for efficient and maintainable software.
- Create test cases for quality assurance and use an automated testing framework.
- Understand and implement data validation.
- Understand the fundamentals of web programming and web APIs.
- Implement version control processes and solutions that maintain source code and document changes using Git.
- Research and determine how data structure types impact operations within applications.
- Recommend strategies for decision-making in team environments.
- Understand and identify the different development approaches used within the Software Development Process.

## RELATED PROJECTS

### **MERN Tire Inventory Management System**

<https://github.com/Rault647/mern-tire-inventory.git>

- Create an inventory management system for a tire warehouse using the MERN stack.
- Develop backend REST APIs and middleware to handle requests using Node.js, Express, and JavaScript.
- Develop frontend to display data and site elements for a clean and intuitive look using React and Tailwind CSS.
- Live web service can be visited at <https://mern-tire-inventory.onrender.com> (may take up to a minute to load)

### **Shop Inventory Management System Project**

<https://github.com/Rault647/D287-pizza-shop-inventory.git>

- Write code for handling the logic of a shop inventory management system using the Spring framework and REST API.
- Implement version control processes using Git to document changes and maintain source code.
- Implement inventory data persistence using the Spring Data JPA API.

### **Hotel Front-End Project**

<https://github.com/Rault647/D387-hotel-room-booking.git>

- Create the front-end user interface of a hotel home page using Java, HTML/CSS, TypeScript, and Angular.
- Implement version control processes using Git to document changes and maintain source code.

## EDUCATION

**Bachelor of Science in Computer Science** ----- April 2025

*Western Governors University* | Salt Lake City, UT
