

TANJINA AKTER REEMA

Email: reematanjina@gmail.com • Phone: (805)3291894 • San Diego, CA

EDUCATION

Master of Science (M.S.) in Information Systems

Institute: **California State University, Los Angeles**

GPA obtained :**3.55/4.0**

Degree awarded: December 2020

Bachelor of Science (B.Sc.) in Computer Science & Engineering (CSE)

Institute: Ahsanullah University of Science and Technology, Dhaka, Bangladesh.

Degree awarded: January 2015

GRADUATE COURSEWORKS

Healthcare Data Analytics, Intro to Big Data Science, Information Systems, Systems Analysis and Design, IS/IT Architectures, Computer and network security, Communication & Info Services, IS/IT Policy and Strategy, Visual Analytics, Information System Project & Change Management.

UNDERGRADUATE COURSEWORKS

Programming languages, Data Structures, Algorithms, Software Development, Operating System, Database, Information System Design, Computer Networks, Network Programming, Computer Graphics, Artificial Intelligence, Microprocessor Based System Design.

EXPERIENCE

Pre-trainee student at NASA DIRECT-STEM program at Cal State LA *(Sep 2019 ~ Apr 2020)*

Attended data science workshops focusing primarily on coding with Python.

Internship: Infrastructure intern at Banglalink Digital Communications Ltd, Bangladesh *(Jan 2015 ~ Mar 2015)*

Involved in some research works on 4G mobile broadband technology. This work included analysis of current technologies used by telecommunication companies in Bangladesh and feasibility of entering next generation wireless networks

PROJECTS

Heart disease data analysis with python

Analyzed dataset using python which features various heart disease diagnostic parameters to understand the heart disease diagnosis and prediction between different age group/sex

Big Data Science Project

Predict "Call Type" such as 'Explosion', 'Fuel Spill', 'Gas Leak', 'Outside Fire', 'Water Rescue', 'Traffic Collision' etc for Fire Department Calls in city of San Francisco using Microsoft Azure ML studio. Data pre-processing like removing the duplicate instances and the irrelevant features are done in Spark.

Systems Analysis and Design Project

Understanding computer intrusions by analyzing network data using a Hadoop environment and its data tools.

Data Analysis and Visualization using HADOOP, HIVE, TABLEAU, PowerBI

Healthcare Data Analytics Project

Behavioral Risk Factor data analysis, Heart Disease & Stroke Prevention by using SAS studio.

Creating Network Infrastructure Using Azure

Create a Virtual Network that route and secure network traffic

Information System Project & Change Management

Develop a bottom up solution to reduce food wastage with the collaborative powers of Cal State LA students, faculty & staff.

**TECHNICAL
SKILLS**

Language:

Python, Scala, JAVA, Visual.NET(C#), C/C++, SQL, HTML, CSS, Javascript, jQuery, PHP, Joomla, Wordpress, Assembly Language , OpenGL, Prolog

Application Software:

Big Data tools (Hadoop, Hive, Spark), Oracle big data cloud, Microsoft Azure ML, SAS Visual Studio, Microsoft Office, Microsoft Visual Studio, Eclipse, Netbeans, MATLAB, Adobe Photoshop

Database :

SQL SERVER, MySQL, ORACLE 10g

Networking :

Packet Tracer, Socket Programming, OMNET 4.5, Simulate

PUBLICATION

'Study of ICU Patient Condition Alert Generation Process using D2D under LTE network' published by IEEE ICCIT, 2015.
