Work Experience

Unchained Entertainment

Aug 2022 — Present

Game Designer

UCE is a Game Dev studio developing multiple titles using their in-house-built Unchained Engine.

- Played a critical role in launching the action RPG Final Stand: Ragnarok and developing the MMO Camelot Unchained.
- Designed and scripted classes, abilities, and NPCs
- Pivoted FSR toward a wider market by developing new game modes and content.
- Significantly expanded the team's ability to produce necessary content for FSR by implementing a new pipeline of iterative, modular content.
- Worked closely with artists and engineers to improve all aspects of titles, such as character and environment art, physics, and UI/UX, as well as the engine and its tools.
- Quickly became a SME on the Unchained Engine's editor, including writing documentation for the editor and teaching coworkers to use it.

DPDHL

Jan 2021 — Aug 2022

Data Analyst

DHL Group, is a multinational package delivery and supply chain management company.

- Tracked, analyzed, and audited inventory and order data using a variety of software and scripting.
- Created an inventory audit tool adopted by 3 DHL warehouses as a primary method of ensuring inventory accuracy for millions of dollars worth of annual product.
- Provided critical business statistics and insights to senior level management by building dashboards and producing and maintaining regular reports.

Projects

e-motion

Apr 2008 — Mar 2009

PC Video Game - 3D Marble Puzzle/Platformer - small team project

- Project Leadership - managed a small team, overseeing work, setting milestones, and scheduling work times
- Mechanics Design - designed core systems, different physics sets for the player avatar, and environmental hazards
- Level Design - built 3D levels and scripted events
- Documentation - wrote design docs that the team worked from as well as pitch documents for the game and project
- Art and Sound Direction - worked with Art and Sound to deliver on the desired aesthetics of the game
