SUMMARY

Power BI Developer with experience supporting legal operations through data-driven reporting, KPI development, and automated data pipelines. Skilled in translating business needs into actionable dashboards and insights using Power BI, SQL, DAX, and Power Automate. Strong background in working with stakeholders and case management systems to drive measurable performance improvements.

SKILLS AND ABILITIES

Power BI Desktop, Power BI Service, DAX, Data Modeling, SQL Server, Power Query, ETL, KPI Development, Data Visualization & Storytelling, Power BI Gateways, Scheduled Refresh, Power Automate, Microsoft Excel, Microsoft PowerPoint, SharePoint, Microsoft Teams, Jira, Requirements Gathering, Strategic Problem Solving, Critical Thinking, logical thinking.

EXPERIENCE

Power BI Developer, Trellys LLC

July 2025 –Present

- Worked closely with **stakeholders** to understand **business processes**, **reporting needs**, and operational pain points.
- Gathered **reporting requirements** from **non-technical stakeholders** by using practical examples and data storytelling to align insights with business goals.
- Designed interactive **Power BI reports and dashboards** with multi-visual layouts to highlight critical KPIs, performance metrics, and trends.
- Developed optimized **DAX measures** to calculate performance metrics, trends, and operational KPIs.
- **Structured** and **transformed** large datasets using **Power Query** to create scalable and reliable data models.
- Designed and optimized SQL queries in SQL Server to efficiently deliver accurate, analytics-ready datasets for dashboards and ad-hoc analysis.
- Integrated automated data flows with Power BI refresh schedules to ensure timely and consistent reporting.
- Configured **Power BI Gateways** to support **scheduled refreshes** and ensure **consistent data availability** for stakeholders.
- Strategically **analyzed business problems** and applied **data-driven solutions** to improve decision-making and operational efficiency.
- Embedded **Power BI dashboards** in **SharePoint** to enable self-service access for stakeholders across the organization.
- Knowledge of **Agile methodologies**, sprint planning concepts, and Jira-based workflows for BI project delivery.

Academic Project, Church Demographics and Data Analysis

Jan 2025 – June 2025

- **Designed** and **distributed** targeted surveys during church events to collect demographic and preference data.
- **Consolidated** survey responses into **Excel** and **imported data** into **Power BI** for analysis.
- **Cleaned** and **transformed** raw survey data using **Power Query** to enable accurate reporting.
- Created **interactive visualizations** to uncover trends in event popularity, youth engagement, and community preferences.
- **Delivered insights** to support planning of **more impactful**, inclusive church events.

EDUCATION

Bachelor's in Information Technology

Strayer University, Dallas, TX

Cumulative GPA: 3.91

Bachelor's in Information Science and Technology

University of South Carolina - Beaufort, Bluffton, SC
