SUMMARY

Business analyst specializing in growth analytics with a solid foundation in SQL, Excel and data visualization. Skilled at cleaning and validating large datasets and building interactive dashboards to uncover patterns, including a cohort analysis that revealed a 30% abandonment rate and informed criteria adjustments. Designed automated reporting tools that cut manual reporting time by 60% while improving accuracy, eager to support data-driven decision-making and business intelligence initiatives.

SKILLS

- **Growth & Business Analytics:** Consumer Metrics Analysis, Cohort Analysis, Trend Identification, Scenario Modeling, Forecasting, Data Analysis, Data Visualization, Statistical Concepts, Analytical Skills
- **Data & Reporting Tools:** SQL (Foundational), Excel (Advanced Formulas, Pivot Tables), Google Sheets, Tableau / Power BI, Python
- **Data Operations:** Data Cleaning & Validation, ETL Concepts, Reporting Automation, KPI Tracking
- **Collaboration & Communication:** Executive Presentations, Cross-Functional Partnering, Stakeholder Reporting, Research & Insights

WORK EXPERIENCE

Supernova MGU

Nov 2025 - Jan 2026

Business Analyst

Remote

- Automated data cleaning and validation using python scripts to analyze 5,000+ consumer quote, premium, and rejection records, uncovering acquisition drop-offs and underwriting failures impacting conversion and revenue growth.
- Built cohort-style analyses leveraging pivot tables, scenario modeling, and statistical concepts, revealing a 30% abandonment rate across customer journeys and a 13% false rejection rate from validation logic.
- Modeled revenue impact scenarios demonstrating that optimizing approval criteria could drive a 10% lift in conversions and 25% increase in projected revenue.
- Developed interactive Power BI dashboards and delivered executive-ready insights and growth recommendations in a cross-functional presentation focused on acquisition flow optimization and system improvements.

Doorstep, Inc.

Jun 2023 - Present

Associate Director

Topeka, KS

- Led data-driven analysis using SQL queries and advanced analytical skills across multiple programs to track customer demand, service utilization, and funding performance, informing strategic resource allocation and growth planning.
- Designed and automated centralized data tracking systems in Excel for client intake, donor contributions, and service delivery, cutting manual reporting time by ~60% and improving accuracy by ~50%.
- Produced recurring insights that guided assistance programs, directly supporting 700+ households annually

Auburn-Washburn USD 437

Aug 2019 - Jul 2023

School Counselor

Topeka, KS

- Created automated performance dashboards and cohort tracking tools using Google Sheets and pivot tables, improving visibility into student progress and reducing planning workload by 60%.
- Analyzed longitudinal performance data to identify churn-risk students and intervention opportunities, driving a 50% improvement in graduation outcomes among targeted populations.
- Partnered with administrators and educators to translate data trends into operational decisions around course offerings, retention strategies, and targeted programs impacting 150+ students annually.
