SUMMARY

Data-driven business and systems analyst with strong expertise in SQL-based data pipelines, Power BI and Tableau analytics, and Python-driven process automation. Proven ability to translate complex operational and supply chain data into actionable insights through well-structured dashboards, validated data models, and reliable forecasting logic. Experienced in delivering high-quality system releases through rigorous UAT, optimizing enterprise workflows through process mapping, and improving reporting efficiency through automation. Adept at working across operations, finance, HR, and technology teams to drive system adoption, data integrity, and scalable decision-making.

EXPERIENCE

Business Analyst | Elite Materials and Logistics Solutions

June 2024 - Present, Denton, TX

- **Drove data-driven inventory optimization** by designing and maintaining **8 Tableau dashboards** tracking inventory KPIs, improving **stock-out forecasting accuracy by 25%** and enabling replenishment decisions across distribution operations.
- **Streamlined enterprise reporting** by developing **SQL-based data pipelines** that consolidated **12 disparate systems** into a centralized data warehouse, reducing **report latency by 50%** and improving cross-functional visibility for operations and finance teams.
- **Reduced inventory carrying costs** by implementing a **demand forecasting model** leveraging moving averages and seasonal trends, decreasing **overstock expenses by 15% within 3 months** while improving forecast alignment with logistics demand patterns.
- **Generated measurable cost savings** by conducting **root-cause analysis on supply chain variances**, identifying and resolving **4 critical data discrepancies** that prevented inventory misstatements and delivered **\$120K in annual savings**.
- **Accelerated financial close and data accuracy** by automating the **month-end inventory close process** using Python-driven workflows, cutting close time from **5 days to 1 day** and eliminating **95% of manual reporting errors**.
- **Led cross-functional system enhancements** by managing **75+ Jira backlog items**, prioritizing and delivering the **top 10 features within four sprints**, resulting in a **30% increase in end-user satisfaction** and smoother ERP adoption across logistics operations.

Business Analyst | Softlabs Group

July 2021 - July 2023, India

- **Delivered high-quality system releases** by designing and executing **120+ end-to-end UAT test cases**, achieving a **98% defect detection rate** prior to production and significantly reducing post-go-live issues.
- **Optimized operational efficiency** by automating **monthly inventory reconciliation reports** using advanced Excel macros, reducing manual effort from **10 hours to 2 hours per cycle** and improving reporting accuracy.
- **Improved business process performance** by mapping and reengineering **5 core procurement workflows** using Visio, decreasing average cycle time by **22%** and enhancing cross-functional coordination.
- **Ensured data integrity at scale** by developing **SQL-based data import and validation routines** that processed **50K+ records per run** with **zero integrity errors** through robust referential and quality checks.
- **Accelerated user adoption and system effectiveness** by conducting **15 on-site training sessions**, increasing user proficiency scores from **60% to 90% within two weeks** and reducing post-training support requests.
- **Enabled data-driven HR decisions** by developing **10 Power BI dashboards** tracking key workforce metrics (turnover, time-to-hire), helping leadership reduce **vacancy duration by 18%** and improve staffing planning.

EDUCATION

Master of Science - Business Analytics | University of Maryland

College Park, MD, 2024

Bachelor of Science- Business Analytics | GITAM University

India, 2021

SKILLS

- Advanced SQL (CTEs, Window Functions, Constraints)
- Power BI DAX
- Power BI Data Modeling
- Tableau Level of Detail (LOD) Expressions
- Python Process Automation
- Excel VBA Macros
- SQL-Based ETL Pipeline Development
- Time-Series Demand Forecasting (Moving Averages, Seasonality)
- User Acceptance Testing (UAT) Test Case Design
- Jira Backlog Management
