

Riya Pawar

Full-Stack Software Engineer | Cloud & DevOps Specialist
NJ, USA | +1 551-804-2728 | pawarriya114@gmail.com | [LinkedIn](#)

Professional Summary

Software Engineer with 5+ years of experience developing scalable full-stack and cloud-based applications using React.js, Node.js, Java, and C#. Delivered 20+ microservices and implemented CI/CD pipelines that reduced deployment time by 60% and cut infrastructure expenses by 25%. Demonstrated expertise in test automation using Selenium, Pytest, and JUnit, as well as cloud platforms like AWS and Azure. Experience with containerization and orchestration using Docker and Kubernetes. Delivered high-availability systems supporting 100K+ users and improved system performance through legacy code refactoring and architecture redesign.

Professional Experience

Software Engineer, HyperNex Technologies, USA

Nov 2024 – Present

- Engineered 100+ test cases with Selenium & Pytest, boosting automation coverage from 50% to 90% in 6 months.
- Accelerated test cycle time by 35% with modular regression test suites, enabling faster CI/CD pipelines.
- Integrated Postman API tests into CI workflows, decreasing API failure rates by 20%.
- Investigated and resolved root causes of recurring bugs, cutting repeat defects by 50%.
- Executed cross-browser and responsive testing, ensuring 100% compatibility across Chrome, Firefox, Safari, and mobile.
- Led performance/load testing using JMeter, optimizing application response time by 25%.
- Developed a reusable QA framework, reducing onboarding time for new engineers by 40%.
- Optimized Dockerized environments in collaboration with DevOps, cutting build time by 30%.
- Constructed real-time test dashboards using Allure Reports & Jenkins, improving visibility and reducing release delays by 15%.

Software Engineer, Iflair Web Technologies | Gujarat, India

Feb 2019 – Aug 2023

- Created 15+ microservices using Spring Boot, Node.js, and Kafka, reducing system downtime by 45%.
- Streamlined CI/CD workflows via GitHub Actions, Jenkins, and Docker, lowering deployment errors by 35%.
- Provisioned and deployed cloud-native solutions on AWS & Azure using Terraform, achieving 25% infrastructure cost savings.
- Implemented Kafka for event streaming, processing 2M+ messages daily, boosting throughput by 20%.
- Enhanced unit and integration test coverage by 40% with JUnit, Cucumber, and Mockito.
- Introduced centralized logging with ELK Stack, reducing MTTR by 50%.
- Mentored 3 junior developers and led code reviews, improving code quality and reducing bugs by 30%.

Projects

Enterprise Payment Portal

- Built fault-tolerant system using C#, .NET Core & Kafka, cutting transaction delay by 50%.
- Automated tests using Cypress & Cucumber, reducing manual testing by 40%.
- Deployed to Azure Kubernetes Service (AKS) using Helm for zero-downtime deployments.

E-commerce Platform Development

- Engineered scalable backend using Java, Spring Boot, handling 10,000+ concurrent users.
- Integrated Redis & MySQL for performance optimization and session caching.

Certifications

- AWS Cloud Technical Essentials – Amazon
- Migrating to the AWS Cloud – Amazon
- Google AI Essentials – Google

Technical Skills

- Frontend: React.js, Next.js, Redux, TypeScript, Material UI, Tailwind CSS
- Backend: Java (Spring Boot), Node.js, Express.js, .NET Core, Python (FastAPI)
- DevOps & Cloud: AWS, Azure, Docker, Kubernetes, Terraform, CI/CD (GitHub Actions, Jenkins)
- Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, Redis
- Testing & QA: Selenium, Pytest, Cypress, JUnit, Cucumber, Mockito
- Tools & Collaboration: Git, Jira, Postman, Confluence, Slack
- Messaging/Event Streaming: Apache Kafka, RabbitMQ, AWS SNS/SQS
- Practices: Agile/Scrum, TDD, BDD, SRE Awareness

Education

- Master of Science in Computer Science** Sep 2023 – May 2025
Pace University, New York, NY, USA
- Integrated Master of Science (M.Sc.) in Information Technology** Aug 2013 – Apr 2018
K.S School of Business Management, India
