

SAGARIKA ARABAKA

Senior QA Automation Engineer / SDET | Web, Mobile & API Automation | CI/CD & Agile

Contact: +1 (814) 403-6717 | Email: sagarikaqa5@gmail.com

PROFESSIONAL SUMMARY

- QA Automation Engineer / SDET with **4+ years of progressive experience** in designing, developing, and executing scalable automation frameworks
 - Strong expertise in **web, mobile, and API automation** for enterprise applications
 - Hands-on experience with **Selenium, Cypress, Playwright, Appium, and REST API automation**
 - Domain experience across **banking, telecom, and insurance** industries
 - Proven ability to work effectively in **Agile/Scrum environments**
 - Experienced in integrating **automated testing into CI/CD pipelines**
 - Skilled in **backend database validation** and **performance testing**
 - Strong collaborator with **cross-functional teams**, including developers and DevOps
 - Experience mentoring **junior QA engineers** on automation best practices
 - Focused on delivering **high-quality, reliable, and scalable software solutions**
 - Passionate about **continuous improvement, TestOps practices**, and leveraging **cloud & DevOps tools** to improve test efficiency and coverage
-

CORE TECHNICAL SKILLS

Automation & Testing Tools: Selenium WebDriver, Cypress, Playwright, Appium, Rest Assured, Cucumber, Postman, SoapUI

CI/CD & DevOps: Jenkins, Maven, GitLab CI/CD, GitHub Actions, Docker, Kubernetes, Helm (basic), Terraform (basic)

API & Services Testing: REST, SOAP, GraphQL, Swagger

Performance Testing: JMeter, LoadRunner, BlazeMeter

Security Testing (Basic): OWASP ZAP, Burp Suite

Programming & Scripting: Java, Python, JavaScript, Shell Script, SQL

Frameworks & Libraries: TestNG, JUnit, PyTest, Mocha/Chai

Databases: Oracle, MySQL, SQL Server, PostgreSQL, MongoDB

Test Management & ALM: JIRA, HP ALM/Quality Center, Zephyr, TestRail, Rally

Cloud Platforms: AWS (EC2, S3, RDS, Lambda), Azure, Google Cloud

Other: BrowserStack, Sauce Labs, Cross-browser & Mobile Testing, TestOps, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior QA Automation Engineer – BNY

Location: Jersey City, NJ

Duration: June 2024 – Present

Project: OSS/BSS – CRM, Order Management, Provisioning & Billing

Responsibilities & Contributions:

- Designed and implemented end-to-end automation frameworks using Selenium WebDriver, TestNG, and Maven to support enterprise OSS/BSS applications.
- Automated smoke, regression, and functional test suites for CRM, Order Management, Billing, and Provisioning modules.
- Developed reusable Page Object Model (POM) and keyword-driven components to improve test maintainability and scalability.
- Executed backend data validation using complex SQL queries across Oracle and MS SQL Server databases.
- Performed API and web services testing using Rest Assured and SoapUI, validating XML and JSON payloads.
- Integrated automated regression suites with Jenkins CI pipelines for nightly and on-demand executions.
- Conducted performance, load, and stress testing using JMeter and LoadRunner to validate billing system scalability.
- Logged, tracked, and managed defects, test metrics, and traceability matrices using JIRA.
- Actively participated in Agile ceremonies including sprint planning, daily stand-ups, backlog refinement, and retrospectives.
- Collaborated closely with DevOps teams to support shift-left testing and early defect detection strategies.
- Mentored junior QA engineers on automation standards, framework design, and best practices.

Tools & Environment: Java, Selenium WebDriver, TestNG, Maven, Rest Assured, SoapUI, JMeter, LoadRunner, SQL, Oracle, MS SQL Server, Jenkins, JIRA, Agile Scrum

Senior QA Automation Engineer / SDET – AT&T

Location: Hyderabad, India

Duration: August 2022 – June 2023

Project: Web & Mobile Test Automation – Enterprise Applications & Telecom Services

Responsibilities & Contributions:

- Designed and developed scalable hybrid automation frameworks using Selenium WebDriver, Java, TestNG, and Cucumber (BDD).
- Automated functional and regression test cases for enterprise web and telecom applications.

- Developed BDD feature files using Gherkin syntax to enhance collaboration with business stakeholders.
- Implemented mobile automation solutions using Appium for Android and iOS platforms across real devices and emulators.
- Built API automation suites using Rest Assured for validating JSON/XML responses and contract testing.
- Integrated automation suites into CI/CD pipelines using Jenkins, GitHub Actions, and Maven.
- Performed performance and load testing using JMeter to evaluate application behavior under peak traffic conditions.
- Executed backend and ETL data validation using advanced SQL queries.
- Conducted cross-browser testing using BrowserStack across Chrome, Firefox, Edge, and Safari.
- Tracked and managed defects using Rally/TFS and collaborated with development teams for root cause analysis.
- Participated in all Agile Scrum ceremonies and contributed QA metrics and automation dashboards.

Tools & Environment: Java, Selenium WebDriver, TestNG, Cucumber, Appium, Rest Assured, JMeter, Jenkins, GitHub Actions, SQL, BrowserStack, Rally, Agile Scrum

QA Automation Engineer – MetLife

Location: Hyderabad, India

Duration: October 2021 – July 2022

Project: Enterprise Web Application Development & Automation

Responsibilities & Contributions:

- Developed and executed automation frameworks using Core Java, Selenium WebDriver, and JUnit for enterprise web applications.
- Automated smoke, regression, and end-to-end business workflows to improve test coverage and efficiency.
- Performed SOAP and REST API testing using Postman and SoapUI for insurance policy and claims systems.
- Conducted backend database validations using Oracle SQL and PL/SQL procedures.
- Integrated automated test execution into Maven and Jenkins-based CI pipelines.
- Executed cross-browser testing across Internet Explorer, Chrome, and Firefox.
- Utilized Log4j for logging, debugging, and reporting automation execution results.
- Logged and tracked defects using Rally and collaborated with developers during defect resolution cycles.
- Actively participated in Agile Scrum ceremonies and sprint reviews.

Tools & Environment: Core Java, Selenium WebDriver, JUnit, Postman, SoapUI, Oracle SQL, PL/SQL, Maven, Jenkins, Rally, Agile Scrum

ACADEMIC PROJECT

Meal Plan Generator using AI

Institution: Gannon University, Erie, PA

Duration: September 2023 – May 2024

- Developed and validated a Python-based AI-driven meal planning application.
- Performed functional, API, and database testing to ensure recommendation accuracy and usability.
- Executed unit and API automation using PyTest and Postman.
- Conducted database validation using SQL and performed scalability testing on large datasets.
- Worked in an Agile Scrum environment using JIRA and Git/GitHub with CI/CD integration.

Tools & Environment: Python, PyTest, Selenium, Postman, SQL, Git/GitHub, JIRA, Agile Scrum

EDUCATION

Master of Information Technology – Gannon University, Erie, PA

GPA: 3.8 / 4.0

Bachelor of Computer Science – Vaagdevi Degree & PG College, Hanamkonda, India

GPA: 9.0 / 10

CERTIFICATIONS

- Software Development Lifecycle Specialization – Coursera
- Google Cloud Database – Google Cloud
- Enterprise Design Thinking Practitioner – IBM
- AWS Cloud Practitioner – In Progress
- Certified Kubernetes Application Developer (CKAD) – In Progress
