

SAI KRISHNA GORTHI

Manchester, NH | (603) 935-0419 | krishnachowdary410@gmail.com |

Professional Summary

Detail-oriented and results-driven **Data Analyst** with 2+ years of experience in data extraction, analysis, and visualization. Adept at using statistical techniques and data mining tools to uncover insights from large data sets, enabling informed business decisions. Skilled in data modeling, trend analysis, and developing automated reports. Proficient in SQL, Python, Excel, and Tableau. Collaborative team player with excellent communication skills, able to deliver clear insights to diverse audiences.

Professional Experience

Data Analyst

Cigna Healthcare, New Jersey, USA

June 2021 – January 2025

- Transformed healthcare data to find patterns and trends, which led to an increase in forecasting precision by 15%.
- Utilize computational tools and employ machine learning/deep learning techniques to analyze and interpret intricate biological data pertinent to drug discovery.
- Designed and optimized financial dashboards using Excel and Power BI to enhance real-time data accessibility, improving stakeholder decision-making and reducing report generation time by 20%.
- Developed ETL pipelines using SSIS and Talend, optimizing data extraction, transformation, and loading processes, leading to a 35% increase in data processing efficiency.
- Extensive proficiency in Python programming for manipulation, utilizing libraries such as Pandas, NumPy, Matplotlib, Seaborn, and Plotly to handle and analyze extensive datasets efficiently.
- Analyzed VLOOKUPS and HLOOKUPS to ensure strict data verification to make it possible to cross-check data from different datasets and ensure uniformity thus minimizing data errors by 20%.

- Collaborate closely with multidisciplinary teams across biological sciences and drug discovery domains to seamlessly integrate computational insights into pragmatic drug development strategies.
- Identified cost-saving opportunities in monthly financial reports, leading to an estimated annual savings of \$500,000.
- Optimized budgeting and forecasting strategies, reducing preparation time by 10%.
- Executed data integration solutions using SSIS and Talend for the efficient transfer of data between different systems and platforms and thereby cutting down the data transfer time by 30 percent and enhanced data availability by 25%.

Data Analyst Intern

TPx Communications, Manchester, NH

August 2022 – December 2022

- Assisted in data extraction and cleaning from multiple databases to identify outliers and anomalies.
- Designed and tested data models and reporting queries to streamline analysis for a variety of clients.
- Collaborated with business analysts and stakeholders to create custom reports and dashboards using **Power BI**.
- Contributed to process optimization initiatives, improving data processing times by 20%.
- Provided training and support to junior team members on analytics tools and best practices.
- Supported senior analysts in performing detailed data analysis for customer behavior patterns, improving client satisfaction by 10%.

Technical Skills

- **Programming & Data Analytics:** Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly), SQL (PostgreSQL, MySQL).
- **Business Intelligence & Visualization:** Power BI, Excel, Financial Dashboards, Data Modeling, Forecasting, and Predictive Analytics.
- **ETL & Data Engineering:** SSIS, Talend, Databricks, Spark, Snowflake, Data Extraction, Transformation & Loading (ETL).

- **Data Validation & Optimization: VLOOKUP, HLOOKUP, Cross-Dataset Verification, Data Cleaning, Standardization, and Integrity. Experience**
-

Education

Master of Science in Computer Information Science

New England College, Henniker, NH

Graduated: Dec 2022
