Summary

Versatile Data Analyst with 3+ years of experience delivering actionable insights, building predictive models, and developing executive-level dashboards across healthcare and enterprise domains. Proficient in Python, SQL, Power BI, Tableau, and Snowflake, with hands-on expertise in ETL pipelines, A/B testing, and customer behavior analytics. Experienced in partnering with cross-functional teams to optimize data strategy and drive measurable business outcomes.

Work Experience

Business Intelligence Analyst, Mayo Clinic

Rochester, MN, May 2024 – Sep 2024

- Designed and deployed Power BI dashboards for executives, combining operational, financial, and clinical KPIs to enable self-service exploration and improve strategic alignment across business units.
- Created automated tagging solutions to track user interaction with discharge tools, enhancing the fidelity of behavioral data used in operational planning.
- Conducted A/B testing and workflow analysis, driving process optimizations that reduced patient readmission risk by 15%.
- Built scalable data pipelines with dbt and Snowflake, improving data structuring and reducing latency in clinical decision systems.

Data Analyst, Accenture Solutions Private Limited

Bengaluru, IN, Dec 2021 – Aug 2023

- Led the development of self-service analytics tools in Tableau and QuickSight to analyze sales, orders, and pricing trends, empowering global product teams with fast and flexible insights.
- Collaborated with stakeholders to identify data discrepancies and implemented a feedback loop with business users to remediate quality issues through training and documentation.
- Worked with AWS data lake components (S3, Glue, Athena) to aggregate large datasets across SAP, LIMS, and CRM, improving reporting consistency and reliability.
- Designed and deployed a predictive maintenance model, reducing unplanned equipment downtime by 15% through early anomaly detection.

Data Analyst, Wipro Limited

Hyderabad, IN, Jun 2020 – Nov 2021

- Developed SQL-based solutions to clean, structure, and analyze large customer behavior datasets, increasing report efficiency by 30% and enhancing visibility into sales performance.
- Built Power BI dashboards and Excel models for global executives to review quote-to-order conversion, pricing variance, and market trends in key regions.
- Acted as liaison between data engineering and product teams to translate complex data flows into clear reports and visualizations for cross-functional planning meetings.
- Automated recurring data validation checks using Python and Excel macros, improving data reliability and reducing manual QA effort by 40%.

Skills

Languages & Programming: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, R, SAS

BI & Visualization Tools: Power BI, Tableau, Excel, QuickSight, MicroStrategy VI, Salesforce

Analytics & Modeling: Predictive Modeling, A/B Testing, Operational Planning, Churn Analysis, Funnel Metrics

Data Engineering & ETL: dbt, Alteryx, Talend, SnapLogic, Informatica, SSIS

Data Quality & Governance: Data Tagging, Web Tracking, Digital Analytics, AI-assisted data cleaning, Documentation & Training

Cloud Platforms: AWS (Glue, S3, Athena, Redshift), Snowflake, GCP, Azure

Databases: MySQL, SQL Server, PL/SQL, Hadoop, Teradata

Tools: Git, JIRA, Agile/Scrum, Splunk, Google Suite, Microsoft Office

Projects

AI Model for Optimizing Supply Chain | [GitHub Link](#)

- Designed and implemented a machine learning pipeline using Scikit-learn to forecast product demand with high accuracy, leveraging advanced feature engineering and model tuning to enhance operational planning.
- Applied linear programming to optimize inventory allocation and minimize logistics costs while ensuring adherence to service-level agreements, addressing real-world constraints in warehousing and distribution.

Customer Churn Analysis | [GitHub Link](#)

- Designed and implemented a churn prediction model using Python and SQL to analyze digital behavior, transaction history, and engagement patterns.
- Achieved 78% precision and 81% recall using logistic regression and decision trees, and presented insights through a Tableau dashboard enabling targeted retention strategies.

Education

Sacred Heart University: Master of Science in Business Analytics, Connecticut

Dec 2024
