PROFESSIONAL SUMMARY

A highly capable and results-oriented developer possessing 3 years of professional experience in Java and SAP ABAP, with a specialization in the delivery of robust coding solutions within the Manufacturing and Retail sectors. I am currently transitioning back into the professional workforce following a planned career sabbatical dedicated to family responsibilities. Throughout this period, I proactively reinforced and updated my core technical competencies through dedicated online coursework and continuous professional development. I am eager to leverage this current and updated expertise to contribute significantly in a challenging new role that prioritizes continuous learning and professional growth.

TECHNICAL SKILLS

Programming Languages: Java(SE/EE),SAP ECC ABAP,SQL,Python

'Frameworks and Libraries: Spring MVC, Spring Boot, Hibernate, JPA, JUnit

Web Technologies: HTML, CSS, JavaScript

Database: MySQL, Oracle, IBM DB2

Tools: IntelliJ IDEA, Eclipse, SAP GUI, Selenium WebDriver, SAP NetWeaver Development Studio, VSCode

PROFESSIONAL DEVELOPMENT AND CAREER BREAK

Career Hiatus [July 2016-Present]

I initiated a planned career sabbatical to address family responsibilities. During this period, I ensured continued professional relevance by engaging in ongoing education, diligently refreshing my technical expertise and competencies.

Online Coursework :

- Coursera: Junior Software Developer (Amazon), Java with Selenium (Mr. Rahul Shetty)
- Google Certifications: Crash Course on Python, AI Essentials
- Databricks: Generative AI Fundamentals

Community Involvement : Actively volunteered in administrative tasks and teaching Tamil at a local NC school for the past 3 years, approved volunteer at WCPSS schools, proctored for tests at WCPSS school.

Tata Consultancy Services - Systems Engineer[Feb 2016-Jun 2016]

Worked as an SAP ECC ABAP developer in manufacturing domain , gathering requirements from the functional team, and meticulously took part in the development of classic and interactive reports, implemented module pool programs for product inclusion and exclusion functionality, developed BDC, BTE events and worked with enhancements.

Created fine-tuned technical specification document of the objects developed.

Actively participated in creation of Unit Test templates and plans for developments made by the team.

Peer reviewed development objects and gave suggestions to the developers, regarding coding standards and practices. Certified manufacturing domain employee at the company level.

Sabbatical[Dec 2014-Jan 2016]

Took a sabbatical break to take care of the newborn.

Tata Consultancy Services - Assistant Systems Engineer[Nov 2011-Nov 2014]

Even as a Java trainee, led a team of six members and submitted a mini JavaEE project, which was lauded by the coaches on its exemplary implementation and the coding standards of a theater ticketing system.

Worked as a .NET developer for a very short span of time , gaining a fair knowledge in .NET MVC front end development. Created the best manual test cases for the front end of the .NET project

and was appreciated by the team lead for the detailed work .

Moved to a SAP maintenance project , starting my journey as a SAP ECC ABAP trainee and started exploring ABAP concepts, understanding and tracking the bugs and fixing them. Developed the first complex module pool program for SAP MD04 transaction successfully. Dived into WebDynpro Java/ ABAP created interactive forms that were used by the client widely in their operation .

Moved as a stand alone developer of ABAP classic, interactive reports, complex module pool programs,iDocs, enhancements in a Retail project .

Collaboratively worked with functional team members in gaining insights on the requirements.Worked on Assortments, gaining insights on Retail domain specific knowledge. Created thorough technical documentation and Unit Test plans of developed objects.

Assisted the process of release of developments and changes to the production system carefully.

Created many number of learning documents and published in the company's internal platform for many others to gain knowledge.

Certified Retail domain employee at the company level.
