SUMMARY

Clinical Research Professional with 4+ years' experience in trial coordination, data management, and EHR optimization.

Proven track record as a primary coordinator on high-enrolling and complex drug trials with strict GCP, ICH, HIPAA, and FDA compliance.

Skilled in-patient recruitment, informed consent, safety monitoring, and protocol-driven study procedures.

Proficient in CTMS, EDC, and eClinicalWorks to ensure accurate, timely, and audit-ready documentation.

Known for precision, efficiency, and building strong relationships with participants, sponsors, and cross-functional teams.

WORK EXPERIENCE

Clinical research associate | Quick MD Care Clinics | February 2025 – Present

- Coordinated daily clinical trial operations, managing high-volume patient enrollment, visit scheduling, and protocol-driven procedures while ensuring strict adherence to GCP, ICH, and FDA regulations.
- Performed study-related assessments including diagnostic, efficacy, and safety evaluations, accurately documenting findings in CTMS and maintaining complete, audit-ready regulatory binders.
- Organized and maintained both paper and electronic source documents, ensuring data accuracy, timely query resolution, and compliance with study protocols.
- Built strong, professional relationships with study participants, sponsors, and cross-functional teams to enhance patient engagement and meet recruitment and retention goals.
- Developed and implemented SOPs, training materials, and data workflows to improve operational efficiency and maintain high-quality trial deliverables.
- Screened and consented study participants scheduled and conducted follow-up visits, and ensured all procedures were performed per protocol and in compliance with **GCP, ICH, HIPAA, and FDA** regulations.
- Collected and documented clinical data in **source charts and EDC systems**, performed query resolution, and maintained accurate study logs, regulatory files, and essential documents.
- Performed and documented **vital signs, ECGs, phlebotomy, specimen processing, storage, and shipment** in accordance with protocol and ALCOAC documentation standards.
- Coordinated with investigators, sponsors, and monitors to review study reports, address deviations, report SAEs, and ensure timely issue resolution during monitoring visits.
- Managed study start-up activities, site initiation preparation, supply ordering, and technology setup while supporting recruitment strategies to meet enrollment goals.

Data Analyst (intern) Welkin Technologies LLC | September 2024 – February 2025

- Conducted comprehensive data analysis to generate actionable insights and prepared detailed reports to support business decision-making and strategic planning initiatives.

- Collected, cleaned, and validated large datasets, improving data quality, consistency, and reliability for accurate analysis and reporting.
- Developed and maintained interactive dashboards and data visualizations using Excel, SQL, and Tableau to enhance data accessibility and real-time reporting.
- Collaborated with cross-functional teams to optimize data workflows, streamline reporting processes, and drive operational efficiency across departments.
- Supported the adoption of advanced data analysis techniques and tools, ensuring alignment with industry best practices and company standards.

ACADEMIC EXPERIENCE Graduate Student Researcher | University Of Missouri, School of Medicine | August 2022 – May 2024 Impact of HbA1c Trajectories on complications in Type 2 Diabetes Mellitus

- conducted a retrospective study mirroring clinical trial processes to assess the impact of HbA1c variability on diabetes-related complications, including neuropathy and cardiovascular diseases.
- Managed and analyzed a large clinical dataset of 8,100 patients using Snowflake, ensuring data accuracy and integrity in compliance with research standards.
- Applied patient stratification techniques, such as K-means clustering, to identify high-risk cohorts and support personalized treatment approaches.
- Developed predictive models using logistic regression to evaluate complication risks, validating findings with clinical trial-standard metrics.
- Prepared detailed reports emulating Clinical Study Reports (CSRs), showcasing methodology, statistical analysis, and data visualizations for stakeholders.
- Ensured adherence to Good Clinical Practice (GCP) standards in data handling and ethical compliance, enhancing the project's clinical research relevance.

Clinical Data Management | Accenture (Client: Novartis) | August 2019 – June 2022

- Reviewed eCRFs and performed Source Data Verification (SDV) using EDC systems like Medidata Rave and Oracle Inform.
- Managed essential regulatory documents and ensured completeness of the Study Master File in Veeva TMF.
- Conducted quality reviews, resolved discrepancies, and ensured adherence to Joint Applicable Metrics and TMF guidelines.
- Developed study-specific CRA training materials, conducted investigator meetings, and supported SOP development.
- Monitored clinical trial processes, including site initiation, protocol adherence, and close-out activities.
- Coordinated SAE reporting, clinical supply logistics via IWRS, and communication with investigative sites. Led co-monitoring visits, mentored junior CRAs, and provided strategic input to improve trial efficiency.

Clinical Research Associate | Aster CMI Hospital (intern) | June 2018 – July 2019

- Conducted on-site and remote monitoring, ensuring compliance with trial protocols and regulatory standards.
- Reviewed CRFs, SDV, and SDR to ensure data accuracy and resolved protocol deviations with corrective actions.
- Participated in site selection, initiation, and close-out visits, while managing study training and progress tracking.
- Identified and managed Adverse Drug Reactions (ADRs) and implemented drug therapy monitoring practices.
- Provided patient counseling, medication management plans, and dosage adjustments for specialized populations.

TECHNICAL SKILLS

- Proficient in managing regulatory documents (FDA 1572, CVs, FDFs) and ensuring compliance with ICH GCP, 21 CFR Part 11, and SOPs.
- Skilled in participant recruitment, informed consent, clinical data management, and maintaining research integrity.
- Experienced in CRF/eCRF design, data cleaning, query resolution, and data standardization including SDTM mapping.
- Hands-on experience with EDC systems (Medidata Rave, IBM Clinical, Oracle Inform) and CTMS platforms (Veeva CTMS, eTrack, iMedidata); adept in TMF management and quality reviews.
- Proficient in Microsoft Office Suite (Word, Excel, PowerPoint, MS Project) for documentation, data analysis, and project coordination.

CERTIFICATIONS

- Good Clinical Practice (GCP) Course for Clinical Trials Involving Drugs
- Clinical Research Coordinator (CRC) Certification
Specialized Clinical Research Training, Xcel Career Clinical Research Training Center
