📍Norristown, PA

SUMMARY

Interdisciplinary researcher combining strengths in data science and molecular genetics to explore data-driven solutions in health and biomedical research. Experienced in computational modeling, bioinformatics, and experimental techniques from molecular biology. Proficient in Python, SQL, and large-scale data analysis, with a focus on applying quantitative methods to uncover biological insights and improve research outcomes.

SKILLS

- SPSS, Python, R, SQL, MySQL, Tableau, Power BI
- Machine Learning, NLP, Predictive Modeling, Hypothesis Testing
- Data Cleaning and Visualization, Dashboard Design
- Wet lab techniques

EXPERIENCES

Clarkson University: Graduate Assistant | 01/2025 - 05/2025

- Maintained office hours to provide direct contact with students or clarify course materials or course content.
- Evaluated student performance through grading test papers.

Dr Kishore Khatri & Associate Dental & Aesthetic Practice: Research Analyst | 01/2021 - 12/2023

- Handling and performing data analysis, validation, visualization and interpretation of results using statistical software.
- Prepared presentations outlining findings from data analysis projects.
- Case reports and scientific manuscript writing.

Universiti Sains Malaysia: Graduate Assistant | 04/2017 - 03/2020

- Research in the craniofacial and molecular laboratory.
- Publication in national and international indexed journals
- Authored and co-authored numerous research and papers
- Clinical supervision of orthodontic undergraduate students

EDUCATION

Master of Science in Applied Data Science (MS ADS)

Clarkson University

01/2024-Present (Graduation 12/2025)

📍Potsdam, NY

Doctor of Philosophy (PhD)

Universiti Sains Malaysia

01/2017 – 03/2021

📍Kota Bharu, Malaysia

Master of Sciences (MSc)

Universiti Sains Malaysia

09/2013 – 10/2016

📍Kota Bharu, Malaysia

Bachelor of Dental Surgery (BDS)

University of Dhaka

03/2006 – 10/2010

📍Dhaka, Bangladesh

PROJECTS AND RESEARCH

Projects

1. **Database model and implementation** – Dental clinic management
2. **Information visualization** – Bone tumor survey
3. **Data mining** – Prediction of kidney disease severity
4. **Machine learning** – Autism prediction in adults
5. **Natural language processing** – News article classification
6. **Capstone Project** - Self-Reported Oral Health Status: The NHANES study
7. **Data Driven App. Development** - Dental Clinic Management System
8. **Big data and cloud services** - NYC 311 complaint analysis –visual data storytelling

Research

1. **MSc research topic** - Determination of DUSP6 gene mutation and its effect on craniofacial morphology among Malaysian Malay in the Class III malocclusion patients attending at hospital Universiti Sains Malaysia.
2. **PhD research topic** - Association of interleukin gene polymorphism and clinic variables with external apical root resorption after initial stage of orthodontic treatment among Malay population.

Research projects as a co-supervisor

1. A systematic review of tooth abnormalities in cleft lip and palate patients.
2. A systematic review of genetic mutations in cleft lip and palate patients.

PUBLICATIONS

Author and co-author of many scientific papers that were published in different journals. All publications can be found on [ResearchGate](#)
