

SHREEKAR BUKKAPATTANAM

812-974-3629 | shreekar.shredder2002@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Software Engineer with professional experience designing and implementing solutions within a **Java Spring Boot microservices architecture**. Proficient in evaluating business rules to build robust **RESTful APIs (Swagger)** and event-driven integration layers using **Apache Camel** and **Hibernate**.

EDUCATION

- Indiana University Bloomington** – *Master of Science in Computer Science (GPA: 3.67)* Aug 2023 – May 2025
- Coursework: Algorithms, Distributed Systems, Software Engineering, Data Mining, Computer Networks, Elements of AI
- Jawaharlal Nehru Technological University** – *Bachelor of Science in Computer Science* Aug 2019 – May 2023

TECHNICAL SKILLS

Java Ecosystem: Java (Spring Boot, Spring Framework), Hibernate (JPA), Apache Camel, EJB, JDBC
API & Integration: REST APIs (Swagger), JSON, XML/XSLT, SOAP (WSDL), Event-Driven Architecture
Frontend: ReactJS, JavaScript, HTML5, CSS3, Angular Concepts
Testing & Tools: Automated Testing (JUnit, JMeter), Log4j, Git, CI/CD (Jenkins/GitHub Actions), SQL

EXPERIENCE

- Software Engineer (React & Microservices)** – *Heartland* Nov 2024 – Present
- Analyzed **User Interface requirements** to design and implement new Web Applications using **ReactJS**, ensuring a responsive experience for 500+ daily users.
 - Evaluated business rules to design new features within a **microservices architecture**, integrating frontend flows with backend APIs via JSON.
 - Prepared and implemented **automated test solutions** for UI components using Jest/React Testing Library, ensuring component stability before release.
 - Collaborated with the team to improve **release management** processes, utilizing CI/CD tools to automate deployment to cloud environments.
- Software Developer (Java Spring & Integration)** – *Indiana University* Jan 2024 – May 2025
- Designed and implemented backend services for the student portal using **Java Spring Boot** and **Hibernate (JPA)**, handling complex data relationships.
 - Evaluated **event-driven integration requirements** to connect the portal with external legacy systems, utilizing **Apache Camel** and **XML/XSLT** transformations.
 - Developed and documented **Java Spring/Swagger based APIs**, ensuring clear contracts for frontend developers and external consumers.
 - Implemented **automated test solutions** for each new API using **JUnit** and Mockito, and performed load testing with **JMeter** to verify system performance.
 - Managed application logging and monitoring using **Log4j**, proactively troubleshooting issues in the production environment.
- Software Engineer Intern** – *Amadeus* Jan 2023 – Aug 2023
- Awarded **Outstanding Intern** for contributions to production SDK serving **50K+ monthly active users**, refactoring module architecture and reducing bundle size by **30%**.
 - Built **plug-and-play Node package** wrapping React components into a single HTML tag, cutting client onboarding from **2-3 hours to 10 minutes**.
 - Implemented **micro-frontend architecture** with module federation enabling clients to independently load components.

PROJECTS

- YC Directory (Hackathon)** | *React, Next.js, Sanity CMS, TailwindCSS, Sentry* Dec 2024 – Jan 2025
- Built a startup pitch submission platform that won the **Audience Favourite Award**, using LLM-assisted planning and code generation to rapidly ship features such as real-time content updates and GitHub OAuth authentication.
- Intelligent Course Recommender (Google & ServiceNow Hackathon)** | *FastAPI, OpenAI Embeddings* 2024
- Built a semantic course-recommendation engine by embedding university course data using OpenAI vectors, storing them in PostgreSQL, and exposing similarity-search APIs via FastAPI to help students discover relevant classes beyond keyword search. **Received runner up award for creativity and implementation.**
