

Shujaat Ali

Web Scraping, Data Analytics & Automation Specialist

shujaatalee888@mail.com | +92 315 535 8091 | 6th Road, Near
Dubai Plaza, Rawalpindi, Pakistan

Professional Summary

I am a dedicated Software Engineer with over 1.5 years of experience specializing in web scraping, data extraction, data analytics, and CI/CD automation. Proficient in Python and libraries like Scrapy, Selenium, BeautifulSoup, and Pandas, I excel in developing efficient data extraction workflows, performing in-depth data analysis, and automating deployment pipelines using GitHub Actions to deliver high-quality applications on time. My expertise bridges data extraction, analytics, and DevOps practices, ensuring robust, data-driven solutions while adhering to best coding standards (PEP 8) and website compliance policies.

Education

- **Bachelor of Engineering in Software Engineering**
National University of Sciences and Technology (NUST), 2019 - 2023
GPA: 2.96 / 4.0

Skills

- **Web Scraping & Extraction:** Scrapy, Selenium, BeautifulSoup, Requests, Proxy Management, Captcha Solving, VPN Usage
- **Data Analytics:** Pandas, Data Cleaning, Normalization, Exploratory Data Analysis (EDA), Data Visualization
- **Programming:** Python (PEP 8 Compliant), SQL, MongoDB, Redis, Airtable
- **Automation & CI/CD:** GitHub Actions, Workflow Automation for Testing, Building, and Deployment
- **Research & Development:** Complex Website Analysis, Data Pipeline Optimization
- **Languages:** English (Fluent)

Work Experience

- **Associate Software Engineer**
Codeaza Technologies, 2024 - Present
 - Designed and developed robust applications for large-scale data extraction using Scrapy, Selenium, and Requests.
 - Implemented proxy rotation and VPN encryption to bypass IP blockages and access restricted websites.
 - Integrated captcha-solving services to ensure uninterrupted data workflows.
 - Conducted extensive research on target websites to optimize scraping strategies.

- Utilized Pandas for data cleaning, normalization, and exploratory data analysis to derive actionable insights.
 - Managed data storage with SQL, Redis, and Airtable for efficient retrieval and analysis.
 - Automated deployment pipelines using GitHub Actions, reducing manual effort and ensuring timely delivery of applications.
- **Junior Software Developer**
VisionTech 360, August 2023 - October 2023
 - Developed Python scripts for data extraction from online resources using Scrapy, Requests, and Selenium.
 - Gained foundational knowledge in gRPC and web scraping techniques.
 - Performed initial data processing to support analytical tasks.

Key Projects

- **Web Scraping to Analytics Pipeline**
 - Built an end-to-end pipeline extracting e-commerce data using Scrapy, followed by Pandas-based analysis to identify pricing trends.
 - Generated actionable insights, improving decision-making for a mock retail client.
- **CI/CD Automation for Data Extraction App**
 - Implemented GitHub Actions workflows to automate testing, building, and deployment of a web scraping application.
 - Reduced deployment time by 40% and ensured consistent delivery of high-quality code through automated checks.
- **Dynamic Website Data Extraction**
 - Developed a Selenium-based solution to scrape real-time data from JavaScript-heavy sites, with subsequent analytics using MongoDB.

Additional Information

- Passionate about leveraging data extraction to fuel advanced analytics, machine learning, and automation practices.
- Committed to writing clean, maintainable code and staying updated with industry trends in DevOps and data engineering.
