EDUCATION

Virginia Tech

Bachelor of Science in **Clinical Neuroscience** - GPA: 3.63/4.00

Expected Graduation: May 2026

- Minors: **Computer Science; Biological Sciences**
- Deans List: Fall 2022 – Spring 2025
- Relevant Coursework: Intermediate Python, Data Structures and Algorithms (Java), Neuroendocrinology, Biostatistics
- Awards and Recognitions: Dennis Dean Conference Ben Knapp Award, 2025 | Biotechnology College Scholarship, 2022

WORK EXPERIENCE

Embodied Brain Lab - **Undergraduate Researcher**

May 2024 – Present

- Performing quantitative and qualitative data analysis on EEG recordings using Excel and signal processing software
- Presented findings on art-based interventions to the Virginia General Assembly and academic conferences

Student Success Center - **Lead Tutor**

August 2023 – August 2025

- Trained and supervised 30+ tutors, optimized operations and resource allocation with data tracking and feedback collection
- Tutored 100+ students in chemistry and biology, achieving measurable improvements in performance

IMPACT Hokie Wellness – **Peer Mentor**

August 2024 – August 2025

- Led 10+ alcohol harm reduction workshops, educated 200+ students on risk management and prevention strategies
- Conducted outreach and collected data to evaluate program effectiveness, aligning with wellness and public health goals

Schiffert Health Center - **Clinical Assistant**

January 2025 – May 2025

- Supported clinical workflows by recording patient vitals, coordinating with staff to improve patient flow and service quality
- Gained experience in patient-centered care, healthcare operations, and communication within multidisciplinary teams

Neurorestorative Rehab Center - **Direct Support Professional**

October 2023 – March 2024

- Supported adults with brain injuries through behavioral monitoring, care coordination, and progress documentation
- Collaborated with interdisciplinary healthcare teams to implement patient-centered treatment plans

Georgetown University – **Research Intern**

May 2023 – February 2024

- Utilized machine learning and bioinformatics to design a pan-cancer peptide vaccine targeting the PIK3CA gene
- Co-authored research in MDPI (2024): “AutoEpiCollect, a Novel Machine Learning-Based GUI Software for Vaccine Design.”
- Conducted data-driven research and applied analytical models to inform healthcare innovation

Blacksburg Rescue Squad - **Emergency Medical Technician (EMT)**

April 2024 – September 2024

- Performed life-saving interventions and ensuring high-quality patient care
- Documented patient records and vitals in compliance with HIPAA regulations and organizational standards

LEADERSHIP EXPERIENCE

Student Ambassador

Jan 2024 - Present

- Representing the College at recruitment events, engaging with 200+ prospective students and families

Vice President – Compress and Shock Club

Jan 2024 – Present

- Organizing CPR and AED certification workshops on-campus and in local communities, enhancing health education outreach

Student Representative - Honors Student Council

August 2024 – August 2025

- Partnered with the Honors College Dean to improve student experience through new support and mentorship initiatives.

PROJECTS

AutoEpiCollect – Co-Author

June 2023 - January 2024

- Developed AutoEpiCollect (ML-GUI) for rapid, safe epitope selection in personalized vaccine design
- Designed a PIK3CA pan-cancer vaccine and modeled epitope-receptor interactions using bioinformatics

Data Science Web Analysis

January 2023

- Retrieved, processed, and analyzed online data using public APIs and web scraping
- Cleaned and structured data, performed exploratory analysis, and created visualizations in Python to answer research questions, demonstrating proficiency in data collection, processing, and visualization techniques

Tower of Hanoi Solver

September 2025

- Implemented a recursive algorithm in Java to efficiently solve the Tower of Hanoi problem, demonstrating mastery of recursion and procedural logic to manage state transitions across multiple pegs

CERTIFICATIONS AND SKILLS

- Emergency Medical Technician (EMT) Certification - Blacksburg Rescue Squad (2024)
- Software Proficiency: Microsoft Excel, PowerPoint, R, Python, Java, SQL, Git/GitHub, Bioinformatic Tools
- Competencies: Quantitative/Qualitative Data Analysis, Process Improvement, Project Management Support, Data Modeling, Technical Writing
